42,865

registered agents in Maharashtra

almost none work from the registered record

MUMBAI PROPERTY REGISTRATIONS PER MONTH · 2026

WHAT BRICKROCK IS

A **micro-market advisory and brokerage desk** working one Mumbai corridor at pocket level. We are paid a commission when a client transacts.

- The market is busy *and* oversupplied at the same time. That is precisely the condition in which advice is worth paying for.
- Every registration is public, dated and addressable. IGR e-Search is free and covers Mumbai back to 1985.
- The gap is not access to data. It is the work of turning it into a recommendation someone can act on.

THE CUSTOMER'S PROBLEM

A ₹2.3 crore decision, made on an asking price and a brochure.

THE QUESTION THAT DECIDES THE DEAL	WHAT THE MARKET GIVES YOU	WHAT ANSWERING IT ACTUALLY TAKES
Is this asking price above or below what flats in this building actually registered for?	An asking price, set by the seller	Registered instruments from IGR e-Search, normalised to one area basis
Is that 1,150 sq ft carpet, built-up or saleable?	All three, used interchangeably	One basis, applied consistently — or the ₹/sq ft comparison is wrong by 20–30%
Has this developer delivered on time before?	A brochure and a possession date	MahaRERA quarterly filings, complaints and the promoter's actual record of slippage
Will the society clear my loan, my tenant, my renovation?	Nothing	The society's own rules and resolutions, read before the deposit — not after it
What does the commute actually cost me at 9am on a Tuesday?	A map with a straight line on it	A commute walked and timed from the building gate at the hour it matters
If I need to exit in three years, who buys this?	Optimism	Resale depth and days-on-market for this pocket, from the registered record

None of the right-hand column is secret. All of it is public, and almost none of it reaches the buyer before the cheque is written.

The mistake stays invisible for years. A bad pocket or a wrong area basis only surfaces at resale.

Nobody is paid to prevent it. Portals are paid per listing, channel partners per project, developers per unit.

This is what we sell. Not access to inventory — a defensible answer to those six questions, in writing.

WHAT BRICKROCK IS

One business. One revenue line. One by-product that compounds.

WHAT IT IS

A micro-market real-estate **advisory and brokerage** business, run by one founder in one corridor, earning **1.32% blended commission** on resale, primary and rental transactions.

WHAT IT IS NOT

Not a property portal. Not a data or SaaS product. Not an AI platform. Not a technology company. Not a large brokerage. Nothing here is sold by subscription or licensed to anyone.

WHY THE RECORD MATTERS ANYWAY

Because it is the only asset in this business that a better-funded competitor cannot simply buy. It is generated by transacting, and there is no other way to get it.

HOW IT WORKS

Seven steps, one loop, and an evidence layer that is a working tool — not a product.

THE EVIDENCE LAYER · an operating tool, not a product

A working record maintained in a spreadsheet and a CRM. It is never sold, never licensed and never shown as a platform.

Registered prices

IGR e-Search, normalised to carpet area

→ 03 · 05

Project register

MahaRERA filings, promoter delivery and complaint record

→ 03 · 06

Pocket field file

Society rules, maintenance, parking, timed commute

→ 03 · 04

Supply and rent

Listing age, asking-to-closed gap, rental depth

→ 05

Own deal record

Every offer, every objection, every reason a buyer walked

→ 01 · 03 · 05

The system exists to win the mandate, sharpen the shortlist and hold the line in a negotiation. It is not the product — the advice is.

WHERE WE START

Six localities on one spine, chosen by a model that survives being wrong.

THE CORRIDOR, NORTH TO SOUTH		ASKING BAND · ₹ PER SQ FT	2BHK RENT	GROSS YIELD
	Mulund Thane–Borivali tunnel catchment	19k — 26k	₹48k	2.9–3.7%
	Bhandup Value corridor; Metro 6 terminus vicinity	18k — 24k	₹42k	3.0–3.8%
	Kanjurmarg Metro 6 + JVLR; large redevelopment pipeline	24k — 31k	₹58k	2.8–3.6%
	Powai IT/GCC catchment; Metro 6 alignment	28k — 42k	₹78k	2.6–3.4%
	Vikhroli Godrej land bank; Eastern Express Highway	22k — 30k	₹60k	2.8–3.6%
	Ghatkopar Metro 1 + Metro 2B interchange	20k — 28k	₹52k	2.9–3.7%

Six localities on one spine — the Eastern Express Highway and JVLR, with Metro Line 6 running through it. Reachable end to end inside an hour, which is the binding constraint for a single founder. Asking bands and rents are portal-derived, medium confidence.

THE WEIGHT VECTOR — ONE STRATEGY, APPLIED TO ALL SIX

Analyst model. Across 5,000 randomised weight vectors — every weight jittered ±50% — Eastern & Central stays first 99% of the time. Navi Mumbai and Western tie at 7.48; the model cannot separate them, so it says so.

CUSTOMER-MARKET FIT

The buyer is already in the corridor — and 25% of closures pay 43% of the bills.

WHO WE CLOSE vs WHO PAYS THE BILLS

Primary is 25% of closures and 43% of commission. Rental is 15% of closures and 4% of it.

Segment mix, ticket sizes and commission rates are planning assumptions. Blended rate 1.32% on an average consideration of ₹2.30 cr. The 90-day pilot exists to replace these with measured values.

WHAT EACH SEGMENT IS ACTUALLY BUYING

Resale · 2BHK

The upgrader already living in the corridor. Buys certainty on price and on the society's rules.

₹2.2 cr · 1.00%

₹13.2 L in Year 1

Resale · 3BHK

Same buyer, later. Higher ticket, longer decision, almost always arrives by referral.

₹3.8 cr · 1.00%

₹11.4 L in Year 1

Primary

The buyer who wants a new project but no bias. We are paid by the developer and say so, in writing.

₹2.6 cr · 2.00%

₹19.5 L in Year 1

Rental

Not a revenue line — a lead nursery. Today's tenant is the buyer in eighteen months, and it pays the rent now.

₹9.0 L p.a. · 8.00%

₹1.6 L in Year 1

COMPETITIVE POSITIONING

Everyone competes on inventory. Nobody competes on the decision.

The competitor set is not the portals — it is the 42,865 registered agents in Maharashtra, almost none of whom work from the registered record.

WHAT EACH ONE IS GOOD AT — AND WHERE IT STOPS

Property portals	Discovery, at enormous scale
Paid by the listing, so duplicate and stale inventory is a revenue source rather than a defect. Discovery is not a decision.	
National brokerages	Primary inventory and developer access
Paid 2–5% by the developer. The buyer is never told which project pays the most, and the incentive is never disclosed in writing.	
Local independents	Pocket knowledge, held in one head
No written record, no comparables, no continuity. The knowledge is real and it dies with the deal.	
Brickrock	The decision, in writing
The same commission, earned the same way. What changes is that the recommendation carries evidence and a written reason for every property that was rejected.	

It is not the software. It is the transaction record that only we will hold.

The loop costs nothing to run. It only requires doing the work.

THE ASSET THAT COMPOUNDS · cumulative proprietary transaction evidence

Illustrative accumulation on the base-case closure schedule. The shape is the argument, not the level: a competitor with ten times the capital still starts this curve at zero, because the evidence is generated by transacting and cannot be bought, licensed or scraped.

CLOSED PRICES, NOT ASKING PRICES

What a flat actually registered for, normalised to one area basis, pocket by pocket. Portals hold the asking price and nothing else.

WHY DEALS FAILED

Eleven buyers who walked away and the reason each one gave. No public source records a transaction that did not happen.

THE SOCIETY FILE

Rules, resolutions, real maintenance, parking reality, tenant restrictions. Collected building by building, on foot.

A REFERRAL BASE THAT ANSWERS

People who transacted through us once and pick up the phone. That is earned across a hundred deals, not bought in a round.

One revenue line at 1.32% blended — and almost no capital at risk.

WHAT IT COSTS TO RUN

GST at 18% is an output tax collected from the client, not revenue. TDS of 2% under section 194H is withheld at source and credited against income tax.
Conversion rates, segment mix and commission rates are planning assumptions the 90-day pilot exists to replace.

YEAR-1 OUTCOME BY CLOSURE COUNT · ₹ lakh

The first hundred conversations come from work, not from spend.

THE BASE-CASE FUNNEL · TWELVE MONTHS

Qualified-lead rate and site-visit conversion are the two numbers everything downstream depends on. They are the first two the 90-day pilot has to measure.

CHANNELS, RANKED BY WHAT A COMPETITOR CANNOT BUY

	COST PER QUALIFIED LEAD	TIME TO FIRST LEAD
Referrals from closed clients	₹300	6–9 months
Cannot be bought		
Pocket briefs and content	₹900	3–6 months
Cannot be bought		
Society and RWA relationships	₹600	2–4 months
Hard to buy		
Co-broking network	₹1,200	4–8 weeks
Hard to buy		
Portal listings	₹4,200	immediate
Anyone can buy		
Paid advertising	₹6,800	immediate
Anyone can buy		

The cheap and defensible channels are the slow ones. That is the whole reason the first ninety days are spent building them rather than buying leads.

Channel costs and latencies are analyst estimates for a single-founder desk, not measured values. @brickrockrealty has already produced 480k organic views on property explainers — content is the one channel where the capability already exists.

THE REFERRAL LOOP

CAPITAL AND THE PROOF

₹11.3 lakh, twelve months, and a ninety-day test that replaces the assumptions in this deck.

THE 90-DAY PROOF

WEEKS 1-2

Become legal

MahaRERA registration filed · 20-hour
Certificate of Competency booked

WEEKS 2-4

Lock the corridor

6 localities, 20-30 pockets frozen ·
MahaRERA project register built

WEEKS 4-6

Build the edge

IGR price baseline · society files ·
timed commutes · pocket scorecards

WEEKS 6-12

Sell

Certificate issued, marketing opens ·
30+ qualified leads · 5+ visit cycles

No advertising, listing or client work before the certificate issues.

Cash model: commission received on a six-week payout lag, net of 2% TDS; founder drawings held at ₹60,000 a month. Drawings are the largest line in the burn and the single biggest lever on how long the runway lasts.

₹11.3 L

twelve months of runway

The conservative trough of ₹8.1 L plus
40% headroom. Not the base case — the
case where only 7 deals close.

WHERE IT GOES

THE FOUNDER, AND WHERE THIS GOES

I have already built a business from zero. Brokerage in Mumbai is how I earn the right to build.

Already operating in real estate

1,055 followers

366k views, top reel

≈480k total reel views

@brickrockrealty — buyer education and property walkthroughs: *what is RERA, spotting an overvalued property, the parking scam*. An audience built by explaining, which is the same act the business sells.

MY OWN PRESENCE

19 posts · distribution capability that already exists

Twenty-four years of family context

- **Chanda Properties** — the family real-estate firm in Jaipur, trusted realtors since 2002.
- **~310 acres** of family land inheritance.
- **124 acres** owned by my father and being developed by him as a scheme.

FAMILY CONTEXT — NOT MY ASSETS

Context and access — not a balance sheet I own.

Each stage funds and de-risks the next. Nothing here requires a leap — only that the previous stage actually worked.
