THE OFFICIAL MATP SYLLABUS — EXAMINABLE

1	Real Estate Orientation	LOW
2	The RERA Act, 2016	VERY HIGH
3	MahaRERA	VERY HIGH
4	The MahaRERA Portal	HIGH
5	Agent Registration & Responsibilities	VERY HIGH
6	Project Registration & Promoter Duties	HIGH
7	Allottees & Dispute Resolution	HIGH
8	Due Diligence	HIGH
9	Sales Process, Forms & Agreements	HIGH
10	Real Estate Calculations	HIGH

PROFESSIONAL DEPTH — BEYOND THE SYLLABUS

11	Mumbai Real Estate	NOT EXAMINABLE
12	Real Estate Finance	NOT EXAMINABLE
13	Market Research	NOT EXAMINABLE

DAY-BY-DAY STUDY TRACKS

- A 14-Day Fast Track
- B 30-Day Professional Track

DAILY TOOLS

- C What Should I Study Today?
- D Master Resource Library

0

BEFORE YOU BEGIN

Start here

Open this page every day and you should always know what to study, what to read, what to watch, what to practise and what to remember. Three entry points:

IF YOU HAVE...	GO TO
Two weeks	14-Day Fast Track — exam-focused, day by day
A month	30-Day Professional Track — the full programme
A spare 30 minutes right now	What should I study today? — no decisions required
A specific question	Any module in the rail, or the Resource Library

How to read the markers

MARKER	MEANING
 Essential	Do not skip. Exam-relevant or job-critical.
 Important	Read once, understand, move on.
 Deep dive	Optional depth.
 Time-sensitive	Rates and rules that change. Re-verify at the official source before quoting to a client.
 Law	An actual statutory or regulatory requirement.
 Practice	Industry custom — <i>not</i> law. Never present it as law.
 /  / 	Tier 1 official · Tier 2 industry · Tier 3 video.

Three things to know before you begin

1. RERA is not MahaRERA. *RERA* is the central Act of Parliament (Act 16 of 2016). *MahaRERA* is the authority constituted for Maharashtra under it. The Act is the same across India; the rules, fees, forms, orders and circulars are Maharashtra-specific. There is no such thing as "the MahaRERA Act" — writing that in the exam costs you the mark. This course keeps them separate everywhere.

2. Link verification. Every link here came out of live web-search results, so the pages are real and indexed. But the environment this course was built in blocked outbound page fetches, so each page could not be opened to confirm its live status — and YouTube run-times could not be read. **Video durations are therefore omitted rather than invented.** Where a link fails, the parent index page is given alongside it in the Resource Library so you can re-find the document.

3. A numbering quirk in the official syllabus. On the MATP page, Module 8's sub-topics are numbered 9.1–9.7 and Module 9's are numbered 10.1–10.4, which collides with Module 10. This course rennumbers them correctly. Don't be confused when you cross-check against the website.

The syllabus at a glance

Modules 1–10 follow the official MATP outline. Modules 11–13 are added professional depth — not examinable, but they are what make you credible in a Mumbai deal room.

Real Estate Orientation

Official syllabus: MATP Module 1, "Course Orientation". **Exam weight:** Low directly, but every later module assumes this vocabulary.
Time: 3–4 hours.

1. What I need to learn

By the end of this module you should be able to walk into a room, hear someone say "*the promoter is doing a 33(7) with a PMC on board, we're pre-launch, RERA's applied for*" and understand every word of it.

Three things: **what real estate is**, **who the players are**, and **what order things happen in**.

2. Simple explanation

2.1 What is real estate?

Real estate is **land plus everything permanently attached to it**, plus the *bundle of legal rights* that come with it. That second half matters more than the first. In India you almost never buy "a flat" — you buy a set of rights: the right to occupy, to use, to transfer, to mortgage, to exclude others. A flat with a disputed title is bricks you cannot sell.

An agent who thinks of property as bricks gives bad advice. An agent who thinks of property as **a rights package with a paper trail** gives good advice. That single mental shift is the point of this whole course.

2.2 The ecosystem — who does what

PLAYER	WHAT THEY ACTUALLY DO	WHERE YOU MEET THEM
Landowner	Owns the land. May sell outright or contribute land to a JDA.	Start of the chain
Developer	Builds. Commercial/common term.	Everywhere
Promoter ⚖️	Legal term under RERA s.2(zk). The person who constructs/converts/develops and sells. Includes development authorities and, importantly, a landowner who has entered into a JDA. Wider than "developer".	The Act, agreements
Broker / Agent ⚖️	RERA s.2(zm): a person who negotiates or acts on behalf of one person in a transfer of a plot/apartment/building and receives fees/commission. This is you.	Between buyer and promoter
Channel Partner 📁	Industry term for an agent/firm formally empanelled by a developer to sell inventory, usually on a defined commission grid. Not a legal category — a channel partner still needs agent registration.	Developer sales meetings
Allottee ⚖️	RERA s.2(d): the person to whom a plot/apartment is allotted/sold. Includes a subsequent purchaser. Does not include someone to whom premises are given on rent.	Your client
Investor	Buys for yield or appreciation rather than use. Different risk appetite and exit horizon from an end-user.	Resale/pre-launch
Architect	Designs, and under RERA signs Form 1 certifying construction stage for fund withdrawal.	Approvals, QPR
Structural Engineer	Structural design; signs Form 2 .	QPR
Chartered Accountant	Certifies cost incurred; signs Form 3 .	QPR
Contractor	Executes construction. Civil, MEP, finishing.	Site
PMC	Project Management Consultant — manages cost, quality, schedule on the developer's behalf.	Site, developer meetings
Lawyer / Title consultant	Issues the Title Certificate / Search Report that everything else rests on.	Due diligence

PLAYER	WHAT THEY ACTUALLY DO	WHERE YOU MEET THEM
Lender	Bank/NBFC/HFC. Two roles: construction finance to the developer, home loan to your buyer.	Both sides
Government authorities	Planning (MCGM/BMC, MMRDA, CIDCO, SRA), registration (IGR), regulator (MahaRERA), tax (GST, Income Tax).	Every stage

Agent's note: the difference between *developer* and *promoter* is not pedantry. When a landowner does a JDA and the buyer sues for delay, the **landowner can be a promoter too** and jointly liable. Knowing who the promoter legally is tells your client who they can actually sue.

2.3 Market types

Primary market — buying from the promoter. First sale. GST may apply, RERA project registration applies, Agreement for Sale is the instrument.

Secondary market (resale) — buying from an existing allottee/owner. No GST. RERA project registration may have lapsed or completed. Instrument is usually a Sale Deed or a transfer of the earlier agreement. Title chain matters far more here because you inherit every past defect.

2.4 Asset classes

CLASS	DRIVER OF VALUE	TYPICAL MUMBAI NOTE
Residential	Household income, interest rates, end-user demand	Largest by volume; MMR is India's biggest market
Commercial (office)	Corporate leasing, IT/BFSI/GCC demand, rent per sq ft	BKC, Lower Parel, Andheri, Goregaon, Powai
Retail	Footfall, catchment income, trade mix	High-street vs mall; revenue-share leases common
Industrial / Warehousing	Logistics, consumption, highway/port access	Bhiwandi, Panvel, JNPT corridor
Land	Zoning, FSI, infrastructure timing	Highest risk, highest leverage on approvals
Redevelopment	Existing occupants + incentive FSI	Mumbai's dominant supply engine — see Module 11

2.5 The lifecycle — land to possession

STAGE	WHAT HAPPENS	KEY DOCUMENT PRODUCED	AGENT'S RISK RADAR
Land	Purchase or JDA; title search	Sale Deed / JDA , Title Certificate, 7/12 or Property Card	Unclear title, litigation, tenants
Planning	Architect designs to zoning + FSI	Concept plan, FSI statement	Design assumes FSI not yet sanctioned
Approvals	Plan sanction, IOD, NOCs (fire, environment, aviation, traffic)	IOD , sanctioned plans	Approvals "in process" at launch
Development	Site enabling, plinth	Commencement Certificate (CC)	Selling before CC
Construction	Structure → finishes	QPR, Forms 1/2/3	Slipping QPR, stalled works
Marketing	Branding, pricing, channel partners	Advertisements (must carry MahaRERA no. + QR 📄)	Ads without registration number
Sales	Booking, allotment	Allotment Letter	Taking >10% without Agreement ⚖️
Agreement	Agreement for Sale executed	AFS (Annexure A model form)	Deviations from model form
Registration	Stamped & registered at Sub-Registrar	Registered AFS + Index II	Unregistered agreement = weak rights
Possession	Handover after OC	Occupancy Certificate (OC) , possession letter	Possession offered without OC 🚩

Two hard legal anchors in that chain, worth memorising now because they recur in every module:

-  **You cannot advertise, market, book or sell** in a project that requires registration until it **is** registered — RERA s.3.
-  **The promoter cannot accept more than 10% of the cost** of the apartment as advance/application fee **without** first entering into a registered Agreement for Sale — RERA s.13(1).

3. Official reading material

Ministry of Housing & Urban Affairs — RERA landing page  <https://www.mohua.gov.in/cms/real-estate-regulation-and-development-act-2016.php> **Read:** the overview and the linked Act/rules. **Why:** it's the central ministry's own framing of why the Act exists — useful context before you read the Act itself in Module 2.

RERA Act 2016 — India Code (definitions only, for now)  <https://www.indiacode.nic.in/bitstream/123456789/2158/1/A201616.pdf> **Read: Section 2 only** — specifically 2(d) allottee, 2(e) apartment, 2(k) carpet area, 2(zk) promoter, 2(zm) real estate agent, 2(zn) real estate project. **Why:** the whole Act is definitions plus consequences. Get the definitions now and Module 2 becomes half as hard.

4. Best articles

PRIORITY	RESOURCE	WHY
 Important	Real Estate Development Guide: Key Steps and Project Types — Mastt	Clean, non-India-specific breakdown of the development lifecycle. Read it for the <i>shape</i> of the process, then map India's approval layer on top.
 Important	A Guide on Real Estate Development: From Concept to Creation — Sila Group	Mumbai-based developer services firm; the approval and execution sequence is written for Indian conditions.
 Deep dive	Land Acquisition Process in India — Proquiro	How land actually gets assembled — outright purchase vs JDA. Explains why the landowner sometimes is the promoter.

5. Videos

Watch in this order.

#	VIDEO	CHANNEL	WHAT YOU'LL GET		
1	[RERA Act 2016 Explained \	Introduction to Real Estate Regulation Act \	RERA for Beginners] (https://www.youtube.com/watch?v=g7pFvfazVWY)	(RERA educational channel)	The single best orientation to <i>why</i> this law exists. Watch before Module 2.
2	[Understanding Carpet Area — Built up & Super Built up Area \	Calculation, Loading & RERA explained] (https://www.youtube.com/watch?v=DPj2x6cwsT4)	(Real estate education)	Fixes the #1 vocabulary confusion in Indian real estate on day one.	

 Run-times are not listed anywhere in this course because they could not be verified — see the honesty note in the README.

6. Research / industry report

Knight Frank India — India Real Estate: Office and Residential Market, H1 2026 

<https://content.knightfrank.com/research/3116/documents/en/india-real-estate-office-and-residential-market-h1-2026-12927.pdf> **Read:** the India summary pages and the **Mumbai city section**. **Why it matters:** this is what a market report actually looks like — launches, sales, unsold inventory, quarters-to-sell. In H1 2026 it recorded **Mumbai at 47,355 units sold**, ~28% of all homes sold across the top eight cities, against **525,695 unsold units** nationally and a quarters-to-sell ratio of 6. You don't need to memorise the numbers; you need to learn to *read the four metrics*. Module 13 teaches you to do this yourself.

Beginner-friendly academic resource IIM Bangalore Working Paper No. 477 — "Housing Price Indices in India"

<https://www.iimb.ac.in/sites/default/files/2018-08/WP%20No.%20477.pdf> **Read:** the introduction and the section describing how Indian house-price indices are constructed. **Why:** teaches you to be sceptical of any "prices went up X%" claim by showing how the number is built. Older paper, but the methodology discussion is exactly the point.

7. Practical exercise

Map the Mumbai ecosystem (60 minutes).

Pick any one under-construction project you can see from a road you know. Then build a one-page map:

1. Who is the **promoter** (legal name, not brand name)?
2. Which **authority** sanctions it — MCGM, MMRDA, CIDCO, SRA?
3. Which **asset class** and which **micro-market**?
4. Is it a greenfield project or a **redevelopment**? If redevelopment, whose land was it?
5. Which lifecycle **stage** is it in right now, and what document would prove that?
6. List the **ten roles** from §2.2 and name or mark "unknown" for each.

Keep it. You'll redo it properly with portal data in Module 4 and it should look very different.

8. Case study

The two-brand problem.

A buyer tells you: *"I'm buying a Lodha flat in Thane."* You look it up and the promoter on the MahaRERA registration is a special purpose vehicle with a completely different name, and the land is owned by a third entity that entered a JDA.

Questions to sit with:

- Who does the buyer have a contract with?
- If the project is delayed 2 years, who does the buyer file against under s.31?
- Does the parent brand's balance sheet protect the buyer?

The point: in Indian real estate the **brand you see is rarely the legal entity you contract with**. Projects are routinely built in SPVs. This is normal and lawful — but it means brand reputation is not the same as counterparty strength, and your client should know the difference. Everything in Module 8 (Due Diligence) exists because of this gap.

9. Quiz — 10 questions

1. Under RERA, is a landowner who contributes land under a JDA a "promoter"?
2. What is the legal difference between a *broker* and a *channel partner*?
3. Does "allottee" include a tenant?
4. Name the three professionals who sign Forms 1, 2 and 3.
5. Which certificate marks the legal *start* of construction, and which marks lawful *occupation*?
6. What is the maximum percentage a promoter may take before a registered Agreement for Sale?
7. Name three drivers of value for commercial office space that don't apply to residential.
8. In a resale transaction, does GST apply?
9. Why is a title certificate more important in secondary than primary market?
10. Give one reason the brand name on a hoarding may not be the promoter's legal name.

Answers

1. Yes — s.2(zk) is deliberately wide and can make the landowner a co-promoter, jointly liable.
2. Broker/agent is a **legal category** under s.2(zm) requiring registration. Channel partner is an **industry arrangement** (empanelment with a developer) and carries no separate legal status — a channel partner still needs agent registration.
3. No — s.2(d) expressly excludes a person given premises on rent.
4. Architect (Form 1), Structural Engineer (Form 2), Chartered Accountant (Form 3).
5. Commencement Certificate (CC) starts construction; Occupancy Certificate (OC) permits occupation.
6. 10% — s.13(1).
7. Corporate leasing demand, rent per sq ft / cap rates, grade and floor-plate efficiency, tenant credit quality (any three).
8. No — GST applies only to under-construction sale by a promoter; resale of a completed unit is a transfer of immovable property and outside GST.
9. Because in resale you inherit the entire prior chain of title; any defect anywhere in that chain travels to your buyer.
10. Projects are commonly built in SPVs or joint ventures for finance and risk-ring-fencing reasons.

10. Interview questions

- "Walk me through what happens between a developer buying land and a buyer getting keys."
- "Who is a promoter under RERA, and why is that broader than 'the builder'?"
- "What's the difference between primary and secondary market from a risk point of view?"
- "A client asks whether to buy under-construction or ready. What are you weighing?"
- "What is a JDA and why does it complicate the question of who's liable?"

11. Key terms

Allottee · Promoter · Real estate agent · Channel partner · JDA · SPV · Primary / secondary market · FSI · TDR · IOD · CC · OC · PMC · QPR · Carpet area · Redevelopment · Micro-market · Unsold inventory · Quarters-to-sell · Title certificate

12. One-page revision sheet

Real estate = land + attachments + a bundle of legal rights. The rights are the asset.

Promoter (s.2zk) is wider than developer — includes JDA landowners. **Agent (s.2zm)** = negotiates for a fee. **Allottee (s.2d)** = buyer, incl. subsequent purchaser, excl. tenant.

Lifecycle: Land → Planning → Approvals → Development → Construction → Marketing → Sales → Agreement → Registration → Possession.

Two hard rules to never forget: ⚖️ s.3 — no advertising/marketing/booking/selling before project registration. ⚖️ s.13(1) — no more than 10% before a **registered** Agreement for Sale.

Three certificates: IOD (permission to build to a stage) → **CC** (start) → **OC** (occupy). **Three forms:** 1 Architect · 2 Engineer · 3 CA.

Brand ≠ legal entity. Always check who the promoter actually is.

The RERA Act, 2016

Official syllabus: MATP Module 2 — 2.1 Preamble, Purpose and Objectives · 2.2 Sections of the Act · 2.3 Key Components. **Exam weight:** ● **Very high.** This and Module 5 carry the most marks. **Time:** 6–8 hours. Do not rush this module.

1. What I need to learn

Not the whole Act. **Roughly 25 sections** carry almost all the exam value and all the day-to-day agent value. This module gives you those, in the order that makes them make sense.

The mental model: the Act does four things.

1. **Forces disclosure** (register the project, publish the details).
2. **Controls the money** (70% in a separate account, 10% cap before agreement).
3. **Fixes accountability** (promoter duties, agent duties, allottee duties).
4. **Gives a fast remedy** (a regulator and a tribunal instead of civil courts).

Everything else is machinery.

2. Simple explanation

2.1 Pre-RERA: why this law exists

Before 2016, an Indian homebuyer's position was roughly this:

- The builder wrote the agreement. It was one-sided, often unregistered, and the buyer signed it because the alternative was not buying.
- **Area was sold in "super built-up"** — a number the builder defined. Two flats sold as "1,000 sq ft" could differ by 200 sq ft of actual usable space.
- Money from Project A funded land for Project B. When B failed, A stalled. Buyers paying EMIs on a flat that did not exist.
- Delay had no price. The agreement gave the builder 6 months' grace, then 12 more, then "force majeure".
- The remedy was a civil suit or a consumer forum. Both took years.
- Brokers were entirely unregulated.

RERA is a direct answer to each of those. When you're studying a section, ask "*which pre-RERA abuse is this killing?*" — that's usually the fastest way to remember it.

2.2 Preamble, purpose and objectives (syllabus 2.1)

The Act's own preamble says it is to establish the Authority for **regulation and promotion** of the sector, to ensure **sale of plot/apartment/building in an efficient and transparent manner**, to **protect the interest of consumers**, to establish an **adjudicating mechanism for speedy dispute redressal**, and to establish an **Appellate Tribunal**.

Note the ordering — regulation *and* promotion. RERA is not purely a consumer statute; it is also meant to bring institutional capital into a sector that was too opaque to invest in.

Statutory milestones:

DATE	EVENT
10 & 15 March 2016	Passed by Rajya Sabha and Lok Sabha
25 March 2016	Received assent — Act No. 16 of 2016
1 May 2016	61 of 92 sections brought into force
1 May 2017	Remaining sections in force; projects had to register

2.3 Structure of the Act (syllabus 2.2)

CHAPTER	SECTIONS	SUBJECT
I	1–2	Preliminary and definitions
II	3–10	Registration of projects and agents
III	11–18	Functions and duties of promoter
IV	19	Rights and duties of allottees
V	20–40	The Real Estate Regulatory Authority
VI	41–42	Central Advisory Council
VII	43–58	Appellate Tribunal
VIII	59–72	Offences, penalties and adjudication
IX	73–78	Finance, accounts, audit
X	79–92	Miscellaneous (incl. s.79 bar on civil courts)

2.4 Key components (syllabus 2.3) — the six that matter

① **Project registration (s.3)**. No advertising, marketing, booking, selling or offering for sale without registration, in any planning area, for projects above the threshold. The **threshold** (s.3(2)(a)): land **over 500 sq m or more than 8 apartments**, inclusive of all phases. Also exempt: projects where completion certificate was obtained before commencement of the Act, and renovation/repair not involving marketing or new allotment. 👉 **Each phase is a standalone project** and registers separately.

② **The 70% rule (s.4(2)(I)(D))**. Seventy per cent of amounts realised from allottees goes into a **separate account in a scheduled bank**, to cover land and construction cost only, withdrawn in proportion to completion and certified by Architect, Engineer and CA. This is the single provision that killed cross-project fund diversion.

③ **The 10% rule (s.13(1))**. A promoter shall **not accept more than 10%** of the cost of the apartment/plot/building as an advance or application fee **without first entering into a written Agreement for Sale and registering it**.

④ **Carpet area (s.2(k))**. The **net usable floor area** of an apartment, **excluding** external walls, service shafts, exclusive balcony/verandah and exclusive open terrace, but **including** internal partition walls. Sale must be on carpet area. This ended super-built-up selling.

⑤ **Interest is symmetrical (s.18, s.19(7))**. If the promoter delays, they pay interest to the allottee; if the allottee delays payment, they pay interest to the promoter — **at the same rate** prescribed by state rules. This symmetry is a favourite exam point.

⑥ **Defect liability — 5 years (s.14(3))**. Any structural defect or defect in workmanship, quality or provision of services brought to the promoter's notice **within 5 years of possession** must be rectified **within 30 days** without further charge; failing which, the allottee is entitled to compensation.

3. 🟠 RERA Sections Every Real Estate Agent Should Know

This is the table to learn. If you memorise one thing in this course, make it this.

SECTION	TOPIC	SIMPLE MEANING	WHY AN AGENT NEEDS IT	EXAM IMPORTANCE
2(d)	Allottee	Buyer of plot/apartment, incl. subsequent purchaser; excludes tenant	Defines who your client legally is	🟠 High
2(k)	Carpet area	Net usable floor area; excl. external walls/shafts/balcony/terrace, incl. internal partitions	You must quote carpet, never super built-up	🟠 Very high
2(zk)	Promoter	Builder, development authority, JDA landowner	Tells your client who is liable	🟠 High
2(zm)	Real estate agent	Negotiates/acts for another in transfer, for fee	Your own legal definition	🟠 Very high
2(zn)	Real estate project	Development of building/apartments/plots for sale	What triggers registration	🟡 Medium

SECTION	TOPIC	SIMPLE MEANING	WHY AN AGENT NEEDS IT	EXAM IMPORTANCE
3	Prior registration of project	No advertising/marketing/booking/selling without registration. Threshold: >500 sq m or >8 apartments	You cannot market an unregistered project — s.10 forbids it	● Very high
4	Application for registration	What the promoter must disclose + 70% separate account	Everything you verify in due diligence comes from here	● Very high
5	Grant of registration	Authority grants/rejects within 30 days; deemed registration if silent	Explains "registration in process" claims	● Medium
6	Extension	Extension for force majeure; ordinarily up to 1 year	Repeated extensions are a red flag	● High
7	Revocation	Authority may revoke for default/unfair practice/violation	What happens to buyers in a revoked project	● Medium
8	Consequences of lapse/revocation	Authority may allow association of allottees to complete	The buyer's fallback	● Lower
9	Registration of agents	No agent shall facilitate sale in a registered project without registration	This is your licence	● Very high
10	Functions of agents	Don't facilitate unregistered projects; maintain books; don't make false statements; assist allottee to obtain documents	Your job description in law	● Very high
11	Functions & duties of promoter	Website disclosures, QPR, sanctioned plans, association formation, conveyance	What you check on the portal	● High
12	Veracity of advertisement	If allottee relied on a false advert and paid, they may withdraw with full refund + interest	You often <i>are</i> the channel for the advert	● Very high
13	Agreement for sale	10% cap before registered AFS	The most commonly broken rule in practice	● Very high
14	Adherence to sanctioned plans	No change without consent; 2/3rds of allottees for other alterations; 5-year defect liability	Post-possession complaints	● High
15	Transfer of project to third party	Needs 2/3rds allottees + Authority approval	Who is liable after a takeover	● Lower
16	Insurance	Promoter to insure title and construction	● Lower	● Lower
17	Transfer of title / conveyance	Conveyance to association within specified period	Deemed conveyance disputes	● Medium
18	Return of amount and compensation	Failure to complete/give possession → refund with interest + compensation, or interest for every month of delay if allottee stays	The buyer's main weapon	● Very high
19	Rights & duties of allottee	Right to information, possession, refund; duty to pay, take possession within 2 months of OC , join the association	Your client's obligations too	● Very high
31	Filing complaints	Any aggrieved person may complain to the Authority or Adjudicating Officer	How your client gets relief	● High
34	Functions of the Authority	Register & regulate, maintain the website database, redress	What MahaRERA is <i>for</i>	● Medium
40	Recovery	Dues recoverable as arrears of land revenue	Why RERA orders have teeth	● Medium
43(5)	Appeal	Appeal to Appellate Tribunal within 60 days ; promoter must pre-deposit ≥30% of penalty/amount	The next step after an order	● High
59	Non-registration penalty (promoter)	Up to 10% of estimated project cost; continued violation → imprisonment up to 3 years and/or further fine up to 10%	Why registration is not optional	● High
61	Contravention of other provisions	Up to 5% of estimated project cost	General promoter penalty	● Medium
62	Penalty on agents (s.9/s.10)	₹10,000 per day of default, cumulatively up to 5% of the cost of the plot/apartment/building	Your personal exposure	● Very high

SECTION	TOPIC	SIMPLE MEANING	WHY AN AGENT NEEDS IT	EXAM IMPORTANCE
65	Agent disobeying Authority order	Daily penalty up to 5% of estimated cost	● Medium	● Medium
66	Agent disobeying Tribunal order	Imprisonment up to 1 year and/or fine up to 10%	● High	● High
69	Offences by companies	Persons in charge are deemed guilty	Relevant for non-individual agents	● Medium
71	Power to adjudicate	Adjudicating Officer decides compensation under s.12, 14, 18, 19	Compensation vs interest split	● High
79	Bar of jurisdiction	Civil courts barred from RERA matters	Why the forum question matters	● Medium

⚠ **Verify against the bare Act.** This table is a study aid. Before you quote a section number in an exam answer or to a client, read the section itself in the India Code PDF below.

4. 📖 Mandatory reading 🏛️

① **RERA Act, 2016 — India Code (primary source)** 🔗 <https://www.indiacode.nic.in/bitstream/123456789/2158/1/A201616.pdf> Landing page: <https://www.indiacode.nic.in/handle/123456789/2158> **Read, in this order:**

- s.2 — definitions (d), (k), (zk), (zm), (zn)
- s.3–10 — registration of projects **and agents**
- s.11–18 — promoter duties
- s.19 — allottee rights and duties
- s.31, 34, 40 — complaints, Authority functions, recovery
- s.43 — appeals
- s.59–72 — offences and penalties, especially **62, 65, 66, 69, 71**

Why: these are the sections an agent is examined on and answerable under. The rest of the Act (Chapters VI, IX, most of V and VII) is institutional machinery — read once, don't memorise.

② **Maharashtra RERA Rules, 2017** — the state layer 🔗

<https://naredco.in/notification/pdfs/RERA%20Final%20English%20Registration%20Rules21042017.pdf> (alternate text version: **IBC Laws**) **Full title:** *Maharashtra Real Estate (Regulation and Development) (Registration of real estate projects, Registration of real estate agents, rates of interest and disclosures on website) Rules, 2017.* **Read:** the **agent registration rules and fees**, the **rate of interest** rule, and **Rule 10 + Annexure A** (the model form of Agreement for Sale). **Why:** the Act sets the principle; **these Rules set the number** — your fee, your validity, the interest rate, the model agreement. Exam questions about amounts come from here, not the Act.

③ **MoHUA — RERA page** 🔗 <https://www.mohua.gov.in/cms/real-estate-regulation-and-development-act-2016.php> **Why:** central ministry framing and links to the Act and model rules.

5. 🎥 Mandatory videos ▶️

Watch in this order — 1 and 2 before you open the Act, 3 and 4 after.

ORDER	VIDEO	CHANNEL	COVERS		
1	[RERA Act 2016 Explained \	Introduction to Real Estate Regulation Act \	RERA for Beginners] (https://www.youtube.com/watch?v=g7pFvfazVWY)	RERA educational channel	Why the Act exists; overall shape. Best single starting video.

ORDER	VIDEO	CHANNEL	COVERS	
2	[When is RERA Registration Compulsory? \	Section 3 RERA Act 2016 Explained] (https://www.youtube.com/watch?v=TrtFW39NDBk)	RERA educational channel	s.3 in depth — the 500 sq m / 8 apartment threshold and the exemptions.
3	[RERA 2016 — Episode 3 \	Registration of Real Estate Project] (https://www.youtube.com/watch?v=qaDlz-G-xgA)	RERA lecture series	s.4–8: the application, the 70% account, extension and revocation.
4	Webinar: Registration of Project and Agent Under RERA Act 2016	Professional webinar	Practitioner-level treatment of both registration streams together.	
5 ●	Understanding RERA Act — full playlist	Lecture series	Section-by-section depth if you want more after the four above.	

6. Deep reading ●

Impact of Real Estate Regulatory Authority (RERA) Act 2016 — ResearchGate

https://www.researchgate.net/publication/369038845_Impact_of_Real_Estate_Regulatory_Authority_RERA_Act_2016 **Read:** the findings/discussion section. **Why it matters:** gives you the *before-and-after* evidence — the consolidation of developers, the launch slowdown, the compliance cost. Useful for interview answers about what RERA changed.

A Critical Study on the Effects of RERA Regulations on India's Real Estate Industry

https://www.researchgate.net/publication/387717498_A_Critical_Study_on_the_Effects_of_RERA_Regulations_on_India's_Real_Estate_Industry **Read:** the limitations/criticism section specifically. **Why:** a good agent can name what RERA *doesn't* fix — inconsistent state implementation, execution delays at authorities, projects that pre-date the Act. Balanced knowledge reads as expertise.

 These are academic papers of varying rigour, not government sources. Read them for *perspective*, never as authority on what the law says. For that, always the bare Act.

7. Practical exercise

Build your own section map (90 minutes).

Open the India Code PDF. For each of these ten sections — **3, 4, 9, 10, 12, 13, 14, 18, 19, 62** — write on one line, in your own words:

"Section __ says _____. If it's broken, _____ happens."

Then, for each, answer: **does this section create a duty for the promoter, the agent, or the allottee?**

You'll find s.9, 10 and 62 all point at you. That's the point of the exercise.

8. Case study

The pre-launch that wasn't.

A developer offers you 2% brokerage — double the market rate — to bring buyers into a "pre-launch" at ₹18,500/sq ft, against a post-launch price of ₹21,000. Booking amount is ₹5 lakh on a ₹2.4 crore flat. The developer says RERA registration is "filed, number expected in three weeks." There is an allotment letter, no Agreement for Sale.

Work through it:

1. Is marketing this project lawful right now?

2. Which sections are being contravened, and by whom?
3. Is the ₹5 lakh booking within or outside the 10% rule?
4. What is *your* exposure if you introduce a buyer?
5. What would you tell the buyer if they insist the discount is worth it?

Analysis

1. **No.** s.3 bars advertising, marketing, booking, selling or offering for sale before registration. "Filed" is not "registered". s.5 gives the Authority 30 days, and deemed registration only arises if the Authority fails to act — you cannot market on the assumption.
2. The **promoter** contravenes **s.3** (penalty under **s.59** — up to 10% of estimated project cost). **You** contravene **s.10(a)** the moment you facilitate a sale in an unregistered project.
3. ₹5 lakh on ₹2.4 crore is ~2.08% — **within** the 10% cap, so s.13 is not breached by amount. But s.13 is not the live problem here; s.3 is. A booking in an unregistered project is unlawful regardless of how small the cheque is.
4. **s.62**: ₹10,000 **per day** for as long as the default continues, cumulatively up to **5%** of the cost of the apartment — on a ₹2.4 crore flat that ceiling is ₹12 lakh. Plus your registration is at risk. The 1% extra brokerage is ₹2.4 lakh. The maths is not close.
5. Tell them plainly: until the registration number exists, they have **no** registered project, no model agreement, no separate bank account protection and no MahaRERA forum — if it goes wrong. The discount is compensation for exactly that risk. Advise waiting for the number — and if the developer's pricing is real, it will still be there.

The professional point: "pre-launch" is the most common way agents lose their registration. The economics always look good and the legal position is never defensible.

9. Quiz — 10 questions

1. What is the registration threshold under s.3(2)(a)?
2. What percentage goes into the separate account, and which three professionals certify withdrawals?
3. Maximum amount a promoter may take before a registered Agreement for Sale?
4. Define carpet area under s.2(k). What is *excluded*?
5. What is the defect liability period and the rectification window?
6. Under s.12, what is the remedy if an allottee relied on a false advertisement?
7. What is the penalty on an agent under s.62 — rate and ceiling?
8. Within how many days must an appeal be filed to the Appellate Tribunal, and what must a promoter deposit?
9. What proportion of allottees must consent to alterations in sanctioned plans beyond minor additions?
10. Which section bars civil courts from entertaining RERA matters?

Answers

1. Land **exceeding 500 sq m or more than 8 apartments**, inclusive of all phases. Below both, no registration required.
2. **70%**, into a separate scheduled-bank account; certified by **Architect (Form 1), Engineer (Form 2), Chartered Accountant (Form 3)**.
3. **10%** of the cost — s.13(1).
4. Net usable floor area. **Excludes** external walls, service shafts, exclusive balcony/verandah, exclusive open terrace. **Includes** internal partition walls.
5. **5 years** from date of possession; rectify within **30 days** — s.14(3).
6. Allottee may **withdraw from the project** and get a **full refund with interest**, plus compensation — s.12.
7. **₹10,000 per day** of continuing default, cumulatively up to **5% of the cost** of the plot/apartment/building.
8. **60 days** — s.43(5); promoter must pre-deposit **at least 30%** of the penalty or the amount payable.
9. **Two-thirds** of allottees — s.14(2).
10. **Section 79**.

10. Interview questions

- "What problem was RERA actually solving? Give me three specific pre-2016 practices it ended."
 - "A client says the builder is offering a 'pre-launch' rate. What do you say?"
 - "Explain the 70% rule to me as if I were a buyer."
 - "Interest under RERA runs both ways. Explain."
 - "What's the difference between what the Authority awards and what the Adjudicating Officer awards?"
 - "Name three things RERA still doesn't fix."
-

11. Key terms

Act No. 16 of 2016 · Planning area · Separate account (70%) · Carpet area · Agreement for Sale · Deemed registration · Force majeure extension · Revocation · Defect liability · Adjudicating Officer · Appellate Tribunal · Arrears of land revenue · Compounding · Bar of jurisdiction

12. One-page revision sheet

Act 16 of 2016. Assent 25 Mar 2016 · 61 sections live 1 May 2016 · fully live 1 May 2017.

The four jobs: disclose · control the money · fix accountability · fast remedy.

Numbers to know cold: • **500 sq m / 8 apartments** — registration threshold (s.3) • **70%** — separate account (s.4) • **10%** — cap before registered AFS (s.13) • **5 years / 30 days** — defect liability (s.14) • **2 months** — allottee must take possession after OC (s.19) • **2/3rds** — allottee consent for plan alterations (s.14) and project transfer (s.15) • **60 days / 30%** — appeal window and promoter pre-deposit (s.43) • **₹10,000 per day, 5% ceiling** — agent penalty (s.62) • **10%** — promoter penalty for non-registration (s.59)

Your three sections: **9** (register), **10** (conduct), **62** (penalty).

Chapters: II registration · III promoter · IV allottee · V Authority · VII Tribunal · VIII penalties.

Official syllabus: MATP Module 3 — 3.1 Key Pillars of MahaRERA. **Exam weight:** ● **Very high.** Your exam is a *Maharashtra* exam.
Time: 4–5 hours.

1. What I need to learn

The distinction that trips up half of all candidates, then the institution itself, then the living body of orders and circulars that changes what you must actually do this year.

2. Simple explanation

2.1 RERA vs MahaRERA — get this right permanently

	RERA	MAHARERA
What it is	A central Act of Parliament — Act 16 of 2016	The regulatory authority for Maharashtra , constituted under that Act
Made by	Parliament of India	Government of Maharashtra (s.20)
Applies	All India	Maharashtra only
Changes how	Amendment by Parliament	Orders, circulars, regulations by the Authority; Rules by the State Government
You'd cite it as	"Section 13 of the Act"	"MahaRERA Order No. 46C/2025"

Say it once, correctly: *RERA is the law. MahaRERA is the regulator that enforces the law in Maharashtra.* There is no such thing as "the MahaRERA Act". If you write that in the exam, you lose the mark.

The three-layer stack you are actually governed by:

LAYER 1 RERA Act, 2016 (Parliament) — the principles
 LAYER 2 Maharashtra RERA Rules, 2017 (State Govt) — the numbers: fees, interest, forms
 LAYER 3 MahaRERA Regulations / Orders / Circulars — the current operating rules

Layer 3 changes several times a year. **This is the layer where agents get caught out**, because they learned the rules once in 2019 and never re-read.

2.2 Key pillars of MahaRERA (syllabus 3.1)

Pillar 1 — Registration. Projects (s.3–5) and agents (s.9). Everything begins here: nothing gets a legal existence in Maharashtra real estate marketing until it has a MahaRERA number.

Pillar 2 — Disclosure. A public, searchable web database (s.34(b)). Project details, promoter details, approvals, sanctioned plans, quarterly progress, litigation. This is the pillar you'll use every working day — Module 4 is entirely about it.

Pillar 3 — Compliance monitoring. Quarterly Progress Reports, the separate-account regime, Forms 1/2/3, advertising norms, agent certification. MahaRERA has moved steadily from a registration body to a **monitoring** body.

Pillar 4 — Dispute resolution. Three routes with different characters: **Conciliation** (voluntary, fast, no adjudication) → **Complaint to the Authority** (s.31) → **Adjudicating Officer** (s.71, compensation only) → **Appeal to the Appellate Tribunal** (s.43, 60 days) → High Court (s.58, question of law).

Pillar 5 — Enforcement. Orders, penalties, recovery as **arrears of land revenue** (s.40), project **de-registration**, and suspension/revocation of agent registration.

2.3 Powers and functions of the Authority

Drawn from ss.34–38:

- **s.34** — register and regulate projects and agents; maintain the website database; ensure compliance.
- **s.35** — call for information and conduct investigations; **powers of a civil court** in respect of summoning, discovery, evidence.
- **s.36** — issue **interim orders** during an inquiry.
- **s.37** — issue **directions** binding on promoters, agents and allottees.
- **s.38** — impose penalty or interest; regulate its own procedure.
- **s.40** — **recover** dues as arrears of land revenue.

The practical meaning for you: MahaRERA can summon you, can order you, and can recover money from you through the revenue machinery. It is not a grievance desk.

2.4 How MahaRERA regulates *agents* specifically

Four levers, all of which are examinable:

1. **Registration** (s.9 + Maharashtra Rules) — mandatory, 5-year validity.
2. **Competency certification** — MahaRERA made training + a certification exam a condition of new registration and renewal. This is the reason your MATP course exists.
3. **Advertising discipline** — the registration number, website address and **QR code** must appear in agents' advertisements to prescribed standards.
4. **Penalty and revocation** — s.62, s.65, s.66, plus suspension/revocation of registration.

2.5 How MahaRERA regulates *promoters*

Registration and disclosure under ss.3–5; **QPR** filing on a financial-quarter cycle; the **three-bank-account** structure; model **allotment letter** and **agreement for sale** proformas; advertising norms; and de-registration of stalled projects.

3. MahaRERA Must-Know Documents

These are the Layer-2 and Layer-3 documents an agent is expected to know exists and be able to find.

 **All of Layer 3 is time-sensitive.** Order numbers and their contents get superseded. Before relying on any single order, check the live index: <https://maharera.maharashtra.gov.in/order> and <https://maharera.maharashtra.gov.in/circular>

DOCUMENT	DATE	OFFICIAL LINK	WHAT IT COVERS	WHY YOU MUST READ IT
RERA Act, 2016	25 Mar 2016	India Code PDF	The parent Act	Every answer traces back here
Maharashtra RERA Rules, 2017	Apr 2017	PDF (NAREDCO-hosted) · text	Agent & project registration, fees, rate of interest, Rule 10 + Annexure A model agreement	Your fee, your validity, the model agreement — all here
Guidelines for Real Estate Agent Training & Certification	2023	MahaRERA PDF	Training areas, exam pattern, certificate of competency	This is the syllabus your exam is built on
Order on separate bank accounts (3-account structure) — No. MahaRERA/Secy/129/2024	2024	MahaRERA PDF	Collection / Separate (70%) / Transaction accounts	How the 70% rule is actually operated now
Order No. 46C/2025 — QR code, font size, website address in advertisements	8 Apr 2025	MahaRERA PDF	Placement, size and scannability of QR + registration number in ads	Binds agents directly. Penalty ₹10,000–₹50,000 per violation
Order No. 56/2024	2024	MahaRERA PDF	(Check current text at source)	Part of the 2024 compliance tightening

🔴 Essential	MahaRERA Tutorials — playlist	MahaRERA tutorials	Portal and process walkthroughs. Pairs with Module 4.
🟡 Important	MahaRERA Real Estate Agent Registration + Mandatory Training Explained	Real estate education	Registration and the certification mandate together, current framing.
🟢 Deep dive	MahaRERA Training & Certification Program Webinar	SIILC	Longer webinar treatment of the certification regime.

6. 📖 Deep reading 📄

Trilegal — MahaRERA issues directions for maintaining separate bank accounts 🔗 https://trilegal.com/knowledge_repository/trilegal-update-maharera-issues-directions-for-maintaining-separate-bank-accounts-for-real-estate-projects/ **Read:** the whole update — it's short. **Why:** a top-tier law firm's reading of the three-account order. Shows you how practitioners translate a MahaRERA order into operational advice.

Desai & Diwanji — Transparency First: MahaRERA Enforces Stricter Rules for Real Estate Advertising 🔗

<https://desaidiwanji.com/insights/articles/transparency-first-maharera-enforces-stricter-rules-for-real-estate-advertising> **Read:** all of it, then re-read the compliance checklist portion. **Why:** this is Order 46C/2025 explained for people who have to comply with it — i.e. you.

7. Practical exercise 🛠️

The regulatory currency audit (45 minutes).

1. Open <https://maharera.maharashtra.gov.in/order> and <https://maharera.maharashtra.gov.in/circular>
2. List **every order and circular issued in the last 12 months**.
3. For each, write one line: *does this affect promoters, agents, or allottees?*
4. Star the ones that affect **agents**.
5. Put a recurring reminder in your calendar to repeat this **every quarter**.

This is not busywork — it is the single habit that separates a compliant agent from one who is operating on 2019 rules.

8. Case study

The stale advertisement.

You've been running a hoarding and an Instagram campaign for a Thane project for eight months. The creative shows the project name, your phone number in large type, and the MahaRERA project registration number in small text at the bottom. There is no QR code and your own agent registration number does not appear.

Questions:

1. Which order governs this, and what does it require?
2. What is the exposure per violation?
3. Is "the developer designed the creative" a defence?
4. What do you change, today?

Analysis

1. **Order No. 46C/2025 (8 April 2025).** It requires that the MahaRERA registration number and the website address be displayed in a font **equal to or larger than the largest font used for contact details/address**, that the registration number, website address and **QR code** be placed in the **top-right corner**, and that the QR code be scannable with correct aspect ratio.
2. **₹10,000 to ₹50,000 per violation**, and failure to correct within **10 days** is treated as a **continuing offence** with further action under the Act.
3. **No.** The order binds *promoters and registered real estate agents*. If the advertisement is yours — your number, your leads — it is your compliance obligation. Practically: never run a developer's creative without checking it against the order yourself.
4. Rebuild the creative: QR + registration number + website in the top-right, font sized against your own contact details, your agent registration number displayed, and re-check every live asset — hoardings, portals, social, WhatsApp forwards, brochures.

The point: your phone number being the biggest thing on the ad is exactly what the order targets. Advertising compliance is the most common and most easily avoided agent penalty.

9. Quiz — 10 questions

1. Is MahaRERA created by a Maharashtra Act? Explain.
2. Name the three layers of the regulatory stack and who makes each.
3. Which section gives the Authority civil-court powers of summoning and discovery?
4. Under which section are MahaRERA dues recovered, and by what mechanism?
5. Name the five pillars of MahaRERA.
6. What does Order 46C/2025 require, and what is the penalty range?
7. Name the three bank accounts a promoter must now maintain.
8. Which document is effectively the blueprint for your certification exam?
9. What is the appeal route above the Authority, and the time limit?
10. Where would you check whether a MahaRERA rule you learned two years ago is still current?

Answers

1. **No.** MahaRERA is constituted by the **Government of Maharashtra under s.20 of the central RERA Act, 2016**. There is no separate "MahaRERA Act".
2. Layer 1 **RERA Act 2016** (Parliament) · Layer 2 **Maharashtra RERA Rules 2017** (State Government) · Layer 3 **Regulations/Orders/Circulars** (MahaRERA itself).
3. **Section 35**.
4. **Section 40** — recoverable as **arrears of land revenue**.
5. Registration · Disclosure · Compliance monitoring · Dispute resolution · Enforcement.
6. QR code, MahaRERA registration number and website address in the **top-right** of all advertisements, registration number/website in a font ≥ **the largest font used for contact details**, QR scannable. Penalty **₹10,000–₹50,000 per violation**; uncorrected after **10 days** = continuing offence.
7. **Collection** account (all receipts) · **Separate** account (70%) · **Transaction** account (up to 30%).
8. The **Guidelines for Real Estate Agent Training and Certification** ([120.pdf](#)).
9. **Real Estate Appellate Tribunal**, within **60 days** (s.43(5)); promoter pre-deposits ≥30%.
10. The live **/order** and **/circular** indexes on the MahaRERA site.

10. Interview questions

- "What's the difference between RERA and MahaRERA?" (If you get only one question, it's this one.)
- "Where do agent fees come from — the Act or the Rules?"
- "How does MahaRERA actually enforce an order? What happens if a promoter just ignores it?"
- "What changed for agents in the last year?"
- "Walk me through the dispute resolution ladder from conciliation to High Court."

11. Key terms

Section 20 · Regulations vs Rules vs Orders vs Circulars · Web database (s.34(b)) · Conciliation Forum · Adjudicating Officer · Appellate Tribunal · Arrears of land revenue · De-registration · Certificate of Competency · QR code order · Collection / Separate / Transaction accounts

12. One-page revision sheet

RERA = the Act (Parliament). MahaRERA = the regulator (Maharashtra, under s.20). There is no "MahaRERA Act."

Stack: Act 2016 → Maharashtra Rules 2017 → MahaRERA Orders/Circulars. Layer 3 changes constantly.

Five pillars: Registration · Disclosure · Compliance monitoring · Dispute resolution · Enforcement.

Powers: s.34 functions · s.35 civil-court powers · s.36 interim orders · s.37 directions · s.38 penalties · s.40 recovery as arrears of land revenue.

Ladder: Conciliation → Authority (s.31) → Adjudicating Officer (s.71, compensation) → Appellate Tribunal (s.43, **60 days**, promoter pre-deposits **30%**) → High Court (s.58).

Live for agents: Order **46C/2025** (QR + font, **₹10k–₹50k/violation**, 10-day cure) · 3-bank-account order · training & certification guidelines ([120.pdf](#)).

Habit: audit /order and /circular **every quarter**.

The MahaRERA Portal

Official syllabus: MATP Module 4 — 4.1 Virtual Tour of the Portal · 4.1.1 MahaRERA Menu Bar and Sub Menus. **Exam weight:** ● High — and this is the module with the highest *job* value of all thirteen. **Time:** 3 hours reading + one 30-minute live investigation. **Do the live one.**

1. What I need to learn

How to take a project name and, in thirty minutes, know more about it than the salesperson selling it.

This is the skill that makes you worth your brokerage. Any agent can show a flat. An agent who can open the portal in front of a client and read the disclosures out loud is a different professional entirely.

2. Simple explanation — the two portals

Maharashtra runs **two** systems and confusing them wastes time:

	INFORMATION PORTAL	APPLICATION PORTAL
URL	https://maharera.maharashtra.gov.in/	https://maharera.mahaonline.gov.in/
Purpose	Public information: search projects/agents, orders, circulars, guidance	Transactions: register as agent, file applications, QPR, complaints
You use it for	Due diligence	Your own registration and filings

Rule of thumb: **read** on maharera.maharashtra.gov.in, **do** on maharera.mahaonline.gov.in.

2.1 The menu bar (syllabus 4.1.1)

The public site's navigation clusters into five useful groups:

- **Registration** — project registration, agent registration, guidance pages, how-to-apply.
- **Search / Public Database** — registered projects, registered agents, de-registered and

lapsed projects, complaints.

- **Legal** — the Act, Rules, Regulations, **Orders** and **Circulars**, Orders/Judgments.
- **Dispute resolution** — make a complaint, conciliation, list of conciliators, guidance pages.
- **Resources** — homebuyer resources, user manuals, video gallery, FAQs.

3. ● The 30-Minute MahaRERA Project Investigation

Work these fifteen steps in order. Keep a notepad open. By step 15 you'll have a defensible view.

Step 1 — Search the project (2 min)

Where to click → Public site → search registered projects. Search by **project name**, **MahaRERA registration number**, or **promoter name**. If you have a hoarding, scan the **QR code**. **What to look for** → An exact match, and the correct one. Common project names repeat across the state. **What good looks like** → One clear record, with a registration number in the standard format, in the district and taluka you expected. 🚩 **Red flag** → No record at all; or several near-identical names by different promoters; or the project is only findable under a name the salesperson never mentioned. **Ask the developer** → "Give me the exact MahaRERA registration number and the registered project name."

Step 2 — Verify registration status and validity (2 min)

Where to click → The project record header. **What to look for** → Registration number, **status** (registered / lapsed / de-registered / extended), and the **proposed completion date**. **What good looks like** → Status active, completion date in the future with realistic headroom. 🚩 **Red flag** → **Lapsed** or **de-registered**; or a completion date already past. A lapsed registration means the promoter may not legally market the project. **Ask** → "Is the registration currently valid, and has it ever lapsed or been extended?"

Step 3 — Check the promoter (3 min)

Where to click → Promoter details tab. **What to look for** → Legal entity name, type (individual / partnership / LLP / company), PAN-level identity, address, and the **list of the promoter's other registered projects**. **What good looks like** → A promoter with several past projects that **reached completion**, and whose brand name and legal name are reconcilable. 🚩 **Red flag** → Brand-new SPV with no track record; or a promoter whose other projects show lapsed registrations, repeated extensions or a pile of complaints. **Ask** → "Which entity is the promoter, and can you list your last five completed projects with their registration numbers?"

This step is why Module 1 insisted brand ≠ legal entity. Use the promoter search to see the *portfolio*, not the project in isolation.

Step 4 — Check project status and progress (3 min)

Where to click → Project details → status / progress section. **What to look for** → Declared **percentage completion**, work stage (excavation, plinth, slabs, finishing), and consistency with the completion date. **What good looks like** → Progress consistent with the timeline and with what you can see on site. 🚩 **Red flag** → Progress flat across consecutive quarters; or a project 30% complete with 9 months to the declared completion date. **Ask** → "Show me the last four quarterly progress filings."

Step 5 — Check the completion date and any extensions (2 min)

Where to click → Registration details; extension records. **What to look for** → **Original** proposed completion date vs **current** date, and every extension. **What good looks like** → Original date intact, or a single well-documented extension. 🚩 **Red flag** → Multiple extensions. Under s.6 an extension is ordinarily up to **one year** and for **force majeure**. A pattern of extensions is a pattern of missed promises. **Ask** → "What was the original completion date, how many extensions have you taken, and on what grounds?"

Step 6 — Check land details (3 min)

Where to click → Land details / project details tab. **What to look for** → Survey number / CTS number, total plot area, and the **nature of the promoter's right** — ownership, development agreement, lease. **What good looks like** → Land area matching the sanctioned plan, clean survey identification. 🚩 **Red flag** → The promoter holds only development rights and the **landowner is not a co-promoter**; area mismatches between land details and plans. **Ask** → "Who owns the land, and if it's a JDA, is the landowner a co-promoter on the registration?" **Cross-check** → Take the survey/CTS number to **IGR Maharashtra** for the property card and the registered land document.

Step 7 — Check approvals (3 min)

Where to click → Approvals / documents section. **What to look for** → IOD, Commencement Certificate, layout approval, and NOCs (fire, environment, aviation, water, traffic) — with **dates and issuing authority**. **What good looks like** → CC issued and covering the floors actually being sold. 🚩 **Red flag** → CC absent or covering fewer floors than the tower being sold; approvals described as "applied for"; NOCs missing on a high-rise. **Ask** → "Give me the CC and tell me up to which floor it's valid." **Cross-check** → **MCGM AutoDCR** for Greater Mumbai proposals.

Step 8 — Check sanctioned plans (2 min)

Where to click → Uploaded plans/documents. **What to look for** → Sanctioned floor plans and layout as approved. **What good looks like** → Sanctioned plan matches the brochure — same tower count, same floors, same unit mix. 🚩 **Red flag** → Brochure shows amenities or a tower the sanctioned plan does not. Under **s.14** the promoter must build per the sanctioned plan; alterations beyond minor additions need **2/3rds allottee consent**. **Ask** → "Show me the sanctioned plan for this tower and this floor."

Step 9 — Check building and unit details (2 min)

Where to click → Building details / apartment details. **What to look for** → Number of buildings, floors, **unit mix**, and total units — declared vs marketed. **What good looks like** → The flat being sold to your client exists, on the declared floor, in the declared tower. 🚩 **Red flag** → More units marketed than registered; or a "new tower" that isn't on the registration. **Ask** → "Is this unit within the registered inventory? Show me it in the disclosure."

Step 10 — Check carpet area (2 min)

Where to click → Apartment details — declared **carpet area**. **What to look for** → The RERA carpet area for the specific unit type, in sq m and sq ft. **What good looks like** → The carpet area in the disclosure **matches** the number in the cost sheet and the draft agreement. 🚩 **Red flag** → Salesperson quoting "saleable" or "super built-up"; carpet in the agreement lower than in the disclosure. ⚖️ **Sale must be on carpet area (s.2(k))** — see Module 10 for the maths. **Ask** → "Confirm the RERA carpet area in writing, and show me the same number in the draft agreement."

Step 11 — Check quarterly updates (QPR) (3 min)

Where to click → Quarterly progress / project updates. **What to look for** → Filings for **each of the last four quarters**, physical and financial progress. Financial-quarter cycle: due by the **20th of July, October, January and April**. **What good looks like** → Four consecutive filings, on time, showing real movement. 🚩 **Red flag** → Missing quarters, or filings that repeat identical percentages. A promoter who won't file a form on time is telling you something about how they run a site. **Ask** → "Why is Q__ missing?"

Step 12 — Check litigation and complaints (3 min)

Where to click → Project's litigation disclosure **and** the complaints/orders database at **Orders & Judgments**. **What to look for** → Pending cases disclosed by the promoter, plus complaints filed against this project or this promoter and how they were decided. **What good looks like** → No litigation, or minor disclosed matters unrelated to title or delivery. 🚩 **Red flag** → Title litigation; multiple s.18 delay complaints; adverse orders the promoter hasn't complied with. **Ask** → "List every pending case on this land and this project, and every MahaRERA complaint against you."

Step 13 — Check encumbrances (2 min)

Where to click → Portal's encumbrance disclosure, then **cross-check at IGR**. **What to look for** → Mortgages, charges, or lender security on the land or the project. **What good looks like** → Either no encumbrance, or a construction-finance mortgage the lender will release unit-by-unit (normal and disclosed). 🚩 **Red flag** → Undisclosed mortgage; or a lender charge with no NOC process explained. **Ask** → "Is the land mortgaged? Which lender, and what's the NOC process for my buyer's flat?" **Cross-check** → IGR Maharashtra search / encumbrance certificate.

Step 14 — Check possession position (2 min)

Where to click → Completion status; OC where uploaded. **What to look for** → Whether **Occupancy Certificate** has been obtained (full or part), and the declared possession timeline. **What good looks like** → For a ready flat, a **full OC** covering the specific wing and floor. 🚩 **Red flag** → Possession being offered with **no OC**, or only a part-OC that doesn't cover the unit. **Never let a client take possession of a unit not covered by an OC**. **Ask** → "Show me the OC and confirm it covers this wing and this floor."

Step 15 — Check remaining disclosures (2 min)

Where to click → The rest of the project record. **What to look for** → Proforma **allotment letter**, **agreement for sale** and **conveyance deed** (s.4(2)(g)); parking disclosure; common areas and amenities; the **bank account** details; professional team (architect, engineer, CA); any deviation sheet against the model agreement. **What good looks like** → All three proformas uploaded; the agreement is the Annexure A model form or has a clear deviation sheet with modifications highlighted.  **Red flag** → No proforma agreement uploaded; deviations from the model form that are not highlighted; amenities in the brochure absent from the disclosure. **Ask** → "Send me the uploaded proforma agreement and the deviation sheet."

Closing the loop

After 15 steps, write **five lines**: what the project is, who the promoter is, the biggest risk, the one document you still need, and whether you would put your own client into it.

That five-line note is your product. It is what a client is actually paying you for.

4. Official reading

- **Guidance for Agents** — <https://maharera.maharashtra.gov.in/guidance-for-agents>
- **Guide for Promoters: documents & forms required** — <https://maharera.maharashtra.gov.in/guide-for-promoters-registration>

Read: the full list of documents. *What a promoter must upload = what you get to inspect.* This is the master key to due diligence.

- **Resources for Homebuyers** — <https://maharera.maharashtra.gov.in/resources-homebuyers>

Why: contains model documents and buyer-facing explainers you can send clients directly.

5. Videos

ORDER	VIDEO	WHY
1 	MahaRERA Tutorials — official playlist	Tier-1 tutorials. Start here, always.
2 	Search for MahaRERA registered projects using project id, project name or promoter's name	Exactly Step 1. Short and directly usable.
3 	UPDATED: How to Check Registered Projects on MahaRERA website	A second pass through search with more recent UI.
4 	How to Check De-registered / Stalled Projects on MahaRERA	Covers Step 2's failure modes — de-registration and stalled status.
5 	Complete Guide: How to Upload MahaRERA HPR & Register for FIU	Agent-side filings. Relevant once you're registered.

 Portal UI changes. Where a video's screens don't match the live site, **trust the live site** and the official tutorials over any third-party video.

6. Practical exercise

Do the real thing (30 minutes, then 30 more).

1. Pick a **live under-construction project in Mumbai or Thane** you can see advertised.
2. Run all 15 steps. Write your findings as you go.
3. Write the five-line closing note.
4. Then repeat on a **second project by the same promoter** — and compare. Portfolio behaviour tells you more than any single project record.

Deliverable: two one-page investigation notes. Keep them; they're your first work samples.

7. Case study

Two towers, one registration.

You investigate a Thane project. Steps 1–5 look clean: registered, active, completion date 18 months out. At Step 7 the CC **covers up to the 22nd floor**. At Step 9 the disclosure lists **two towers, A and B**. The brochure shows **three towers** and your client is being sold a **34th-floor** flat in **Tower C**.

Questions: What has gone wrong? Which sections bite? What do you tell the client?

Analysis

Two separate problems, and both are serious.

Problem 1 — Tower C. If Tower C isn't in the registration, then either it is a separate phase that must be **separately registered** (each phase is a standalone project under the Act), or it isn't approved at all. Marketing it engages **s.3**, and *your* facilitating it engages **s.10(a)** with penalty under **s.62**.

Problem 2 — the 34th floor. The CC covers 22 floors. Floors above a CC's coverage are not sanctioned for construction. Selling a 34th-floor flat against a 22-floor CC means selling something that has no present legal permission to exist. Developers do routinely obtain CC in stages and extend it — that is normal — but **"we'll get it later" is a risk your buyer is carrying, not a technicality**.

What you tell the client: don't book. Ask for (a) the registration number for Tower C, and (b) the amended CC covering floor 34. If both arrive, re-run steps 7–9 and reconsider. If the developer treats the questions as obstruction, that is itself the answer.

Why this case is here: it is built from the two most common real gaps between a brochure and a portal record. Steps 7, 8 and 9 exist specifically to catch them.

8. Quiz — 10 questions

1. Which portal do you use for due diligence, and which for filing?
2. What does a "lapsed" registration mean for marketing?
3. When are quarterly progress reports due?
4. Under s.6, how long is an extension ordinarily granted for, and on what ground?
5. Which three proformas must a promoter upload under s.4(2)(g)?
6. Your client's flat is on floor 30; the CC covers 24 floors. What do you do?
7. Where do you cross-check land ownership and encumbrance outside MahaRERA?
8. What consent threshold applies to alterations in sanctioned plans?
9. What's the risk of taking possession without an OC?
10. Name three things you'd check in the *promoter's other projects*.

Answers

1. Due diligence: **maharera.maharashtra.gov.in**. Filing/transactions: **maharera.mahaonline.gov.in**.
 2. The promoter may not lawfully continue to market/sell; buyers are exposed and the project's compliance status is broken.
 3. Within **20 days of each financial quarter end** — by the **20th of July, October, January and April**.
 4. Ordinarily **up to one year**, for **force majeure** — s.6.
 5. **Allotment letter, agreement for sale, conveyance deed**.
 6. Don't proceed. Ask for the amended CC covering floor 30; treat the gap as a live risk to disclose to the client in writing.
 7. **IGR Maharashtra** (property card, registered documents, encumbrance) and **MCGM AutoDCR** for building proposals in Greater Mumbai.
 8. **Two-thirds of allottees** for alterations beyond minor additions — s.14(2).
 9. Occupation without OC is unauthorised: exposure to municipal action, difficulty getting utilities/loans transferred, and problems at resale.
 10. Completion track record, lapsed/de-registered registrations, repeated extensions, complaints and adverse orders (any three).
-

9. Interview questions

- "Take me through how you'd check a project before recommending it."
 - "A client shows you a brochure. What's the first thing you do?"
 - "How do you tell whether a promoter is reliable, using only public data?"
 - "What's the difference between the CC and the OC, and why do you care about both?"
 - "What would make you refuse to sell a project?"
-

10. Key terms

Registration number · Lapsed / de-registered · QPR · IOD · CC · Part-OC / Full OC · Sanctioned plan · Survey / CTS number · Encumbrance · Proforma agreement · Deviation sheet · Co-promoter · AutoDCR · e-ASR

11. One-page revision sheet

Read on maharera.maharashtra.gov.in · File on mahareraonline.mahaonline.gov.in

15 steps: search → status → promoter → progress → completion date → land → approvals → plans → building → **carpet area** → QPR → litigation → encumbrance → possession/OC → other disclosures.

The five deal-breakers:

1. No registration / lapsed registration
2. Unit or tower not in the registered inventory
3. CC doesn't cover the floor being sold
4. Possession offered without OC
5. Undisclosed title litigation or encumbrance

QPR due: 20 July · 20 Oct · 20 Jan · 20 Apr. **Cross-check outside MahaRERA:** IGR (title, encumbrance) · MCGM AutoDCR (plans, OC).

Always end with the five-line note. That note is the product.

Agent Registration & Responsibilities

Official syllabus: MATP Module 5 — 5.1 Who is a Real Estate Agent · 5.2 Registration u/s 9 · 5.3 Types · 5.4 Application & Process · 5.5 Renewal · 5.6 Functions · 5.7 Revocation · 5.8 Step-by-step on the portal (5.8.1 Individual, 5.8.2 Non-Individual). **Exam weight:** ● **Very high — the single heaviest module.** It is *about you*. **Time:** 5–6 hours.

1. What I need to learn

Your legal identity, how you acquire it, how you keep it, how you lose it, and what you must do every day to stay on the right side of it.

2. Simple explanation

2.1 Who is a real estate agent? (syllabus 5.1) ⚖️

Section 2(zm) — a real estate agent is a person who **negotiates or acts on behalf of one person in a transaction of transfer** of a plot, apartment or building in a real estate project, **and receives remuneration, fees or any other charge** for their services. It expressly includes property dealers, brokers and middlemen by whatever name called.

Two tests, both must be present:

1. You **negotiate or act for another person** in a transfer, **and**
2. You receive **consideration** for it.

Therefore:

- Introducing a buyer to a developer for a commission → **agent**.
- Being a salaried employee of the promoter selling its own project → **not** an agent (you're the promoter's staff).
- "Channel partner", "sourcing partner", "associate", "consultant" → **agent**, whatever the contract calls it. The Act says *by whatever name called*.
- Doing one deal as a favour, with a "gift" afterwards → treat as **agent**. Don't test this.

2.2 Registration under Section 9 (syllabus 5.2) ⚖️

s.9(1): No real estate agent shall facilitate the sale or purchase of, or act on behalf of any person in, any plot/apartment/building **in a real estate project registered under this Act** without obtaining registration.

Note the precision: the obligation attaches to dealing in a **registered project**. Read together with **s.10(a)** — which forbids facilitating a transaction in a project that *required* registration but doesn't have it — the combined effect is simple and total: **you need to be registered, and you may only deal in projects that are registered.**

s.9(6): registration may be **revoked** or suspended after an opportunity of being heard.

2.3 Types of agent (syllabus 5.3)

TYPE	WHO	FEE TREATMENT
Individual	A single natural person	Individual fee
Sole proprietorship	One person trading under a firm name	Treated as individual for fees
Partnership firm	Two or more partners	Non-individual
LLP	Limited liability partnership	Non-individual
Private / Public limited company	Incorporated entity	Non-individual
Society / Trust	Registered body	Non-individual

🕒 **Fees (Maharashtra)** — **verify before paying:** ₹10,000 + GST for an individual (including sole proprietorship) and ₹1,00,000 + GST for a non-individual. **Validity:** 5 years unless revoked. The same fee structure applies on renewal. *These come from the Maharashtra Rules, 2017 and are subject to change — always confirm on the portal before you pay.*

2.4 Registration application & process (syllabus 5.4)

The process is **entirely online**.

1. Create an **agent account** on <https://maharera.mahaonline.gov.in/>
2. Log in; complete each section of the agent registration form.
3. Upload the mandatory documents.
4. Accept the declaration.
5. Pay online.
6. An **application number** is generated — track scrutiny status against it.
7. On approval, you receive a **registration certificate with a unique registration number**, valid 5 years.

Documents typically required (confirm the current list on the portal):

INDIVIDUAL	NON-INDIVIDUAL
PAN card	PAN of the entity
Aadhaar / address proof	Registration/incorporation certificate
Photograph	MOA & AOA / partnership deed / LLP agreement
Address proof of place of business	Address proof of registered office
Income tax returns — last 3 financial years	ITRs — last 3 financial years
Details of any pending civil or criminal cases	Same, for the entity and its officers
Letterhead / rubber stamp specimen	Letterhead / rubber stamp specimen; authorised signatory details
Certificate of Competency (training & certification)	Certificate of Competency for the authorised person(s)

⚠️ The declaration about **pending civil and criminal cases** is a live obligation, not a formality. A non-disclosure discovered later is a much bigger problem than the disclosure itself.

2.5 Training and Certificate of Competency 📌

MahaRERA made **training plus a certification examination** a condition for agent registration and renewal — the reason the MATP exists. From the official guidelines:

ITEM	POSITION
Foundational order	Order No. 41 dated 10.01.2023 made certification mandatory for registration/renewal
Guidelines order	Order No. 47/2023, dated 2 June 2023
Guidelines document	MahaRERA 120.pdf
Exam format	Multiple choice, four options per question
Questions / marks	50 questions × 2 marks = 100 marks (as per the guidelines)
Passing marks	40 out of 100
Exam fee cap	Not exceeding ₹1,500 (excluding GST)
Outcome	Certificate of Competency with a unique certification number
Language	Marathi or English

🕒 **Time-sensitive.** Deadlines were extended more than once (new agents' deadline moved from 1 Sept 2023 to 1 Nov 2023; existing agents to 1 Jan 2024) and the operating detail may have moved again. **Confirm the current exam pattern and fee on the MahaRERA site before your exam.**

2.6 Renewal (syllabus 5.5)

- Registration runs **5 years** from grant.
- Apply through the **Renewal** tab in your agent account **before expiry**.
- Renewal requires updated documents and a **valid Certificate of Competency**.
- **Do not let it lapse**. Dealing after expiry is dealing without registration — s.9 breach,

s.62 penalty at **₹10,000 per day**.

 **Practice tip:** set a calendar reminder at **4 years 9 months**. Renewal is administrative; lapse is expensive.

2.7 Functions and duties of agents (syllabus 5.6) — Section 10

A registered agent **shall not**:

- **(a)** facilitate the sale/purchase of any plot/apartment/building in a project **not registered** under the Act where registration is required;
- **(c)** involve themselves in any **unfair trade practice**, including:
 - making any statement, orally or in writing, which **misrepresents** the services, standard, quality or grade of the project;
 - representing that the promoter or agent has approvals or affiliations they do not have;
 - making a **false or misleading representation** about the services;
 - permitting the publication of an advertisement of **services that are not intended to be offered**.

A registered agent **shall**:

- **(b)** maintain and preserve **books of account, records and documents** as prescribed;
- **(d)** **facilitate the possession of all information and documents** to which the allottee is entitled at the time of booking;
- **(e)** discharge such other functions as may be prescribed.

Translate that into working behaviour:

THE LAW SAYS	IN YOUR DAY THIS MEANS
No unregistered projects	Check the MahaRERA number before the first site visit, not before the booking
Maintain books	Keep a record of every deal: parties, project, amounts, invoices, brokerage, correspondence
No misrepresentation	Never quote possession dates, amenities or approvals that aren't in the disclosure
No false advertising	Every ad carries the registration number, website and QR per Order 46C/2025
Facilitate documents	Give the buyer the disclosure, the proforma agreement and the cost sheet — proactively

2.8 Revocation (syllabus 5.7)

Under **s.9(6)**, registration may be **revoked or suspended** where the agent:

- is in **breach of the conditions** of registration;
- makes a **wilful default** or contravenes the Act, rules or regulations;
- is found to have obtained registration through **misrepresentation or fraud**.

An **opportunity of being heard** must be given.

2.9 Penalties

PROVISION	TRIGGER	CONSEQUENCE
s.62	Contravention of s.9 or s.10	₹10,000 per day of continuing default, cumulatively up to 5% of the cost of the plot/apartment/building
s.65	Failure to comply with an Authority order	Daily penalty, cumulatively up to 5% of the estimated cost
s.66	Failure to comply with an Appellate Tribunal order	Imprisonment up to 1 year and/or fine up to 10% of the estimated cost
s.69	Offences by companies	Persons in charge and responsible are deemed guilty

PROVISION	TRIGGER	CONSEQUENCE
Order 46C/2025	Advertising non-compliance	₹10,000–₹50,000 per violation ; 10-day cure or continuing offence

Put a number on it: on a **₹2 crore** flat, the s.62 ceiling is **₹10 lakh**. Very few brokerage cheques survive that arithmetic.

2.10 Step-by-step on the portal (syllabus 5.8)

5.8.1 Individual agents: account → personal details (PAN, Aadhaar, photo) → business address → ITRs (3 years) → litigation declaration → Certificate of Competency → declaration → **₹10,000 + GST** → application number → certificate.

5.8.2 Non-individual agents: account in the entity's name → entity details and incorporation documents → **MOA/AOA, partnership deed or LLP agreement** → registered office proof → details of **all partners/directors** → entity ITRs → litigation declaration for entity and officers → authorised signatory + their Certificate of Competency → declaration → **₹1,00,000 + GST** → application number → certificate.

 The most common rejection reasons are mismatched names across PAN/Aadhaar/bank, illegible uploads, and missing ITRs. Fix those before you submit.

3. Agent Compliance Checklist

Print this. It is the operational heart of the module.

☐ Before advertising

- ☐ My **agent registration** is valid and unexpired
- ☐ The **project is MahaRERA-registered** and status is active
- ☐ Ad carries the **MahaRERA project registration number**
- ☐ Ad carries **maharera.maharashtra.gov.in**
- ☐ Ad carries a **scannable QR code**, correct aspect ratio
- ☐ Registration number/website font $\geq$ **largest font used for my contact details**  Order 46C/2025
- ☐ Number, website and QR in the **top-right corner**
- ☐ My **own agent registration number** is displayed
- ☐ Every claim in the ad is traceable to the **portal disclosure**
- ☐ No amenity, approval or possession date claimed that isn't disclosed

☐ Before showing a property

- ☐ Ran the **15-step investigation** (Module 4)
- ☐ Read the **proforma agreement** and any **deviation sheet**
- ☐ Know the **RERA carpet area** and can show where it's stated
- ☐ Know the **CC coverage** and the **completion date**
- ☐ Checked **litigation** and **complaints** against the promoter
- ☐ Can name the **legal promoter entity**, not just the brand

☐ Before accepting a booking

- ☐ Buyer has seen the **MahaRERA disclosure** — I sent the link
- ☐ Buyer has the **cost sheet** with carpet area, all charges, taxes broken out
- ☐ Buyer has the **draft allotment letter** and **draft agreement**
- ☐ Booking amount is within **10%** of the cost, or a registered AFS is being executed  s.13
- ☐ Payments go to the promoter's **collection account** — never to me personally
- ☐ Nothing promised orally that isn't in writing

☐ Before taking brokerage

- ☐ There is a written **brokerage agreement** — scope, rate, trigger event

- ☐ I have raised a proper **invoice** (GST if registered)
- ☐ I understand **TDS u/s 194H** will be deducted (☹ 2% — see Module 10)
- ☐ The transaction is recorded in my **books** ⚖ s.10(b)
- ☐ I am not taking fees from **both sides** without disclosing it to both

☐ Before recommending a project

- ☐ I would put my **own family** in it
- ☐ Risks are disclosed to the client **in writing**
- ☐ I have not overstated **appreciation** or **rental yield**
- ☐ I've explained **what happens if it's delayed** (s.18)
- ☐ I'm not recommending it only because the brokerage is higher

☐ During the transaction

- ☐ Buyer has the **registered** Agreement for Sale, not just a signed one
- ☐ Payment schedule is **construction-linked** and matches the agreement
- ☐ Every promise from the developer is captured in the agreement
- ☐ I am keeping copies of everything

☐ After the transaction

- ☐ Complete file **retained** ⚖ s.10(b)
- ☐ Buyer knows to take possession **within 2 months of OC** ⚖ s.19(10)
- ☐ Buyer knows about the **5-year defect liability** ⚖ s.14(3)
- ☐ Buyer knows how to complain to MahaRERA if something goes wrong
- ☐ My **renewal date** is in the calendar

6. Deep dive

Desai & Diwanji — Transparency First: MahaRERA Enforces Stricter Rules for Real Estate Advertising 

<https://desaidiwanji.com/insights/articles/transparency-first-maharera-enforces-stricter-rules-for-real-estate-advertising> **Read:** the compliance requirements and penalty sections. **Why:** the best practitioner explanation of the advertising order you're now bound by.

7. Practical exercise

Two tasks.

A. The self-audit (30 min). Take the Compliance Checklist above and run it against your last real transaction (or one you've observed). Count the boxes you could not tick. That number is your personal risk register.

B. The compliant advertisement (45 min). Design a one-page property advertisement for a real MahaRERA-registered project. It must satisfy **every** requirement of Order 46C/2025. Then hand it to someone and ask them to find the registration number in under three seconds. If they can't, it fails.

8. Case study

The friendly referral.

A former client asks you to help their cousin buy a resale flat in a 2012 building — completed long before RERA, never registered. You're not advertising, not representing the developer; you just introduce buyer to seller and take ₹2 lakh.

Separately, the same month, you introduce a buyer to a **pre-launch** in an unregistered under-construction project and take ₹3 lakh.

Question: are you in breach in either case? Both? Neither?

Analysis

Case 1 — the 2012 resale: not a s.10(a) breach. s.10(a) prohibits facilitating a sale in a project that **is required to be registered** but isn't. A building completed before the Act commenced, with its completion certificate obtained pre-commencement, falls outside the registration requirement. There is no unregistered *project* being marketed here.

But note carefully: **s.9 still describes you as a real estate agent**, and you are taking a fee for negotiating a transfer. The prudent position — and the one MahaRERA's own guidance points to — is that **an agent operating in Maharashtra registers and stays registered**, and confines the question to *which projects* they may deal in. Doing resale work without registration while holding yourself out as an agent is not a position worth defending.

Case 2 — the pre-launch: a clear breach of s.10(a). The project requires registration and doesn't have it. Penalty under **s.62**: ₹10,000 per day of continuing default, up to **5% of the cost** of the apartment. On a ₹2.5 crore flat that's a ceiling of ₹12.5 lakh against your ₹3 lakh fee. Your registration is also exposed under **s.9(6)**.

The distinction to carry away: RERA regulates **projects requiring registration**. Your personal registration is the baseline; the project's registration determines whether you may deal in it at all. Check both, every time — and when in doubt about an old building, check whether a completion certificate pre-dates the Act.

9. Quiz — 10 questions

1. State the two limbs of the s.2(zm) definition.
2. Registration fee for an individual and for a company in Maharashtra? Validity?

3. Is a sole proprietorship an individual or non-individual for fees?
4. List four things s.10 prohibits.
5. What is the s.62 penalty — daily rate and ceiling?
6. On what three grounds may registration be revoked under s.9(6)?
7. What is the exam pattern and passing mark per the certification guidelines?
8. Name three documents required for individual registration.
9. What happens if you keep dealing after your registration expires?
10. Under Order 46C/2025, where must the QR code appear and how large must the registration number be?

Answers

1. (i) Negotiates or acts on behalf of another in a transfer of a plot/apartment/building in a real estate project, **and** (ii) receives remuneration, fees or any other charge.
2. ₹10,000 + GST individual; ₹1,00,000 + GST non-individual; valid **5 years** unless revoked. 🔍 verify.
3. Treated as **individual**.
4. Facilitating sale in an unregistered project; unfair trade practice/misrepresentation; false or misleading representation of services; permitting publication of an advertisement of services not intended to be offered. (Also: failing to maintain books; failing to facilitate documents to the allottee.)
5. ₹10,000 per day of continuing default, cumulatively up to **5% of the cost** of the plot/apartment/building.
6. Breach of conditions of registration; wilful default or contravention of the Act/rules/regulations; registration obtained by misrepresentation or fraud. An opportunity of being heard must be given.
7. **50 MCQs × 2 marks = 100**; pass at **40**; fee capped at **₹1,500** excl. GST; Marathi or English. 🔍 verify current pattern.
8. Any three of: PAN, Aadhaar/address proof, photograph, business address proof, **3 years' ITRs**, litigation declaration, letterhead/stamp, **Certificate of Competency**.
9. You are dealing **without registration** — s.9 breach, s.62 penalty at ₹10,000/day.
10. **Top-right corner**; registration number and website in a font **equal to or larger than the largest font used for contact details/address**; QR scannable with correct aspect ratio. Penalty ₹10,000–₹50,000 per violation.

10. Interview questions 🎤

- "Are you MahaRERA registered? What's your number and when does it expire?"
- "What does Section 10 stop you from doing?"
- "A developer asks you to sell a project whose registration is 'in process'. What do you say?"
- "What records do you keep, and why?"
- "How do you make sure your advertising is compliant?"
- "What would get your registration revoked?"

11. Key terms

s.2(zm) · s.9 · s.10 · s.62 · Certificate of Competency · Individual vs non-individual · Sole proprietorship · Unfair trade practice · Books of account · Revocation / suspension · Renewal tab · Order 46C/2025 · Application number

12. One-page revision sheet

You are an agent if: you negotiate/act for another in a transfer **and** take a fee. By whatever name called.

s.9 register · s.10 conduct · s.62 penalty (**₹10,000/day, 5% ceiling**) · s.65 disobey Authority · s.66 disobey Tribunal (**1 yr jail / 10%**) · s.69 companies.

⌚ **Fees:** ₹10,000 + GST individual (incl. sole proprietor) · ₹1,00,000 + GST non-individual. **Validity 5 years.** Renew via the **Renewal tab**, before expiry. Reminder at 4y 9m.

Exam: 50 MCQ × 2 = 100 · pass **40** · fee ≤ **₹1,500** + GST · Marathi or English.

s.10 forbids: unregistered projects · unfair trade practice · misrepresentation · false ads. **s.10 requires:** keep books · give the allottee their documents.

Revocation (s.9(6)): breach of conditions · wilful default/contravention · fraud. Hearing required.

Every ad: project reg. no. + website + QR, **top-right**, font ≥ your contact details, plus your own agent number.

Never: market before registration · take money in your own account · promise what isn't disclosed.

Project Registration & Promoter Duties

Official syllabus: MATP Module 6 — 6.1 Registration of Projects · 6.2 Application & Process · 6.3 Extension · 6.4 Revocation · 6.5 Functions & Duties of Promoter. **Exam weight:** ● High. **Time:** 4–5 hours.

1. What I need to learn

The promoter's obligations — because **every promoter duty is an agent opportunity**. Each thing the promoter must disclose is something you get to inspect; each thing they must do is something you can check they've done.

2. Simple explanation

2.1 Registration of real estate projects (syllabus 6.1) ⚖️ s.3

No promoter shall **advertise, market, book, sell or offer for sale, or invite persons to purchase** any plot, apartment or building in any planning area **without registering the project**.

Exemptions — s.3(2):

EXEMPTION	DETAIL
(a) Small projects	Land not exceeding 500 sq m or apartments not exceeding 8 , inclusive of all phases. State Government may reduce these thresholds.
(b) Completed projects	Completion certificate received before commencement of the Act .
(c) Renovation/repair/redevelopment	Where it does not involve marketing, advertising, selling or new allotment .

Two things people get wrong:

- The threshold is "**or**", not "**and**" — a 400 sq m plot with 12 apartments still needs registration.
- **Each phase is a separate project** and registers separately. "Phase 2 is covered by Phase 1's number" is wrong.

2.2 Registration application & process (syllabus 6.2) ⚖️ s.4

The promoter applies to the Authority with prescribed fee and documents. **s.4(2)** requires:

CLAUSE	DISCLOSURE
(a)	Promoter details — name, address, type of enterprise, registered particulars
(b)	Track record — projects launched in the last 5 years, status, delays, pending cases
(c)	Authenticated copy of approvals and commencement certificate
(d)	Sanctioned plan, layout plan, specifications
(e)	Plan of development works, proposed facilities, fire-fighting, drinking water, emergency management
(f)	Location details with clear demarcation of land
(g)	Proforma of the allotment letter, agreement for sale and conveyance deed
(h)	Number, type and carpet area of apartments; number and areas of garages
(i)	Names and addresses of real estate agents , contractors, architect, structural engineer
(j)	Declaration of legal title with authenticated documents
(k)	Details of encumbrances , including litigation, and any rights/title/interest/name of a party in possession

CLAUSE	DISCLOSURE
(I)	Declaration supported by affidavit — including the 70% separate account , timelines, and no false statement

s.4(2)(I)(D) — the 70% rule. Seventy per cent of amounts realised from allottees goes into a **separate account in a scheduled bank**, used only to cover **land cost and construction cost**, withdrawn in proportion to completion, certified by **Architect, Engineer and CA**.

Grant of registration — s.5. The Authority grants or rejects within **30 days**. If it neither grants nor rejects, the project is **deemed registered** and the Authority provides the registration number. Rejection requires an opportunity of being heard.

2.3 🏠 The three-bank-account structure (current Maharashtra practice)

MahaRERA operationalised the 70% rule into a **three-account structure** (Order No. MahaRERA/Secy/129/2024 — [PDF](#)):

ACCOUNT	PURPOSE
Collection account	Receives all collections from allottees — including parking, amenities and other charges — excluding taxes and statutory dues
Separate account	70% of collections transferred here; land + construction cost only
Transaction account	Up to 30% transferred here for the promoter's other project costs

All three must be with a **single scheduled bank**, opened **before applying** for registration. They must be **free of encumbrance** — not escrow, no lien, no loan, no third-party (lender) control.

Why an agent cares: you can tell a buyer exactly where their money goes and why it's protected. That is a genuinely reassuring, genuinely accurate thing to be able to say — and it's a good test of a promoter: ask which bank the three accounts are with.

2.4 Extension of registration (syllabus 6.3) ⚖️ s.6

- Registration may be extended on application, **ordinarily up to one year**.
- The ground is **force majeure** — war, flood, drought, fire, cyclone, earthquake or other calamity affecting development.
- The Authority may, in reasonable circumstances and without default by the promoter, extend for reasons recorded in writing.
- Not available where the promoter is simply late.

🚩 **Agent reading:** one extension with a stated cause is normal. **Three extensions is a pattern**, and a pattern is a forecast.

2.5 Revocation of registration (syllabus 6.4) ⚖️ s.7

The Authority may revoke on complaint or suo motu where the promoter:

- **(a)** makes default in doing anything required under the Act, rules or regulations;
- **(b)** violates any of the terms or conditions of the approval given by the competent authority;
- **(c)** is involved in any kind of **unfair practice or irregularities** — including false/misleading advertisements, and any fraudulent practice.

Minimum **30 days' notice** in writing and an opportunity to be heard. Instead of revoking, the Authority may permit registration to continue subject to further terms.

Consequences — s.8. On lapse or revocation the Authority:

- bars the promoter from accessing the website and lists them as a **defaulter**;
- informs other state authorities;
- may, after consulting the appropriate government, **allow the association of allottees to complete the project**, or take such other action as it deems fit.

2.6 Functions and duties of the promoter (syllabus 6.5) ⚖️ ss.11–18

SECTION	DUTY	WHAT YOU CHECK
11(1)	Create a web page on the Authority's website and keep it updated	Is the record current?
11(1)(b)	Quarterly updates on project status	Four filings, on time
11(3)(a)	At time of booking, give the allottee sanctioned plans, layout, specifications	Did the buyer actually get these?
11(3)(b)	Give stage-wise time schedule of completion	Is it in writing?

SECTION	DUTY	WHAT YOU CHECK
11(4)(a)	Responsible for all obligations until conveyance to the allottee/association	Who's on the hook, and until when
11(4)(e)	Form the association of allottees	Post-possession
11(4)(f)	Execute registered conveyance	Deemed conveyance disputes
11(4)(g)	Pay all outgoings until transfer	Unpaid dues become the society's problem
11(5)	No advertisement without the registration number and website	Order 46C/2025 sits on top of this
12	Veracity of advertisement/prospectus — allottee who relied and paid may withdraw with full refund + interest , plus compensation	Every claim in your marketing
13	No more than 10% without a registered Agreement for Sale	The most-broken rule in the market
14	Adhere to sanctioned plans ; minor additions allowed; other alterations need 2/3rds allottee consent ; 5-year defect liability , rectify in 30 days	Brochure vs sanctioned plan
15	No transfer of the project to a third party without 2/3rds allottees + Authority approval	Change of developer mid-project
16	Insurance of title and construction	Rarely checked; worth asking
17	Transfer of title — conveyance to the association within the specified period	Society formation
18	Return of amount and compensation — failure to complete/give possession → refund with interest + compensation, or interest for every month of delay if the allottee chooses to stay	Your buyer's core protection

2.7 Quarterly Progress Reports 🕒

Maharashtra runs QPR on a **financial-quarter** basis: filed within **20 days of quarter end** — due by the **20th of July, October, January and April**.

The certificate forms:

FORM	SIGNED BY	PURPOSE
Form 1	Architect	Certifies percentage completion of construction — for withdrawal from the separate account
Form 2	Structural Engineer	Certifies cost incurred on construction
Form 2A	—	Quality Assurance Certificate — within three months after each financial year end
Form 3	Chartered Accountant	Certifies cost incurred on land and construction; withdrawal proportionality
Form 4	Architect	Certificate on completion of the project
Form 5	CA	Annual Statement of Accounts — within six months after financial year end

Forms 1, 2 and 3 need not be uploaded every quarter, but must be **maintained by the promoter** and submitted to the bank to release money from the separate account. Missing a QPR deadline triggers a **web-generated notice** with 10 days to comply, and **non-compliance is displayed publicly** on the portal.

3. 🚫 Developer Project Analysis Framework

How an agent decides whether to put a client into a project. Score each dimension 1–5; anything scoring 1 on **A, B or F** is a stop, not a discount.

A. Legal standing (*gate — pass/fail*)

- Registration **active**, not lapsed or de-registered
- CC covers the floors being sold
- Land title clean; if JDA, **landowner is a co-promoter**

- No title litigation
- Proforma agreement uploaded; deviations highlighted

Fail any of these → do not proceed. No price makes this back.

B. Promoter strength

- Completed projects in the last 5 years, and **did they finish on time?**
- Other registrations: any lapsed, de-registered, repeatedly extended?
- Complaints and adverse orders at **Orders & Judgments**
- Is the promoter an SPV? Who stands behind it?
- Financial signals: is construction finance in place, or is the project funded purely from sales?

C. Delivery credibility

- Declared completion date vs actual progress
- **Four consecutive QPRs**, on time, showing movement
- Extensions taken and grounds given
- Site visit: does the physical work match the declared percentage?

D. Product quality

- Carpet area **efficiency** (carpet ÷ saleable — see Module 10)
- Unit layout, floor plate, ventilation, parking ratio
- Amenities in the **sanctioned plan**, not just the brochure
- Specifications in the **agreement**, not just the show flat

E. Commercial terms

- Price per **carpet** sq ft vs comparable projects in the micro-market
- All-in cost: GST, stamp duty, registration, floor rise, parking, club, maintenance advance
- Payment plan: is it genuinely **construction-linked**?
- Cancellation terms — the model allotment letter caps deduction at **2%** (Module 9)

F. Client fit (gate)

- End-user or investor? Under-construction suits neither automatically
- Can they carry EMI + rent through a delay?
- Is the exit horizon realistic for this micro-market?

If the product doesn't fit the client, a good project is still the wrong recommendation.

Then write the five-line note from Module 4. If you can't write it without hedging, you don't understand the project well enough to sell it.

4. 📖 Official reading 🏛️

PRIORITY	RESOURCE	READ	WHY
●	RERA Act — India Code	ss.3–8 and ss.11–18	The whole module, in the primary source
●	MahaRERA — Guide for Promoters: documents & forms	Full list	What must be uploaded = what you may inspect
●	Bank Account Order (3-account structure)	Whole order	How the 70% rule actually operates today
●	Maharashtra RERA Rules, 2017	Project registration rules + forms	The Maharashtra-specific numbers and forms

6. 📖 Deep dive 🟢

Trilegal — MahaRERA issues directions for maintaining separate bank accounts 🔗 https://trilegal.com/knowledge_repository/trilegal-update-maharera-issues-directions-for-maintaining-separate-bank-accounts-for-real-estate-projects/ **Read:** the operational requirements and the encumbrance restrictions. **Why:** shows how a promoter's finance team actually has to implement the 70% rule — and therefore what a promoter who *hasn't* done it looks like.

Lexology — Agreement for Sale under RERA: Format, Mandatory Clauses and Legal Implications 🔗 <https://www.lexology.com/library/detail.aspx?g=2f05a3ae-ffde-4f1e-96e3-4e86a0d3c0af> **Read:** the mandatory clauses section. **Why:** bridges Module 6 and Module 9 — s.13's requirement becomes a specific document.

7. Practical exercise 📝

Score two projects (90 minutes).

Pick **two under-construction projects in the same micro-market**, ideally by different promoters. Run the Developer Project Analysis Framework on both. Score A–F out of 5. Write a paragraph on which you'd recommend and — importantly — **for which type of client**.

The insight you're hunting: the better project is often better *for a different buyer* than the one in front of you.

8. Case study 📋

The project that stopped filing.

A Navi Mumbai project registered in 2021, completion declared December 2025. You check in mid-2026:

- Registration status: **active**, one extension granted to December 2026
- QPRs: filed through Q2 FY25, then **three consecutive quarters missing**
- Declared completion: **61%** — unchanged across the last two filings
- Complaints: **four** s.18 complaints filed in the last year
- Site visit: structure topped out, no finishing work visible, few workers

Your client wants this flat because it's ₹1,100/sq ft cheaper than anything comparable.

Questions: What is actually happening? What are the client's rights if they buy and it stalls? Do you sell this?

Analysis

What's happening. Three missing QPRs plus flat declared progress plus visible site inactivity is the standard signature of a project that has run out of money. The extension bought time, not cash. The four s.18 complaints tell you existing allottees have already concluded the same thing. The ₹1,100/sq ft discount is not a bargain — **it is the market pricing this risk**, and pricing it roughly correctly.

Rights if they buy and it stalls (s.18). On failure to complete or give possession by the agreed date, the allottee may either:

- **withdraw** — full refund of the amount paid **with interest** at the prescribed rate, plus compensation; or
- **stay** — and receive **interest for every month of delay** until possession.

Compensation is adjudicated by the **Adjudicating Officer** (s.71). Recovery is as **arrears of land revenue** (s.40).

But understand what those rights are worth in practice: an order against a promoter with no money is an order, not a payment. RERA gives an excellent remedy; it does not manufacture funds.

Do you sell it? No — not to a buyer who needs to live in it, is stretching to afford it, or would be paying rent and EMI simultaneously. You could discuss it with a cash-rich investor who understands they are underwriting a **completion risk** and might participate in an allottees' association completing the project under **s.8**. That is a specialist bet, not a home purchase.

What you actually do: put the QPR gap, the flat progress and the four complaints in writing to the client. Then let them decide with full information. That written note is both good service and your own protection under **s.10(c)**.

9. Quiz — 10 questions

1. State the s.3(2)(a) exemption precisely. Is it "and" or "or"?
2. Do phases of a project register separately?
3. What must be in the separate account, and who certifies withdrawals?
4. Name the three accounts in the current Maharashtra structure and what each holds.
5. Within how long must the Authority grant or reject, and what happens if it doesn't?
6. On what ground and for how long is extension ordinarily granted?
7. Name the three grounds for revocation under s.7.
8. What may the Authority allow after revocation, under s.8?
9. What are Forms 1, 2, 3, 4 and 5, and who signs each?
10. What are the allottee's two options under s.18 when possession is delayed?

Answers

1. Land **not exceeding 500 sq m or** apartments **not exceeding 8**, inclusive of all phases. It is "**or**" — exceeding either threshold triggers registration.
2. **Yes** — each phase is a standalone real estate project requiring its own registration.
3. **70%** of amounts realised from allottees, for **land and construction cost only**; withdrawals certified by **Architect, Engineer and Chartered Accountant** in proportion to completion.
4. **Collection** (all receipts incl. parking/amenities, excl. taxes) · **Separate** (70%) · **Transaction** (up to 30%). Single scheduled bank, free of encumbrance.
5. **30 days**; if the Authority neither grants nor rejects, the project is **deemed registered**.
6. **Force majeure**, ordinarily **up to one year** — s.6.
7. Default under the Act/rules/regulations; violation of terms of approval by the competent authority; unfair practice or irregularities including false/misleading advertisement and fraud. Minimum **30 days' notice** and a hearing.
8. Allow the **association of allottees** to complete the project (after consulting the appropriate government), bar the promoter from the website and list them as a defaulter.
9. Form 1 **Architect** (% completion) · Form 2 **Engineer** (cost incurred) · Form 2A Quality Assurance · Form 3 **CA** (cost, withdrawal proportionality) · Form 4 **Architect** on completion · Form 5 **CA** annual statement of accounts.
10. **Withdraw** — refund with interest plus compensation; or **stay** — interest for every month of delay until possession.

10. Interview questions

- "What does a promoter have to disclose at registration?"
 - "Explain the 70% rule and how it's actually operated in Maharashtra now."
 - "When can a project's registration be extended? Revoked?"
 - "How do you read a project's QPR history?"
 - "A developer wants to change the layout after 40 flats are sold. Can they?"
 - "What happens to buyers if a project's registration is revoked?"
-

11. Key terms

s.3 threshold · Phase-wise registration · Deemed registration · 70% separate account · Collection / Separate / Transaction accounts · Force majeure extension · Revocation · Defaulter listing · Association of allottees · QPR · Forms 1–5 · Defect liability · Deemed conveyance · Co-promoter

12. One-page revision sheet

s.3 — no advertising/marketing/booking/selling without registration. **Exempt:** ≤500 sq m **or** ≤8 apartments · completed pre-Act · repair/redevelopment without marketing. **Each phase registers separately.**

s.4 — disclosure: track record, approvals, plans, **proformas**, carpet areas, encumbrances, **70% affidavit**. s.5 — 30 days, else **deemed registered**.

Three accounts: Collection (all) → Separate (**70%**) → Transaction (≤30%). One scheduled bank, unencumbered.

s.6 extension — force majeure, ordinarily **1 year**. s.7 revocation — default / breach of approval / unfair practice; 30 days' notice. s.8 — defaulter listing; allottees' association may complete.

Promoter duties: 11 web page + QPR · 12 advert veracity · **13 the 10% rule** · 14 sanctioned plans + **5-yr defect liability** · 15 no transfer without 2/3rds · 17 conveyance · **18 refund with interest / monthly interest for delay**.

QPR: 20 Jul · 20 Oct · 20 Jan · 20 Apr. **Forms:** 1 Architect · 2 Engineer · 3 CA · 4 Architect (completion) · 5 CA (annual).

Framework gates: A Legal standing · F Client fit. Fail either and there is no price that fixes it.

Allottees & Dispute Resolution

Official syllabus: MATP Module 7 — 7.1 Rights · 7.2 Obligations · 7.3 Dispute Resolution (7.3.1 Complaints · 7.3.2 Adjudication · 7.3.3 Conciliation · 7.3.4 Appeals) · 7.4 Penal Provisions (7.4.1 Promoters · 7.4.2 Agents · 7.4.3 Allottees · 7.4.4 Offence by companies). **Exam weight:** ● High — the penal provisions sub-module is heavily examined. **Time:** 4–5 hours.

1. What I need to learn

What your client is entitled to, what your client owes, and exactly what happens when it goes wrong.

Most agents know rights and forget obligations. The obligations matter: an allottee who stops paying because construction is slow can find *themselves* in default. Advising a client badly here costs them real money.

2. Simple explanation

2.1 Rights of allottees (syllabus 7.1) ⚖️ s.19

S.19	RIGHT
(1)	Obtain information on sanctioned plans, layout plans and specifications approved by the competent authority
(2)	Know the stage-wise time schedule of completion, including water, sanitation, electricity
(3)	Claim possession of the apartment/plot as per the declaration under s.4(2)(I)(C); and the association is entitled to possession of common areas
(4)	Claim refund with interest and compensation where the promoter fails to comply or is unable to give possession per the agreement — under s.18
(5)	Have documents and plans, including common areas , after possession

And through s.18:

- If the promoter fails to complete or give possession by the agreed date, the allottee may

withdraw and get a **full refund with interest** plus compensation; or **stay** and get **interest for every month of delay** until possession.

- If the promoter's title is defective and the allottee suffers loss, compensation is payable and

is not barred by limitation under the Act's scheme.

- On any **structural defect or defect in workmanship, quality or provision of services** notified

within **5 years** of possession, rectification within **30 days**, failing which compensation (s.14(3)).

- On **false advertisement** relied upon, withdrawal with **full refund + interest** (s.12).

2.2 Obligations of allottees (syllabus 7.2) ⚖️ s.19(6)–(11)

S.19	OBLIGATION
(6)	Make necessary payments in the manner and within the time specified in the agreement — including registration charges, municipal taxes, water and electricity charges, maintenance charges, ground rent and other charges
(7)	Be liable to pay interest at the prescribed rate for any delay in payment
(8)	The obligations and liability for interest may be reduced by mutual consent of promoter and allottee
(9)	Participate in the formation of an association/society/co-operative society
(10)	Take physical possession within 2 months of the Occupancy Certificate being issued
(11)	Participate in registration of the conveyance deed

- **Exam favourite:** interest is **symmetrical**. The promoter pays the allottee for delayed possession; the allottee pays the promoter for delayed payment — **at the same prescribed rate** under the Maharashtra Rules. Any question that implies only the promoter pays interest is wrong.
- **Second favourite:** **2 months from OC** to take possession — s.19(10). Not 30 days, not 3 months.

2.3 Dispute resolution (syllabus 7.3)

The ladder:

⚖️ s.79 — **civil courts are barred** from entertaining any suit in respect of matters the Authority or Tribunal is empowered to determine.

7.3.1 Complaints ⚖️ s.31

- **Who:** any **aggrieved person** — an allottee, an association, a promoter, or an agent.
- **Against whom:** a promoter, an allottee **or an agent** — note that agents can be complained against.
- **Where:** the Authority, or the Adjudicating Officer.
- **How (Maharashtra):** create an account on the MahaRERA complaint portal and file online.

Start at **Make a Complaint** and **Complaint filing under a registered project**.

- ⌚ Fee is prescribed by the Maharashtra Rules — **verify the current amount on the portal**.

7.3.2 Adjudication ⚖️ s.71

The **Adjudicating Officer** — a judicial officer appointed by the Authority in consultation with the State Government — decides **compensation** claims under **ss.12, 14, 18 and 19**.

The split you must get right:

FORUM	AWARDS
The Authority	Orders, directions, interest , penalty, refund
The Adjudicating Officer	Compensation

s.72 — **factors the Adjudicating Officer considers:** the amount of disproportionate gain or unfair advantage made as a result of the default; the amount of loss caused as a result of the default; the repetitive nature of the default; and such other factors as may be necessary.

7.3.3 Conciliation ⚖️/👤

MahaRERA operates a **Conciliation Forum** — a voluntary, without-prejudice settlement mechanism before or alongside adjudication.

- Both parties must **agree** to conciliate. Either may decline.
- Conducted by a **conciliation bench**, typically drawn from a panel with representation of both

promoter and allottee sides (**List of Conciliators**).

- The conciliator **does not decide** — they help the parties settle. A settlement is recorded.
- ⌚ Runs on tight timelines: notice within roughly a week, first hearing within about a fortnight,

and matters referred back to MahaRERA if settlement isn't emerging within roughly sixty days. **Verify current timelines at Procedure of Conciliation.**

- On the first date of hearing of a complaint, if both parties agree to settle, the matter can be

moved to the Conciliation Forum.

 **Advise clients honestly:** conciliation is fast and preserves the relationship, and it is often the right first move where the promoter is solvent and the dispute is about timing or snagging. It is the wrong move where the promoter has no money — there, you want an order.

7.3.4 Appeals ss.43–44, 58

- Appeal from an order of the **Authority or Adjudicating Officer** lies to the ****Real Estate**

Appellate Tribunal**.

- **Time limit: 60 days** from receipt of the order — s.43(5).
-  **A promoter appealing must first deposit at least 30%** of the penalty, or such higher amount

as may be determined, **or** the total amount payable to the allottee including interest and compensation, **whichever is higher.**

- The Tribunal endeavours to dispose of appeals within **60 days**.
- From the Tribunal, appeal lies to the **High Court** within **60 days**, on a **question of law**

— s.58.

2.4 Penal provisions (syllabus 7.4)

7.4.1 Penal provisions for promoters

SECTION	DEFAULT	PENALTY
59(1)	Non-registration under s.3	Up to 10% of the estimated cost of the project
59(2)	Continued violation after 59(1)	Imprisonment up to 3 years and/or further fine up to 10%
60	Contravention of s.4 (false information in the application)	Up to 5% of the estimated cost
61	Contravention of any other provision	Up to 5% of the estimated cost
63	Failure to comply with an Authority order	Daily penalty, cumulatively up to 5% of the estimated cost
64	Failure to comply with an Appellate Tribunal order	Imprisonment up to 3 years and/or fine, cumulatively up to 10% of the estimated cost

7.4.2 Penal provisions for real estate agents

SECTION	DEFAULT	PENALTY
62	Contravention of s.9 or s.10	₹10,000 per day of continuing default, cumulatively up to 5% of the cost of the plot/apartment/building
65	Failure to comply with an Authority order	Daily penalty, cumulatively up to 5% of the estimated cost
66	Failure to comply with an Appellate Tribunal order	Imprisonment up to 1 year and/or fine, cumulatively up to 10% of the estimated cost

7.4.3 Penal provisions for allottees

SECTION	DEFAULT	PENALTY
67	Failure to comply with an Authority order	Daily penalty, cumulatively up to 5% of the cost of the plot/apartment/building
68	Failure to comply with an Appellate Tribunal order	Imprisonment up to 1 year and/or fine, cumulatively up to 10% of the cost

Note the pattern: **promoters face up to 3 years' imprisonment; agents and allottees up to 1 year.** Fine ceilings for disobeying a Tribunal order are 10%; for disobeying the Authority, 5%. This symmetry makes the whole of Chapter VIII easy to remember.

7.4.4 Offences by companies ⚖️ s.69

Where an offence is committed by a company, **every person who at the time of the offence was in charge of, and responsible to, the company for the conduct of its business**, as well as the company itself, is **deemed guilty**.

Defences: the person proves the offence was committed **without their knowledge** or that they **exercised all due diligence** to prevent it.

Extension: where the offence is proved to have been committed with the **consent or connivance of, or is attributable to any neglect on the part of**, any **director, manager, secretary or other officer**, that person is also deemed guilty.

Why an agent cares: if you are registered as a **non-individual** agent, s.69 reaches the individuals running it. Incorporating does not put a wall between you and RERA liability.

s.70 — compounding. Offences punishable with imprisonment may be **compounded** by the court, on payment of such sum as prescribed. This is how many matters actually end.

3. 🟡 Realistic scenarios

Scenario A — the 18-month delay

Your client booked a 2BHK in a Mumbai project in 2022. The registered Agreement for Sale states possession by **December 2024**. It is now **June 2026 — 18 months** past the agreed date. Your client has paid **₹1.4 crore** of a ₹1.75 crore consideration, and is paying **₹98,000/month** EMI while also paying **₹55,000/month** rent. The promoter has taken one extension and blames a delayed environmental clearance.

Q1. What rights does the buyer have?

Under **s.18(1)**, on the promoter's failure to give possession by the date specified in the agreement, the allottee has **two mutually exclusive choices**:

- **Withdraw:** return of the **entire amount paid (₹1.4 crore)** with ****interest** at the prescribed rate **from the date of payment**, plus compensation** under s.71; or
- **Stay:** **interest for every month of delay** until handover.

The rate is prescribed by the **Maharashtra Rules** (commonly expressed as SBI's highest marginal cost of lending rate plus a margin — ⌚ **verify the current rate in the Rules**, it moves with SBI's MCLR).

Is "**delayed environmental clearance**" a defence? Generally **no**. An extension under s.6 is for **force majeure** — calamity. Approval delays are ordinarily a promoter's own project risk, and the agreed possession date in the registered agreement is what s.18 measures against. The promoter would have to make out a genuine force majeure case.

Q2. What should the agent tell the buyer?

1. **Do the arithmetic before choosing.** Withdrawal returns capital plus interest but loses the asset — and if Mumbai prices have moved, ₹1.4 crore + interest may not buy the same flat today. Staying preserves the asset and accrues monthly interest but continues the rent + EMI drain. **This is a financial decision, not just a legal one.**
2. **Do not stop paying.** Withholding instalments puts the client in default under s.19(6)–(7) and hands the promoter a counter-argument. If they want to stop, that decision should follow legal advice, not precede it.
3. **Interest starts from the agreed date**, not from when they complain. Delay in filing doesn't forfeit accrued interest, but it does delay recovery.
4. **Consider conciliation first** if the promoter is solvent and building — it is faster. Go straight to a **s.31 complaint** if the site is dead.
5. **Be honest about enforcement.** An order is only as good as the promoter's ability to pay. Recovery is as **arrears of land revenue** (s.40), which is real but slow.

Q3. What documents are needed?

- **Registered Agreement for Sale** (the possession date is the anchor)
- **Allotment letter**
- **All payment receipts** and bank statements
- **Home loan sanction and statement** (to evidence EMI outflow)
- **Rent agreement and receipts** (for compensation)

- The project's **MahaRERA page**, QPR history and extension record — download and date-stamp it
- All **correspondence** with the promoter
- Any **advertisement or brochure** relied on (relevant if s.12 is in play)

Q4. What is the dispute-resolution process?

1. Written notice to the promoter recording the delay and the election (withdraw or stay).
2. Optionally, **conciliation** via the MahaRERA Conciliation Forum.
3. **Complaint under s.31** to MahaRERA, online.
4. Authority orders refund/interest/directions; **compensation** goes to the ****Adjudicating Officer**** under s.71.
5. Either party may appeal to the **Appellate Tribunal within 60 days** — the promoter must **pre-deposit ≥30%** or the full amount payable, whichever is higher.
6. **High Court** on a question of law within 60 days.
7. Non-compliance by the promoter → **s.63** penalties; recovery as **arrears of land revenue** (s.40).

Scenario B — the buyer who stopped paying

Your client's project is 9 months behind. Frustrated, they stopped paying the last two construction-linked instalments — ₹22 lakh. The promoter has issued a notice threatening cancellation and forfeiture.

The uncomfortable answer: the client is now in default under **s.19(6)**, and is liable for **interest at the prescribed rate** under **s.19(7)**. Delay by the promoter does **not** automatically suspend the allottee's payment obligation — the Act gives the allottee a *remedy* (s.18), not a *self-help right to withhold*.

Better advice, in order: pay under protest while recording the delay in writing; claim s.18 interest for the promoter's delay separately; and if cancellation is threatened, note that forfeiture terms are constrained — the **model allotment letter caps the deduction on cancellation at 2%** (Module 9). Never advise a client to stop paying as a negotiating tactic.

Scenario C — the defect that appeared in year four

Three years and eight months after possession, seepage appears through an external wall in your client's flat. The promoter says the warranty was one year.

s.14(3) governs, not the promoter's warranty. Any **structural defect or defect in workmanship, quality or provision of services** brought to the promoter's notice **within 5 years** of possession must be **rectified within 30 days**, free of charge. Failing that, the allottee is entitled to **compensation**.

Action: written notice to the promoter, dated, with photographs; keep proof of delivery (the 5-year clock and the 30-day clock both depend on that date). If unrectified in 30 days, complain under **s.31**; compensation via **s.71**.

4. 📖 Official reading 🏛️

PRIORITY	RESOURCE	READ	WHY
●	RERA Act — India Code	s.19, s.18, s.31, ss.43–44, ss.59–72	The whole module in the primary source

6. 📄 Deep dive ●

Taxmann — Understanding Real Estate Documentation: Allotment Letters, Agreements for Sale and Sale Deeds under RERA 🔗

<https://www.taxmann.com/post/blog/understanding-real-estate-documentation-allotment-letters-agreements-for-sale-and-sale-deeds-under-rera/>

Read: the sections on what each document creates and when rights crystallise. **Why:** most allottee disputes turn on **which document said what**. This links Module 7 to Module 9.

7. Practical exercise 📝

Read three real orders (90 minutes).

Go to **MahaRERA Orders & Judgments** and read **three decided s.18 delay complaints** end to end. For each, note:

1. What was the agreed possession date, and how long was the delay?
2. Did the allottee elect to withdraw or to stay?
3. What did the Authority order — refund? interest? at what rate?
4. Was compensation separately claimed before the Adjudicating Officer?
5. What argument did the promoter run, and did it work?

Then write a **one-paragraph summary** of what MahaRERA appears to actually do in delay cases. That paragraph will be worth more to a client than any brochure.

8. Case study 📋 — the OC that arrived quietly

Your client's project receives its **Occupancy Certificate on 3 March**. The promoter emails a possession notice to the address on file — an old email your client no longer checks. On **20 June**, the promoter demands **maintenance charges and municipal taxes from 3 March**, plus **interest** on delayed payment of the final instalment, and points to **s.19(10)**.

Questions: Is the promoter right? What is the client's exposure? What should have happened?

Analysis

The promoter is substantially right on the framework. Under **s.19(10)** the allottee must take physical possession **within 2 months of the OC being issued** — here, by 3 May. Under **s.19(6)** the allottee is liable for municipal taxes, maintenance and other outgoings as specified in the agreement, and under **s.19(7)** interest runs on delayed payments. Once a valid possession offer is made following OC, liability for outgoings typically shifts to the allottee — this is standard and is usually spelled out in the Agreement for Sale.

But three things are contestable:

1. **Was the possession offer validly served?** A notice to a stale email may not be effective service. What does the **agreement** say about the mode of notice? That clause decides this.
2. **Was the OC valid for this unit?** A **part-OC** not covering the client's wing or floor is not an OC for this purpose.
3. **Was the flat actually ready to be possessed?** An offer of possession of a unit with incomplete work or without services is arguably not a valid offer at all.

Client exposure: roughly 3.5 months of maintenance and municipal taxes, plus interest on the final instalment — real money, and largely avoidable.

What should have happened — and this is the agent's job: after the Agreement for Sale, you should have (a) ensured the promoter had **current contact details**, (b) told the client the **2-month clock** exists, and (c) set your own reminder to watch for the OC. This is exactly the "After the transaction" section of the Module 5 compliance checklist. A five-minute follow-up would have saved the client a few lakh rupees — and it is the kind of thing that generates referrals for the next decade.

9. Quiz — 10 questions

1. Name the five rights under s.19(1)–(5).
2. Within how long must an allottee take possession after OC?
3. Does interest run only against the promoter? Explain.
4. What are the allottee's two options under s.18 for delayed possession?
5. What is the difference between what the Authority awards and what the Adjudicating Officer awards?
6. What must a **promoter** deposit before appealing, and within what time?
7. State the penalty on an **allottee** for disobeying an Authority order; a Tribunal order.
8. What is the maximum imprisonment for a promoter under s.59(2)? For an agent under s.66?
9. Under s.69, who is deemed guilty when a company commits an offence, and what are the defences?
10. Which section bars civil courts, and which section allows compounding?

Answers

1. Information on sanctioned/layout plans and specifications; stage-wise time schedule incl. water, sanitation, electricity; possession (and association's possession of common areas); refund with interest and compensation under s.18; documents and plans including common areas after possession.
2. **2 months** from issue of the Occupancy Certificate — s.19(10).
3. **No.** Interest is symmetrical — promoter pays for delayed possession (s.18), allottee pays for delayed payment (s.19(7)), **at the same prescribed rate.**
4. **Withdraw** — full refund with interest plus compensation; or **stay** — interest for every month of delay until possession.
5. Authority: orders, directions, **interest**, penalty, refund. Adjudicating Officer (s.71): **compensation** under ss.12, 14, 18, 19.
6. **At least 30%** of the penalty, or the total amount payable to the allottee including interest and compensation, **whichever is higher**; within **60 days** — s.43(5).
7. **s.67** — daily penalty up to 5% of the cost (Authority). **s.68** — **imprisonment up to 1 year** and/or fine up to **10%** (Tribunal).
8. Promoter s.59(2): **3 years**. Agent s.66: **1 year**.
9. Every person in charge of and responsible to the company for the conduct of its business, **and the company itself**. Defences: the offence was committed **without their knowledge**, or they exercised **all due diligence** to prevent it. Directors/managers/secretaries are also liable where there is consent, connivance or neglect.
10. **s.79** bars civil courts; **s.70** allows compounding of offences punishable with imprisonment.

10. Interview questions

- "A buyer's possession is 18 months late. Walk me through their options."
 - "Client wants to stop paying because the builder is behind. What do you advise?"
 - "When would you recommend conciliation over a complaint?"
 - "Explain the difference between interest and compensation under RERA."
 - "A defect shows up in year four. What's the position?"
 - "Can an allottee be penalised under RERA? Give me the sections."
-

11. Key terms

s.18 refund/interest · s.19 rights & obligations · Prescribed rate of interest · s.31 complaint · Adjudicating Officer (s.71) · s.72 factors · Conciliation Forum · Appellate Tribunal · 30% pre-deposit · s.79 bar of jurisdiction · s.70 compounding · Defect liability · Deemed conveyance · Arrears of land revenue

12. One-page revision sheet

Rights (s.19(1)-(5)): plans · schedule · possession · refund+interest+compensation · documents after possession. **Obligations (s.19(6)-(11)):** pay on time · **interest if late** · form the association · **possession within 2 months of OC** · register the conveyance.

Interest runs BOTH WAYS at the same prescribed rate.

s.18 delay → allottee elects: **WITHDRAW** (full refund + interest + compensation) **or STAY** (monthly interest until possession).

Ladder: Conciliation → Authority (s.31) → Adjudicating Officer (s.71, compensation only) → Tribunal (s.43, 60 days, promoter deposits ≥30%) → High Court (s.58, law only). s.79 — civil courts barred.

Penalties — memorise the pattern:

	NON-REGISTRATION	OTHER	DISOBEY AUTHORITY	DISOBEY TRIBUNAL
Promoter	s.59: 10% (+3 yrs if continued)	s.60/61: 5%	s.63: 5%	s.64: 3 yrs / 10%
Agent	s.62: ₹10k/day, 5% cap	—	s.65: 5%	s.66: 1 yr / 10%
Allottee	—	—	s.67: 5%	s.68: 1 yr / 10%

s.69 companies — persons in charge deemed guilty; defences: no knowledge / due diligence. s.70 compounding. s.14(3) defects: **5 years** / 30 days.

Due Diligence

Official syllabus: MATP Module 8 — Verify Promoter Identity & Project Details on MahaRERA · Title of Property · Building Approvals & Commencement Certificate · Status of Tax Payments · Litigations against the Project · Allotment Letter & Model Form of Agreement · MahaRERA Carpet Area. *(The website numbers these 9.1–9.7 — a numbering error on their page. Content is identical.)* **Exam weight:** ● High. **Job value:** the highest of any module. **Time:** 5–6 hours.

1. What I need to learn

How to find the problem **before** your client's money moves.

Everything in this module is one idea: **every claim must trace to a document, and every document must trace to an issuing authority.** A statement with no document behind it is marketing.

Scope note: the official syllabus for this module doesn't separately list **Occupancy Certificate** or **encumbrance search**. Both are included below because no competent agent works without them — but they are marked 🚩 **beyond-syllabus** so you know what's examinable and what's professional practice.

2. ● Professional Real-Estate Due-Diligence Checklist

A. Promoter and registration

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
Promoter legal identity	Registration record; incorporation docs	MahaRERA project search	Brand ≠ legal entity; brand-new SPV with no history	Get the exact entity name; search its other projects
Promoter track record	s.4(2)(b) disclosure — last 5 years	MahaRERA promoter search	Delays, lapsed registrations, repeated extensions	Score under the Module 6 Framework
Project registration	Registration number & status	MahaRERA project record	Not registered / lapsed / de-registered	Stop. s.10(a) applies to you
Registration validity	Proposed completion date; extensions	Project record	Date passed; multiple extensions	Ask for the original date and each extension's ground
Phase coverage	Phase-wise registrations	Project record	Tower being sold isn't in any registration	Stop. Each phase registers separately
Complaints & orders	Decided matters	Orders & Judgments	Multiple s.18 complaints; non-compliance with orders	Disclose in writing to the client

B. Title and land

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
Title of property	Title Certificate / Search Report by an advocate (30-year search customary 📁)	Promoter; independent advocate	No title certificate; search shorter than 30 years; qualified opinion	Commission an independent search — never rely only on the promoter's
Land ownership	7/12 extract (rural) or Property Card (urban); Index II	IGR Maharashtra; City Survey Office	Owner ≠ promoter with no explanation	Trace the chain document by document
Development rights	Development Agreement / JDA , Power of Attorney, registered	IGR (registered document)	Unregistered DA; expired POA; landowner not a co-promoter	Insist the landowner be a co-promoter on the registration
Chain of title	Prior sale deeds, mutation entries	IGR; revenue records	Gap in the chain; unexplained transfer	Do not proceed until reconciled

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
Land use / zoning	Development Plan remarks; DCPR 2034	MCGM / planning authority	Land reserved for a public purpose; wrong zone	Get DP remarks in writing
🚩 Encumbrances	Encumbrance/search report ; charge registers	IGR; MCA (for company charges)	Undisclosed mortgage; lender charge with no NOC route	Ask which lender, and the per-unit NOC process

C. Approvals and construction

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
IOD	Intimation of Disapproval with conditions	MCGM / planning authority; AutoDCR	Conditions unmet	Read the conditions, not just the cover page
Commencement Certificate	CC with floor coverage stated	MahaRERA record; AutoDCR	No CC; CC covers fewer floors than sold	Match CC floors against the unit's floor. Mismatch = stop
Sanctioned plans	Approved floor & layout plans	MahaRERA uploads; AutoDCR	Brochure shows towers/amenities absent from the plan	Compare page by page
NOCs	Fire, environment, aviation, traffic, water	Promoter; issuing authority	Missing on a high-rise	Ask for each, with date and authority
Construction progress	QPR , Forms 1/2/3	MahaRERA project updates	Missing quarters; flat percentages	Cross-check with a site visit
🚩 Occupancy Certificate	OC (full or part), wing/floor coverage	MCGM; Check application status	Possession offered with no OC; part-OC not covering the unit	Never allow possession without an OC covering that unit

D. Financial and statutory

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
Status of tax payments	Property tax receipts; municipal dues	MCGM property tax portal; promoter	Arrears; dues carried into the society	Get current receipts; make clearance a condition
Project bank accounts	Collection / Separate / Transaction	Registration disclosure	Accounts encumbered, or not with one scheduled bank	Ask which bank; confirm the 70% account exists
Ready reckoner value	Annual Statement of Rates	IGR e-ASR	Agreement value far below ASR	Stamp duty is charged on the higher of the two — see Module 10
GST position	Cost sheet; OC status	Promoter; cost sheet	GST charged on a completed (OC-received) unit	⚠ Under-construction only — see Module 10
Loan eligibility	Lender's APF / project approval list	Bank/HFC	No major lender has approved the project	A lender's refusal is a due-diligence signal, free of charge

E. Documents and area

CHECK	DOCUMENT / SOURCE	WHERE TO VERIFY	🚩 RED FLAG	ACTION
Allotment letter	Proforma uploaded under s.4(2)(g)	MahaRERA record	Not uploaded; cancellation deduction above the capped 2%	Compare against MahaRERA's model allotment letter
Agreement for Sale	Proforma + deviation sheet	MahaRERA record	Deviations from Annexure A not highlighted	Read the deviation sheet line by line
MahaRERA carpet area	Declared carpet area for the unit type	MahaRERA apartment details	Cost sheet quotes "saleable"/"super built-up"; agreement carpet < disclosed carpet	Get carpet in writing , and matched across all three documents
Parking	Parking disclosure; sanctioned plan	MahaRERA; plans	Parking "sold" separately with no basis in the plan	Confirm what is actually allotted and how
Common areas & amenities	Disclosure; sanctioned plan	MahaRERA	Brochure amenities absent from the plan	Only what's in the plan and the agreement is real
Payment schedule	Agreement's payment plan	Draft agreement	Front-loaded, not construction-linked; >10% before registered AFS	⚖ s.13 — flag immediately

3. The three cross-checks that catch most problems

Most defects surface from three comparisons. Do these every single time.

① **Brochure vs sanctioned plan.** Towers, floors, unit mix, amenities. Anything in the brochure and not in the plan does not exist yet.

② **CC floor coverage vs the unit's floor.** The single most under-checked item in Mumbai new-build sales.

③ **Carpet area — disclosure vs cost sheet vs draft agreement.** All three must state the **same number**. If they don't, you've found either an error or a practice.

4. Case study — walking a project through

Honesty note. I could not access the MahaRERA portal from the environment this course was built in, so I have **not** reproduced any real project's registration number, QPR history or disclosures — inventing those would be worse than useless to you. Instead: **Part A** is a fully worked **constructed composite** (clearly labelled) built from the real patterns described in this module, so the method hangs together end to end. **Part B** is the live assignment on a real project, which is the version that actually trains you.

Part A — worked example (*constructed composite — not a real project*)

"Sunteck-style redevelopment, Borivali East" — 2 towers, 34 floors, 3BHK, quoted ₹2.95 crore.

STEP	FINDING	READ
1 Search	Found under a project name different from the brand on the hoarding	Normal — SPV. Note the legal entity
2 Status	Registered, active; completion Dec 2027	✓
3 Promoter	SPV incorporated 2021; parent has 6 completed projects, 2 delayed by ~14 months	● Track record mixed
4 Progress	Declared 38%; 3 slabs cast	✓ Consistent
5 Completion date	Original Dec 2026 → extended once to Dec 2027, ground: approval delay	● Approval delay is arguably not force majeure. Ask
6 Land	Society redevelopment; society owns land, developer holds development rights	🚩 Society is not a co-promoter
7 Approvals	IOD present; CC covers up to floor 22	🚩 Unit is on floor 29
8 Plans	Sanctioned plan shows 2 towers ✓; brochure shows a rooftop infinity pool not in the plan	🚩
9 Buildings	Unit exists in disclosed inventory	✓
10 Carpet	Disclosure 968 sq ft ; cost sheet quotes "1,340 sq ft saleable"	● Loading 38% — must be stated as carpet
11 QPR	4 consecutive filings, on time	✓ Good signal
12 Litigation	One pending society dispute over the redevelopment agreement	🚩 Title-adjacent
13 Encumbrance	Construction finance mortgage disclosed, NOC per unit at registration	✓ Normal and disclosed
14 Possession	Not applicable yet	—
15 Other	Proformas uploaded; deviation sheet present but deviations not highlighted	🚩

The five-line note:

34-floor society redevelopment in Borivali East by an SPV of a mid-tier developer with a mixed delivery record. QPR discipline is good and progress is real. **Three live issues: the CC covers 22 floors against a 29th-floor unit; the society is not a co-promoter despite owning the land; and there is a pending society dispute on the redevelopment agreement.** The 38% loading means the real price is ₹30,475/carpet sq ft, not the ₹22,015/sq ft being quoted. **Not recommendable until the amended CC and the society dispute status are produced in writing.**

Notice what happened: nothing here required insider access. Every finding came from the portal, the brochure and arithmetic. That is the whole job.

Part B — your live assignment

Pick a **real** under-construction project in Mumbai, Thane or Navi Mumbai — one you can see advertised. Then:

1. Run the **15-step investigation** (Module 4) and the **checklist** above.
2. Pull the actual registration number, promoter entity, completion date, QPR history and carpet area **from the live portal**.
3. Cross-check land ownership at **IGR Maharashtra** and building approvals at **MCGM AutoDCR**.
4. Search the promoter at **Orders & Judgments**.
5. Run the three cross-checks in §3.
6. Write your own five-line note.

Do this for **three projects**. After the third, you will be better at this than most working agents.

5. Official reading

PRIORITY	RESOURCE	READ	WHY
	MahaRERA — Guide for Promoters: documents & forms	The full document list	The definitive due-diligence index — what must be filed is what you may demand

7. Deep dive

Developer Land Acquisition Due Diligence Checklist (2026) — LegiScore  <https://legiscore.in/blog/developer-land-acquisition-due-diligence-checklist> **Read:** the title and encumbrance sections. **Why:** shows due diligence from the **developer's** side. Knowing what a developer checks before buying land tells you what to ask them about the land they bought.

Taxmann — Real Estate Documentation under RERA  <https://www.taxmann.com/post/blog/understanding-real-estate-documentation-allotment-letters-agreements-for-sale-and-sale-deeds-under-rera/> **Read:** the comparison of allotment letter / agreement for sale / sale deed. **Why:** the documents in section E of the checklist, explained properly.

8. Practical exercise 🛠️

Build your own due-diligence pack (2 hours).

Turn the checklist above into a **one-page PDF** you can hand to a client, with three columns: *What we checked* · *What we found* · *What we still need*.

Then fill it in for one live project. **This document is your product.** Most agents in Mumbai cannot produce anything like it; the ones who can charge more and get referred more.

9. Quiz — 10 questions

1. Name the seven due-diligence heads in the official syllabus for this module.
2. Where do you verify land ownership in urban Mumbai, and what document do you look for?
3. What is the customary search period for a title report? Is that law or practice?
4. What must you match the CC against?
5. Where do you check whether a project's promoter has adverse MahaRERA orders?
6. Which three documents must state the same carpet area?
7. What does a part-OC mean for a buyer's possession?
8. Stamp duty is calculated on which value?
9. Why is a lender's refusal to approve a project useful information?
10. What is the cap on deduction if an allottee cancels, under the model allotment letter?

Answers

1. Verify promoter identity & project details on MahaRERA · title of property · building approvals & commencement certificate · status of tax payments · litigations against the project · allotment letter & model form of agreement · MahaRERA carpet area.
2. **IGR Maharashtra** / City Survey Office — the **Property Card** (urban) or 7/12 extract (rural), plus Index II for registered documents.
3. **30 years** — that is 📁 **practice/custom**, not a statutory requirement. Don't present it as law.
4. The **floor of the unit being sold**. A CC covering fewer floors than the unit is a stop.
5. **MahaRERA Orders & Judgments**, searching by promoter as well as project.
6. The **MahaRERA disclosure**, the **cost sheet**, and the **draft Agreement for Sale**.
7. It covers only specified wings/floors. If the buyer's unit isn't covered, there is effectively **no OC for that unit** and possession should not be taken.
8. The **higher** of the agreement value and the **ready reckoner (ASR)** value.
9. Lenders run their own independent legal and technical due diligence before granting project approval (APF). A refusal is a free second opinion.
10. **2%** — MahaRERA's model allotment letter caps the deduction on cancellation by the allottee at 2%.

10. Interview questions 🎤

- "Take me through your due-diligence process."
 - "What would make you walk away from a deal?"
 - "How do you verify title? Do you rely on the developer's title certificate?"
 - "What's the difference between IOD, CC and OC?"
 - "A client is buying resale. What's different about your checks?"
 - "How do you check carpet area is genuine?"
-

11. Key terms

Title certificate · Search report · 7/12 extract · Property Card · Index II · Mutation · Encumbrance certificate · Development Agreement / JDA · IOD · CC · Part-OC / Full OC · APF · ASR / ready reckoner · Deviation sheet · Loading · AutoDCR · e-ASR

12. One-page revision sheet

Rule: every claim traces to a **document**; every document traces to an **issuing authority**.

Five heads: Promoter/registration · Title & land · Approvals & construction · Financial & statutory · Documents & area.

The three cross-checks: ① brochure vs **sanctioned plan** ② **CC floor coverage** vs the unit's floor ③ **carpet area:** disclosure = cost sheet = agreement

The five stops: no/lapsed registration · unit not in registered inventory · CC doesn't cover the floor · possession without a covering OC · undisclosed title litigation or encumbrance.

Where to look: MahaRERA (registration, disclosures, QPR, orders) · **IGR** (title, Index II, encumbrance, ASR) · **MCGM AutoDCR** (IOD, CC, plans, OC) · **MCA** (company charges) · lender's APF.

Stamp duty on the HIGHER of agreement value and ASR. Cancellation deduction capped at 2% (model allotment letter). 30-year title search =  practice, not law.

Sales Process, Forms & Agreements

Official syllabus: MATP Module 9 — 9.1 Allotment Letter (9.1.1 Model Allotment Letter) · 9.2 Model Form of Agreement · 9.3 Applicability of TDS to purchase of apartment and brokerage payment · 9.4 Basic Knowledge of Home and Mortgage Loan. (*The website numbers these 10.1–10.4 — a numbering error on their page.*) **Exam weight:** ● High. **Time:** 4–5 hours.

1. What I need to learn

The transaction, end to end, and the three documents that carry it: **allotment letter**, **Agreement for Sale**, **conveyance/sale deed**. Plus the money mechanics — TDS and home loans — that decide whether a deal actually closes.

2. The sales process

LEAD → QUALIFICATION → SITE VISIT → NEGOTIATION → BOOKING → ALLOTMENT LETTER
→ AGREEMENT FOR SALE → REGISTRATION → PAYMENT (construction-linked) → POSSESSION

STAGE	WHAT HAPPENS	YOUR JOB	COMPLIANCE POINT
Lead	Enquiry from an ad, portal, referral	Capture and qualify fast	Ad must carry registration no. + QR (Order 46C/2025)
Qualification	Budget, loan eligibility, timeline, end-use vs investment	Qualify hard. An unqualified buyer wastes months	Don't overstate what they can afford
Site visit	Show flat, sample, location	Bring the portal record , not just the brochure	s.10(d) — facilitate information
Negotiation	Price, floor rise, parking, payment plan, freebies	Get everything in writing	Oral promises bind nobody
Booking	Token/booking amount	Payment to the promoter's collection account only	⚖️ s.13 — 10% cap without registered AFS
Allotment letter	Promoter confirms allotment	Check against MahaRERA's model allotment letter	Cancellation deduction capped at 2%
Agreement for Sale	The real contract	Compare against Annexure A + deviation sheet	⚖️ s.13(1) — must be registered
Registration	Stamped and registered at the Sub-Registrar	Ensure it actually happens	Registration Act, 1908
Payment	Construction-linked instalments	Track against QPR	⚖️ s.19(6)–(7) — interest on delay
Possession	After OC	Watch for OC; 2-month clock	⚖️ s.19(10)

👛 **A practical note on qualification:** in Mumbai, the most common reason a deal dies is that the buyer's loan eligibility was never checked against the **all-in** cost (Module 10), only the base price. Do the all-in number at qualification, not at booking.

3. The documents

3.1 Allotment Letter (syllabus 9.1)

What it is → The promoter's written confirmation that a specific unit is allotted to a specific buyer, on stated terms, on receipt of the booking amount. It is the **first binding document** in most transactions.

Who signs → Promoter and allottee.

When used → At booking, before the Agreement for Sale.

Important clauses →

- Unit identification: tower, floor, unit number
- **RERA carpet area** — must match the disclosure
- Total consideration and the breakdown of other charges
- Payment schedule
- **Cancellation and forfeiture terms**
- Possession date
- That an Agreement for Sale will be executed and registered

🚩 **Red flags** → No carpet area stated, or "saleable area" used instead · forfeiture above the capped percentage · a possession date different from the MahaRERA declaration · consideration that doesn't reconcile with the cost sheet · an allotment letter used as a substitute for the Agreement for Sale beyond the 10% threshold.

3.1.1 The Model Allotment Letter ⚖️🔔

MahaRERA **prescribed a model allotment letter** and required promoters to upload their proforma (the s.4(2)(g) obligation). Key features:

- It sets a **minimum period within which the allottee may cancel** the booking.
- It **caps the penalty the promoter may deduct at 2%** of the consideration on cancellation by

the allottee, or on non-payment of the balance booking amount/advance.

- The promoter may amend the model **only in the allottee's favour** — i.e. only to **increase** the

cancellation window or **decrease** the deduction percentage. Not otherwise.

- Deviations from the model proforma must be **highlighted in a different colour** and uploaded.

🔴 This is a genuine, concrete, client-facing thing you know that most agents don't: **a buyer who cancels cannot lawfully be charged more than 2%** under the model letter. Agents routinely watch clients lose 10% because nobody told them.

🔔 Verify the current model and its terms at [MahaRERA — Resources for Homebuyers](#) and the [Orders index](#).

3.2 Model Form of Agreement for Sale (syllabus 9.2) ⚖️

Source of the obligation: s.13 of the Act + **Rule 10 and Annexure A** of the **Maharashtra RERA Rules, 2017**.

What it is → The principal contract of sale for an under-construction unit. **Rule 10** prescribes the model form at **Annexure A**.

Who signs → Promoter and allottee (and the landowner/confirming party where relevant).

When used → Before more than **10%** of the cost is taken — and it must be **registered**.

How much may be changed: the promoter **may** modify Annexure A, **provided** the agreement remains in conformity with **s.13(2)** and the rules and regulations. But:

- Clauses that are **mandatory under the Act must be retained** in every agreement.
- Provisions **contrary to statutory conditions are not binding** on the parties.
- Deviations/modifications must be **highlighted** and uploaded with a **deviation sheet**.

Clauses to read every time:

CLAUSE	WHAT TO CHECK
Carpet area	Matches the MahaRERA disclosure and the cost sheet, in sq m and sq ft
Total consideration	Broken out: base price, floor rise, parking, club, infrastructure, maintenance advance
Payment schedule	Genuinely construction-linked , not date-linked
Possession date	Matches the MahaRERA declaration under s.4(2)(l)(C)
Delay / interest	Interest payable by the promoter at the prescribed rate — not a token amount

CLAUSE	WHAT TO CHECK
Allottee's default	Interest at the same prescribed rate; and what triggers termination
Defect liability	5 years , rectification in 30 days (s.14(3))
Alterations	No change to sanctioned plans without consent; 2/3rds for other alterations
Common areas & amenities	Specifically listed — vague "as decided by the promoter" is a flag
Parking	What exactly is allotted, and on what basis
Conveyance	Timeline for conveyance to the association (s.17)
Force majeure	Narrow and defined, or open-ended? Open-ended is a flag
Dispute resolution	Cannot oust MahaRERA — s.79 bars civil courts

🚩 **Red flags** → Area in "saleable" terms · possession date "tentative" · the promoter's delay interest lower than the allottee's default interest (asymmetry is contrary to the Act's scheme) · open-ended force majeure · unhighlighted deviations · signing an unregistered agreement while paying more than 10%.

3.3 Conveyance Deed / Sale Deed

What it is → The instrument that **transfers title**. The Agreement for Sale creates a right to obtain conveyance; the conveyance actually conveys.

When used → On completion — to the individual allottee for a plot/independent unit, and to the **association of allottees** for the land and building under s.17.

Why it matters → Where a promoter fails to convey, Maharashtra provides for **deemed conveyance** — a route for societies to obtain title without the promoter's cooperation. This is a recurring Mumbai problem worth knowing exists.

4. TDS (syllabus 9.3) ⌚

Two different TDS provisions touch a property transaction. **Do not confuse them.**

4.1 TDS on purchase of an apartment — Section 194-IA

ITEM	POSITION
Who deducts	The buyer
Rate	1% of the consideration
Threshold	Consideration ₹50 lakh or more
On what	The sale consideration (and, per current practice, measured against stamp duty value)
Form	Challan-cum-statement Form 26QB ; certificate Form 16B to the seller
Note	No TAN required — the buyer uses PAN

Worked example: flat at ₹1.20 crore. $TDS = 1\% \times ₹1,20,00,000 = ₹1,20,000$. The buyer pays ₹1,18,80,000 to the seller and ₹1,20,000 to the government via Form 26QB.

🚩 **The classic error:** buyers deduct 1% only on the amount *above* ₹50 lakh. Wrong — **once the threshold is crossed, TDS applies to the whole consideration.**

4.2 TDS on brokerage — Section 194H

ITEM	POSITION
Who deducts	The payer of the commission/brokerage
Rate	2% (reduced from 5% w.e.f. 1 October 2024)
Threshold	Aggregate exceeding ₹20,000 in a financial year
No PAN	20%

ITEM	POSITION
Who must deduct	Individuals/HUFs only where the previous year's turnover exceeded ₹1 crore (business) or gross receipts exceeded ₹50 lakh (profession)

Worked example — your own brokerage: you invoice a developer ₹3,00,000 + GST. TDS u/s 194H = $2\% \times ₹3,00,000 = ₹6,000$. You receive ₹2,94,000 plus the GST component, and claim the ₹6,000 as credit in your return.

🕒 **Time-sensitive.** Rates and thresholds change at Budget. Verify at incometax.gov.in before quoting.

5. Home and mortgage loans (syllabus 9.4) 🕒

5.1 The basics

TERM	MEANING
Principal	Amount borrowed
Interest	Cost of borrowing; floating rates in India are typically linked to an external benchmark (commonly the repo rate)
Tenure	Loan period, up to ~30 years
EMI	Equated Monthly Instalment — see Module 10 for the formula
LTV	Loan-to-Value — the share of property value financed
Down payment	The buyer's own contribution
Pre-EMI	Interest-only payments during construction, before full disbursement
Mortgage	The security interest the lender takes over the property
APF	Approved Project Financing — the lender's pre-approval of a project
Foreclosure	Prepaying and closing early

5.2 🕒 RBI LTV norms

Per the RBI's **Master Circular on Housing Finance**:

LOAN VALUE	INDICATIVE MAXIMUM LTV
Up to ₹30 lakh	90%
Above ₹30 lakh and up to ₹75 lakh	80%
Above ₹75 lakh	75%

Critical detail for your buyer's cash planning: banks must **exclude stamp duty, registration and other documentation charges from the property cost** when computing LTV — except where the cost of the unit does not exceed **₹10 lakh**, in which case they may be included.

What this means in practice: on a ₹1.5 crore Mumbai flat at 75% LTV, the buyer needs **₹37.5 lakh down payment plus roughly ₹9.5 lakh of stamp duty and registration** — about **₹47 lakh in cash**, not ₹37.5 lakh. Agents who don't explain this lose deals at the last moment.

🔗 RBI Master Circular — Housing Finance: <https://www.rbi.org.in/commonman/Upload/English/Notification/PDFs/46MS250915FA.pdf>

5.3 Documents a buyer needs

Salaried: PAN, Aadhaar, 3 months' salary slips, 6 months' bank statements, Form 16 / 2 years' ITR, employment proof, property documents, own-contribution proof. Self-employed: PAN, Aadhaar, 3 years' ITR with computation, audited financials, 6–12 months' bank statements, business proof, property documents.

5.4 Where deals die 🗑️

1. **All-in cost never calculated** — buyer qualified on base price only.
2. **Project not on the lender's APF list** — and no one checked.
3. **Ready reckoner value above agreement value** — extra stamp duty appears late.

4. **Co-applicant's obligations** not counted in the FOIR.

5. **Under-construction disbursement** tranches misunderstood — buyer expects the full amount at booking.

6. 📖 Official reading 🏛️

PRIORITY	RESOURCE	READ	WHY
●	Maharashtra RERA Rules, 2017 (PDF)	Rule 10 + Annexure A in full	The model Agreement for Sale itself. Read every clause once — this is the most valuable single read in the module
●	RERA Act — India Code	s.13, s.17, s.19(6)–(11)	The statutory basis for the documents
●	MahaRERA — Resources for Homebuyers	Model allotment letter & agreement	The current model documents
●	RBI Master Circular — Housing Finance	LTV and risk-weight section	The authoritative LTV position
●	Income Tax Department	194-IA, 194H, Form 26QB	🕒 Current rates and thresholds

7. 🧑🏻🎥 Videos 📺

8. 📄 Deep dive 🟢

Lexology — Agreement for Sale under RERA: Format, Mandatory Clauses and Legal Implications 🔗

<https://www.lexology.com/library/detail.aspx?g=2f05a3ae-ffde-4f1e-96e3-4e86a0d3c0af> **Read:** mandatory clauses and legal implications.

AZB & Partners — MahaRERA: Model Allotment Letter and Agreement for Sale 🔗 <https://www.azbpartners.com/bank/maharera-model-allotment-letter-and-agreement-for-sale/> **Read:** all of it — it's a short, precise note on the 2% cap and the deviation-highlighting requirement.

Taxmann — Allotment Letters, Agreements for Sale and Sale Deeds under RERA 🔗 <https://www.taxmann.com/post/blog/understanding-real-estate-documentation-allotment-letters-agreements-for-sale-and-sale-deeds-under-rera/> **Read:** the comparative treatment of the three documents.

9. 📝 Practical exercise 📌

Mark up a real agreement (2 hours).

1. Download a promoter's **proforma Agreement for Sale** from any project's MahaRERA record.
2. Open **Annexure A** of the Maharashtra Rules alongside it.
3. Go clause by clause. Mark: **M** (matches the model), **D** (deviation), **X** (contrary to the Act).
4. For every **D**, ask: does this favour the promoter or the allottee?
5. Write the three clauses you would negotiate for a buyer.

This is the exercise that turns you from someone who *shows flats* into someone who *advises on contracts*. Do it at least twice.

10. Case study — the ₹42 lakh booking

Your client books a ₹3.1 crore flat in Andheri. The developer asks for **₹42 lakh** as "booking and allotment" — about **13.5%** — against an **allotment letter only**, with the Agreement for Sale "at the time of the 3rd slab, in about five months". The allotment letter says **10% will be forfeited** on cancellation.

Questions: What's wrong, how much, and what do you do?

Analysis

Two distinct breaches.

① **The 10% cap — s.13(1).** The promoter may not accept **more than 10%** of the cost as advance or application fee **without first entering into a registered Agreement for Sale**. 10% of ₹3.1 crore is **₹31 lakh**. The demand of ₹42 lakh exceeds it by **₹11 lakh**. Taking that money without a registered AFS contravenes s.13, attracting penalty under **s.61** (up to 5% of the estimated project cost).

Note the two limbs people miss: the agreement must be **entered into and registered**. A signed-but-unregistered agreement does not unlock the >10% position.

② **The forfeiture clause.** MahaRERA's **model allotment letter caps the deduction at 2%** on cancellation by the allottee, and permits promoters to depart from the model **only in the allottee's favour**. A 10% forfeiture clause is a deviation **against** the allottee. On a ₹3.1 crore flat that's the difference between **₹6.2 lakh** and **₹31 lakh** — a ₹24.8 lakh exposure your client would otherwise never know about.

What you do:

1. Tell the client, **in writing**, both points with the section and the order behind each.
2. Ask the developer to either **cap the booking at ₹31 lakh**, or **execute and register the AFS now**.
3. Ask for the forfeiture clause to be brought to **2%**, and point to the uploaded proforma and deviation sheet on the MahaRERA record — if their uploaded proforma says 2% and the letter they handed your client says 10%, that discrepancy is a strong negotiating fact.
4. If they refuse both: document the advice, and let the client decide with full information.

Your own exposure: facilitating this without raising it engages **s.10(c)** (unfair trade practice / misrepresentation by omission) and **s.10(d)** (failing to facilitate the information the allottee is entitled to). The written note protects your client **and** you.

The wider point: the 10% rule and the 2% cap are the two most commercially valuable things in this entire module. Between them they are worth more to a client than any negotiation on base price.

11. Quiz — 10 questions

1. What is the maximum a promoter may take before a registered Agreement for Sale?
2. Which Rule and which Annexure prescribe the model form of agreement in Maharashtra?
3. May a promoter modify the model agreement? Subject to what?
4. What is the cap on deduction if an allottee cancels under the model allotment letter?
5. In which direction only may a promoter amend the model allotment letter?
6. TDS on purchase of an apartment: section, rate, threshold, form?
7. If a flat is ₹52 lakh, is TDS 1% of ₹52 lakh or of ₹2 lakh?
8. TDS on brokerage: section, current rate, and the date the rate changed?
9. Indicative maximum LTV for a loan above ₹75 lakh, and is stamp duty included in "cost" for LTV?
10. What must be highlighted, and how, when a promoter's agreement deviates from the model?

Answers

1. **10%** of the cost of the apartment/plot/building — s.13(1). And the agreement must be **registered**.
2. **Rule 10** and **Annexure A** of the Maharashtra RERA Rules, 2017.
3. **Yes**, provided it conforms to **s.13(2)** and the rules/regulations; clauses mandatory under the Act must be retained, and provisions contrary to statutory conditions are not binding.
4. **2%** of the consideration.
5. Only **in the allottee's favour** — increasing the cancellation window, or decreasing the deduction percentage.
6. **Section 194-IA**, **1%**, consideration **₹50 lakh or more**, **Form 26QB** (certificate Form 16B).
7. **1% of the entire ₹52 lakh** = ₹52,000. Once the threshold is crossed, TDS applies to the whole consideration.
8. **Section 194H**, **2%**, reduced from 5% with effect from **1 October 2024**. Threshold ₹20,000 in a financial year; 20% without PAN. 🕒 verify.
9. **75%**. Stamp duty, registration and documentation charges are **excluded** from cost for LTV, except where the unit cost does not exceed ₹10 lakh.
10. The **deviations/modifications** must be highlighted **in a different colour** and uploaded with a **deviation sheet**.

12. Interview questions 🎤

- "What's the difference between an allotment letter and an agreement for sale?"
- "A developer wants 15% before the agreement. What do you say?"
- "Which clauses do you always read in an agreement for sale?"
- "Explain TDS on a property purchase to a first-time buyer."
- "Client has ₹40 lakh saved and wants a ₹1.6 crore flat. Does it work?"
- "What is deemed conveyance and why does it come up in Mumbai?"

13. Key terms

Allotment letter · Model allotment letter (2% cap) · Agreement for Sale · Annexure A / Rule 10 · Deviation sheet · Conveyance deed · Deemed conveyance · Construction-linked plan · s.194-IA / Form 26QB / Form 16B · s.194H · LTV · APF · Pre-EMI · FOIR · Foreclosure

14. One-page revision sheet

Chain: Lead → Qualify → Visit → Negotiate → Booking → **Allotment Letter** → **Agreement for Sale (registered)** → Registration → Construction-linked payments → **Possession (OC + 2 months)**.

⚖️ **s.13(1):** max **10%** before a **registered AFS**. Signed ≠ registered. ⚖️ **Model allotment letter:** cancellation deduction capped at **2%**; promoter may deviate **only in the allottee's favour**. ⚖️ **Rule 10 + Annexure A:** the model agreement. Deviations **highlighted in a different colour** + deviation sheet.

TDS: • **194-IA** — buyer deducts **1%** where consideration ≥ **₹50 lakh**, on the **whole** amount. **Form 26QB** → **Form 16B**. • **194H** — **2%** on brokerage (from **1 Oct 2024**), threshold **₹20,000/FY**, **20%** without PAN.

🕒 **LTV:** ≤₹30L → **90%** · ₹30–75L → **80%** · >₹75L → **75%**. **Stamp duty & registration are EXCLUDED from cost for LTV** (unless unit ≤ ₹10 lakh). So cash needed = down payment + **stamp duty + registration**. Say this at qualification, not at booking.

Always check in the agreement: carpet area · possession date · **symmetrical** interest · defect liability 5 yrs/30 days · parking · amenities · force majeure width · conveyance timeline.

Real Estate Calculations

Official syllabus: MATP Module 10 — 10.1 Taxation/Government Fees and Levies (10.1.1 GST · 10.1.2 TDS · 10.1.3 Registration charge · 10.1.4 Stamp duty · 10.1.5 External Development Charges) · 10.2 Cost Sheet Sample and Component details. **Exam weight:** ● High — and numerical questions are the easiest marks to secure. **Time:** 4–5 hours. Do the arithmetic by hand at least once.

🕒 Read this before anything else

Every rate in this module changes. Stamp duty moves with state budgets, GST with the GST Council, TDS with the Union Budget, LTV with RBI circulars, ready reckoner rates annually.

The rates used here reflect the position at the time of writing and are **illustrative for learning the method**. Before you quote a number to a client:

ITEM	VERIFY AT
Stamp duty, registration, ready reckoner	IGR Maharashtra · e-ASR
GST	CBIC / GST Council
TDS	Income Tax Department
LTV	RBI Master Circular — Housing Finance

Learn the method. Look up the rate. That is the professional habit.

The master example — one flat, all the maths

Everything below runs through a single flat so the numbers connect.

Flat A — Goregaon East, Mumbai. Under construction. RERA carpet area: 750 sq ft · Saleable quoted: 1,050 sq ft · Quoted rate: ₹20,000/sq ft on saleable Agreement value: $1,050 \times ₹20,000 = ₹21,00,000$

1. Carpet area and loading

Concept → Under s.2(k) you must sell on **carpet area**. "Saleable" or "super built-up" is a marketing number with no statutory definition.

Loading is the gap.

Formula →

$$\begin{aligned}\text{Loading \%} &= (\text{Saleable area} - \text{Carpet area}) \div \text{Carpet area} \times 100 \\ \text{Effective rate on carpet} &= \text{Agreement value} \div \text{Carpet area}\end{aligned}$$

Example → Loading = $(1,050 - 750) \div 750 \times 100 = 40\%$ Effective rate = $₹21,00,000 \div 750 = ₹28,000$ per carpet sq ft

Mumbai reality 🏠 → Loading commonly runs 30–45%. Two flats quoted at "₹20,000/sq ft" with loadings of 30% and 45% differ by roughly **₹3,000 per carpet sq ft** in real terms. **Always re-quote on carpet before comparing anything.**

60 sq m = **645.8 sq ft**. Keep that conversion handy — the GST affordable-housing test uses square metres of carpet area.

Practice → Flat B: carpet 620 sq ft, saleable 930 sq ft, agreement value ₹1,58,10,000. Loading? Effective carpet rate? Which is better value, A or B?

Answer

Loading = $(930 - 620) / 620 = 50\%$. Effective = $1,58,10,000 \div 620 = \text{₹}25,500/\text{carpet sq ft}$. **B is better value on carpet** (₹25,500 vs ₹28,000) despite the far worse loading — which is exactly why you compare on carpet, not on loading and not on the quoted rate.

2. Stamp duty (syllabus 10.1.4)

Concept → A state tax on the instrument, payable to Maharashtra, levied on the **higher of the agreement value and the ready reckoner (ASR) value**.

🕒 **Mumbai rates (illustrative — verify at IGR):**

BUYER	BASE	METRO CESS	TOTAL
Male / joint (with a male)	5%	1%	6%
Female sole owner	4%	1%	5%

The 1% **Metro Cess** funds metro rail expansion and applies within Mumbai municipal limits. The women's concession applies where a woman is the **sole owner**; joint ownership with a male co-owner attracts the blended rate.

Formula → Stamp duty = Applicable % × HIGHER of (Agreement value, ASR value)

Example →

- Male buyer: $6\% \times \text{₹}2,10,00,000 = \text{₹}12,60,000$
- Female sole buyer: $5\% \times \text{₹}2,10,00,000 = \text{₹}10,50,000$ (saves ₹2,10,000)

The ready reckoner trap 🚩 → If the **ASR value is ₹2,25,00,000** while the agreement value is ₹2,10,00,000, stamp duty is charged on **₹2,25,00,000**: $6\% \times 2,25,00,000 = \text{₹}13,50,000$ — **₹90,000 more** than the buyer budgeted. **Always check e-ASR before quoting stamp duty.**

Practice → Female sole buyer, agreement value ₹95,00,000, ASR value ₹1,02,00,000. Stamp duty?

Answer

Higher value = ₹1,02,00,000. $5\% \times 1,02,00,000 = \text{₹}5,10,000$.

3. Registration charge (syllabus 10.1.3)

Concept → The fee for registering the instrument under the Registration Act, 1908.

🕒 **Maharashtra (illustrative):**

Property value > ₹30 lakh → ₹30,000 (capped)
Property value ≤ ₹30 lakh → 1% of value

Example → Flat A: value ₹2.1 crore > ₹30 lakh → **₹30,000**

Practice → Agreement value ₹28,00,000. Registration charge?

Answer

$1\% \times 28,00,000 = \text{₹}28,000$ (below the ₹30 lakh threshold, so 1% applies, not the cap).

4. GST (syllabus 10.1.1)

Concept → GST applies **only to under-construction** property sold by a promoter. A completed unit with an **Occupancy Certificate** is **outside GST entirely** — it's a transfer of immovable property.

🕒 **Rates (illustrative — verify at CBIC):**

CATEGORY	RATE	ITC
Affordable residential	1%	No ITC
Other residential (under construction)	5%	No ITC
Ready with OC / resale	0%	—

Affordable housing test — both conditions must hold:

- Consideration $\leq$ ₹45 lakh, and
- Carpet area $\leq$ 60 sq m in metros ($\leq$ 90 sq m non-metro). *Mumbai is a metro.*

ITC note: Input Tax Credit is **not available** to residential buyers — blocked under s.17(5)(d) of the CGST Act. Even a GST-registered business buyer cannot claim the 1% or 5% back.

Example → Flat A: 750 sq ft = 69.7 sq m (>60) and ₹2.1 crore ($>$ ₹45 lakh) → **not affordable**. GST = $5\% \times ₹2,10,00,000 = ₹10,50,000$

Practice → Flat in Mumbai: carpet 58 sq m, agreement value ₹43,00,000. GST?

Answer

Both tests pass (≤ 60 sq m **and** $\leq ₹45$ lakh) → **1% = ₹43,000**. If either failed, it would be 5%.

5. TDS ⓘ (syllabus 10.1.2)

5.1 On the purchase — s.194-IA

1% of consideration where consideration is **₹50 lakh or more**. Buyer deducts, files **Form 26QB**, issues **Form 16B**. **On the whole amount, not the excess over ₹50 lakh.**

Example → $1\% \times ₹2,10,00,000 = ₹2,10,000$ The buyer pays ₹2,07,90,000 to the promoter and ₹2,10,000 to the government.

This is not an extra cost. It is part of the consideration, routed to the government. Agents confuse buyers constantly on this point.

5.2 On brokerage — s.194H ⓘ

2% (from 1 Oct 2024), threshold **₹20,000** per financial year, **20%** without PAN.

Example — your own fee on Flat A at 2% brokerage:

LINE	AMOUNT
Brokerage (2% of ₹2,10,00,000)	₹4,20,000
GST @18% (if you're registered)	₹75,600
Gross invoice	₹4,95,600
Less TDS u/s 194H @2% on ₹4,20,000	(₹8,400)
Received in bank	₹4,87,200
Less GST to remit	(₹75,600)
Retained (before your costs)	₹4,11,600

The ₹8,400 TDS is **not lost** — it's credit against your income tax liability.

Practice → Brokerage ₹1,80,000, you are GST-registered. What do you receive and what's the TDS?

Answer

GST 18% = ₹32,400 → invoice ₹2,12,400. TDS $2\% \times 1,80,000 = ₹3,600$. Received = ₹2,08,800. Remit ₹32,400 GST. Retained ₹1,76,400, plus ₹3,600 TDS credit.

6. External Development Charges (syllabus 10.1.5)

Concept → Charges levied by a development/planning authority to fund external infrastructure — roads, water, sewerage, drainage — outside the project boundary. Related levies include Infrastructure Development Charges, betterment charges, premium FSI charges and open-space deficiency charges.

Important Maharashtra note: "EDC" as a named, standardised levy is most prominent in states like Haryana. In Maharashtra and especially Greater Mumbai, the equivalent burden appears as **development charges, premiums (including premium FSI), and various planning-authority levies** under the MRTP Act and DCPR 2034, varying by authority — MCGM, MMRDA, CIDCO, and municipal corporations in the MMR.

What matters to you: these are **developer costs that end up in your buyer's price**, and they sometimes appear as separate line items in a cost sheet. If a cost sheet has an "infrastructure charge" or "development charge" line, ask what it is and whether it is already in the agreement value or on top. ⌚ Rates are authority-specific — verify with the planning authority.

7. The cost sheet (syllabus 10.2) — Flat A, fully built up

This is the single most useful table in the module. **This is what a real cost sheet should look like.**

#	COMPONENT	BASIS	AMOUNT (₹)
A	Agreement value	1,050 saleable × ₹20,000	2,10,00,000
B	GST @ 5% (under construction)	5% of A	10,50,000
C	Stamp duty @ 6% (male buyer)	6% of higher of A / ASR	12,60,000
D	Registration charge	capped	30,000
E	Club / amenities membership 	one-time	3,00,000
F	Maintenance advance 	12 months	2,50,000
G	Legal & documentation 	one-time	50,000
	TOTAL ACQUISITION COST	A+B+C+D+E+F+G	₹2,39,40,000

 GST may also apply to items E–G depending on how they are structured. Ask. TDS of ₹2,10,000 is **within** A, not additional.

The two numbers to show every client:

Headline quoted	₹20,000 / saleable sq ft
Actual all-in cost	₹2,39,40,000 ÷ 750 carpet sq ft = ₹31,920 / carpet sq ft

The all-in cost is 14% above the headline agreement value, and the true per-square-foot cost is about 60% above the quoted rate. Neither number is a trick — both are real. An agent who leads with this builds trust permanently; one who hides it gets found out at registration.

8. Home loan mathematics

8.1 LTV and down payment ⌚

LOAN	MAX LTV
≤ ₹30 lakh	90%
₹30–75 lakh	80%
> ₹75 lakh	75%

 Stamp duty, registration and documentation charges are excluded from "cost" for LTV (except where the unit costs ≤ ₹10 lakh). The buyer funds those from their own pocket.

Flat A cash requirement:

LINE	AMOUNT (₹)
Property value	2,10,00,000
Loan @ 75% LTV	1,57,50,000
Down payment (25%)	52,50,000
GST	10,50,000
Stamp duty	12,60,000
Registration	30,000
Other (club, maintenance, legal)	6,00,000
TOTAL CASH NEEDED	₹81,90,000

 **This is where Mumbai deals die.** The buyer budgeted ₹52.5 lakh and needs **₹81.9 lakh** — a **₹29.4 lakh gap**. Run this calculation at **qualification**, not at booking.

8.2 EMI

Formula →

$$EMI = \frac{P \times r \times (1 + r)^n}{(1 + r)^n - 1}$$

P = principal r = monthly rate (annual ÷ 12 ÷ 100) n = months

Example → P = ₹1,57,50,000 · 8.5% p.a. · 20 years r = 0.085 ÷ 12 = 0.0070833 · n = 240 · (1+r)²⁴⁰ ≈ 5.4412

EMI = (1,57,50,000 × 0.0070833 × 5.4412) ÷ (5.4412 - 1) = ≈ **₹1,36,700 per month**

	AMOUNT
Total repaid over 20 years	₹3,28,00,000 (approx.)
Principal	₹1,57,50,000
Total interest	≈ ₹1,70,50,000

The interest exceeds the principal. Say this to every buyer. Then show them what a shorter tenure does — it is the highest-value financial advice you can give for free.

Practice → P = ₹80,00,000, 9% p.a., 15 years. Estimate the EMI.

Answer

r = 0.0075, n = 180, (1.0075)¹⁸⁰ ≈ 3.838. EMI = (80,00,000 × 0.0075 × 3.838) ÷ 2.838 = 2,30,280 ÷ 2.838 ≈ **₹81,140/month**.

8.3 FOIR

FOIR = All monthly obligations ÷ Net monthly income. Lenders typically cap around **50–60%**. An EMI of ₹1,36,700 at a 55% FOIR implies a net monthly income around **₹2.5 lakh** — before any other loan. Check this at qualification.

9. Investment metrics

9.1 Rental yield

Gross yield = Annual rent ÷ Total acquisition cost × 100

Net yield = (Annual rent - maintenance - property tax - vacancy) ÷ Total acquisition cost × 100

Example → Flat A rents at ₹65,000/month → ₹7,80,000/year. Gross (on all-in ₹2,39,40,000) = **3.26%** · Gross (on agreement value) = 3.71%
Net, after ₹90,000 outgoings = **2.88%**

🏠 **Mumbai residential gross yields typically run ~2.5–3.5%.** Commercial runs materially higher. A client told to expect 6% residential yield in Mumbai has been misled — and if you said it, you have a **s.10(c)** problem.

9.2 Capital appreciation and CAGR

$$\text{CAGR} = ((\text{Final} \div \text{Initial})^{(1 \div \text{years})} - 1) \times 100$$

Example → All-in ₹2,39,40,000; sold after 5 years at ₹2,95,00,000. Ratio 1.2322 → **CAGR ≈ 4.27%**

9.3 ROI

$$\text{Simple ROI} = (\text{Sale price} - \text{Total acquisition cost}) \div \text{Total acquisition cost} \times 100$$

= (2,95,00,000 – 2,39,40,000) ÷ 2,39,40,000 = **23.2% over 5 years**

🚩 **The honest version:** this ignores the interest paid, the rent received, brokerage on exit, and capital gains tax. Comparing a *gross sale price* against an *all-in cost* is the most common way property returns get overstated. Total return = rental income + appreciation – all costs – financing – tax.

Practice → Bought all-in ₹1,20,00,000, sold at ₹1,85,00,000 after 7 years. CAGR? Simple ROI?

Answer

Ratio = 1.5417. CAGR = $1.5417^{(1/7)} - 1 \approx$ **6.4% p.a.** Simple ROI = 65,00,000/1,20,00,000 = **54.2% over 7 years.**

10. 📖 Official sources 🏛️

ITEM	OFFICIAL SOURCE
Stamp duty, registration, ready reckoner (ASR)	IGR Maharashtra · About the ASR / e-ASR
GST rates and notifications	CBIC
TDS — 194-IA, 194H, Form 26QB	Income Tax Department
LTV and housing finance norms	RBI Master Circular — Housing Finance
Carpet area definition	RERA Act s.2(k) — India Code
Development charges / premiums	MCGM · MMRDA · CIDCO · relevant planning authority

11. 🧑🏫 Videos ▶️

ORDER	VIDEO	COVERS	
1 📌	[Understanding Carpet Area — Built up & Super Built up \	Calculation, Loading & RERA](https://www.youtube.com/watch?v=DPj2x6cwsT4)	Loading maths, worked
2 📌	Carpet Area (RERA) — Calculation, Formula & Measurement (Hindi)	Measurement, step by step	
3 🟡	Carpet area, Built-up, Super Built-up as per RERA	A second explanation of the same distinctions	
4 🟢	Calculating NPV and IRR in Excel — step by step	Spreadsheet technique, feeds Module 12	

12. Practical exercise 🛠️

Build the cost-sheet calculator (2 hours).

Make a spreadsheet with inputs: carpet area, saleable area, rate, buyer gender, ASR value, under-construction Y/N, affordable Y/N, LTV band, interest rate, tenure.

Outputs: loading %, effective carpet rate, GST, stamp duty (on the higher value), registration, **total acquisition cost**, **all-in cost per carpet sq ft**, loan, **total cash required**, EMI, total interest.

Then run **three real Mumbai listings** through it. You will find at least one where the all-in cost is more than 15% above the headline. **That spreadsheet, shown to a client on a phone, is worth more than any brochure.**

13. Case study 📋 — the two flats that look identical

Two 2BHKs, same building, same floor, listed the same week. **Flat X:** carpet 700 sq ft, saleable 1,000 sq ft, quoted ₹21,000/sq ft saleable. Ready, **OC received**. **Flat Y:** carpet 700 sq ft, saleable 980 sq ft, quoted ₹20,500/sq ft saleable. **Under construction**, possession in 18 months. Buyer is a **woman purchasing in her sole name**. ASR value for both: ₹2,00,00,000.

Which is cheaper, all in?

Full working

Flat X (ready, OC received):

- Agreement value = $1,000 \times 21,000 = \text{₹}2,10,00,000$
- GST = **₹0** (OC received — outside GST)
- Stamp duty = 5% (female sole) $\times$ higher of (2,10,00,000 / 2,00,00,000) = $5\% \times 2,10,00,000 = \text{₹}10,50,000$
- Registration = **₹30,000**
- **Total** $\approx \text{₹}2,20,80,000$ · per carpet sq ft = $2,20,80,000 \div 700 = \text{₹}31,543$

Flat Y (under construction):

- Agreement value = $980 \times 20,500 = \text{₹}2,00,90,000$
- GST @5% = **₹10,04,500**
- Stamp duty = $5\% \times$ higher of (2,00,90,000 / 2,00,00,000) = $5\% \times 2,00,90,000 = \text{₹}10,04,500$
- Registration = **₹30,000**
- **Total** $\approx \text{₹}2,21,29,000$ · per carpet sq ft = $2,21,29,000 \div 700 = \text{₹}31,613$

Result: they cost almost exactly the same — within ₹49,000, about 0.2%.

But they are not the same deal:

	FLAT X	FLAT Y
Possession	Immediate	18 months
18 months of rent saved / paid	Saves ~₹11.7 lakh at ₹65k/month	Pays it
Delay risk	None	Real — s.18 is a remedy, not a guarantee
GST	Nil	₹10 lakh, no ITC
Construction risk	None	Full

Conclusion: at an identical all-in price, **Flat X is decisively better** — the buyer avoids ₹11.7 lakh of rent, all completion risk, and gets the asset today. Flat Y's slightly lower headline rate (₹20,500 vs ₹21,000) is *entirely* an illusion created by the smaller saleable-area figure and the GST that the buyer forgot to add.

The lesson: the headline rate told you the wrong answer. **Carpet + all-in + time** told you the right one. This is the single most valuable calculation an agent can do.

14. Quiz — 10 questions

1. Carpet 800, saleable 1,120. Loading?
2. Stamp duty is charged on which value?
3. Mumbai stamp duty for a female sole buyer, including metro cess?
4. Registration charge on a ₹1.4 crore flat?
5. Both conditions for the 1% GST affordable rate in a metro?
6. Is GST payable on a ready flat with an OC?
7. Flat at ₹62 lakh. TDS u/s 194-IA — on what amount, and how much?
8. Current TDS rate on brokerage, and from when?
9. Maximum LTV on a ₹1.2 crore property, and is stamp duty included in "cost"?
10. Annual rent ₹6,00,000, all-in cost ₹1,80,00,000. Gross yield?

Answers

1. $(1,120 - 800) \div 800 = 40\%$
2. The **higher** of agreement value and **ready reckoner (ASR)** value.
3. **5%** — 4% base + 1% metro cess (sole female owner). 🔄 verify.
4. **₹30,000** (capped, above ₹30 lakh).
5. Consideration $\leq$ **₹45 lakh and** carpet area $\leq$ **60 sq m**. Both required.
6. **No** — zero GST once the OC is received.
7. On the **whole ₹62,00,000** (threshold crossed), 1% = **₹62,000**.
8. **2%** under s.194H, from **1 October 2024** (reduced from 5%). 🔄 verify.
9. **75%** (above ₹75 lakh). Stamp duty, registration and documentation charges are **excluded** from cost for LTV.
10. $6,00,000 \div 1,80,00,000 = 3.33\%$ gross.

15. Interview questions 🎤

- "A flat is quoted at ₹25,000 a square foot. What do you need to know before that number means anything?"
- "Walk me through the all-in cost of a ₹2 crore Mumbai flat."
- "When does GST apply and when doesn't it?"
- "A buyer has ₹60 lakh. What can they actually afford?"
- "What rental yield should I expect on a Mumbai 2BHK?"
- "Explain why the interest on a 20-year loan exceeds the principal."

16. Key terms

Carpet / saleable / loading · Effective carpet rate · ASR / ready reckoner · Metro cess · Registration cap · Affordable housing test · ITC block · Form 26QB / 16B · 194-IA / 194H · LTV · FOIR · EMI · Pre-EMI · Gross vs net yield · CAGR · Total acquisition cost

17. One-page revision sheet

Loading = $(\text{Saleable} - \text{Carpet}) \div \text{Carpet}$. **Always re-quote on carpet.**

⌚ **Stamp duty (Mumbai):** male/joint 6%, female sole 5% (incl. 1% metro cess), on the **HIGHER of agreement value and ASR**. ⌚

Registration: ₹30,000 above ₹30 lakh; else 1%. ⌚ **GST:** 1% affordable ($\leq ₹45\text{L}$ and $\leq 60\text{ sq m}$ metro) · 5% other under-construction · 0% with OC. **No ITC**. ⌚ **TDS: 194-IA** 1% on the **whole** consideration $\geq ₹50\text{L}$ (Form 26QB → 16B) · **194H** 2% on brokerage (from 1 Oct 2024), threshold ₹20,000/FY. ⌚ **LTV:** $\leq 30\text{L}$ 90% · 30–75L 80% · $> 75\text{L}$ 75%. **Stamp duty excluded from cost.**

$$\text{EMI} = P \cdot r \cdot (1+r)^n / ((1+r)^n - 1)$$

$$\text{Gross yield} = \text{Annual rent} \div \text{Total acquisition cost}$$

$$\text{CAGR} = (\text{Final}/\text{Initial})^{(1/\text{years})} - 1$$

Total acquisition cost = Agreement value + GST + Stamp duty + Registration + club + maintenance + legal. **Total cash needed** = Down payment + GST + stamp duty + registration + other. *Run this at qualification.*

Mumbai residential gross yields $\approx 2.5\text{--}3.5\%$. Never promise more. **Learn the method. Look up the rate.**

Mumbai Real Estate

Beyond the MATP syllabus. Not examinable. This is the module that makes you credible in a Mumbai deal room. **Time:** 5–6 hours.

1. What I need to learn

The geography, the planning rules that create supply, the infrastructure that moves value, and the numbers that describe the market right now.

2. The Mumbai Metropolitan Region

MMR covers roughly 6,300 sq km and includes Greater Mumbai plus Thane, Navi Mumbai, Kalyan- Dombivli, Mira-Bhayandar, Vasai-Virar, Panvel, Bhiwandi and Ulhasnagar. It is planned at the regional level by **MMRDA**, while Greater Mumbai's building rules come from **MCGM/BMC** under **DCPR 2034**, Navi Mumbai from **CIDCO**, and slum redevelopment from the **SRA**.

Knowing which authority governs a plot tells you which rulebook applies — and that is the first question a serious buyer or investor will ask you.

2.1 The micro-markets

ZONE	AREAS	CHARACTER
South Mumbai (SoBo)	Colaba, Cuffe Parade, Malabar Hill, Altamount/Carmichael Rd, Worli, Prabhadevi	Highest values in India. Supply almost entirely redevelopment of cessed buildings. Limited land, deep legacy title complexity
Central Mumbai	Lower Parel, Dadar, Mahalaxmi, Byculla, Wadala, Sewri	The mill-land transformation. Grade-A offices + luxury residential. Atal Setu / Sewri has reframed the eastern edge
Western suburbs	Bandra, Khar, Santacruz, Andheri, Goregaon, Malad, Kandivali, Borivali, Dahisar	The deepest residential market. BKC anchors commercial. Metro Line 2A/7 along the Western corridor
Eastern suburbs	Powai, Chandivali, Vikhroli, Ghatkopar, Mulund, Bhandup, Kanjurmarg	Strong end-user demand, better value per sq ft, LBS/Eastern Express corridors
Thane	Thane city, Ghodbunder Rd, Majiwada, Kolshet	Large-format supply, big launch volumes, metro and road-led growth
Navi Mumbai	Vashi, Nerul, Belapur, Kharghar, Panvel, Ulwe, Talaja	The structural growth story — airport, Atal Setu, metro. Leading MMR new-supply share
Extended MMR	Kalyan-Dombivli, Mira-Bhayandar, Vasai-Virar, Bhiwandi	Affordable/mid-segment volume; Bhiwandi is India's largest warehousing hub

2.2 The infrastructure that is repricing the map

PROJECT	WHAT IT CHANGES
Mumbai Trans Harbour Link (Atal Setu)	Sewri ↔ Nhava Sheva. Collapses the travel time to Navi Mumbai; the single biggest driver of the Navi Mumbai/Ulwe/Panvel story
Navi Mumbai International Airport	A second airport; reframes Panvel/Ulwe/Kharghar as an airport catchment
Metro network (2A, 7, 1, 3 and expanding)	Line 3 (Colaba–Bandra–SEEPZ) links SoBo to the western business districts underground
Coastal Road	South–west corridor travel times
Eastern Freeway, SCLR, Goregaon-Mulund Link Road	East–west connectivity, historically Mumbai's weakest axis

How infrastructure actually prices in: value tends to move on **announcement**, again on **visible construction**, and again on **commissioning** — and the last move is often the smallest, because the first two already anticipated it. An agent who tells a client "prices will jump when the metro opens" is usually about three years late.

3. FSI, TDR and land economics

This is the section that separates people who understand Mumbai from people who just live here.

3.1 FSI (Floor Space Index)

$$\text{FSI} = \text{Total permissible built-up area} \div \text{Plot area}$$

A 1,000 sq m plot with FSI 3.0 permits 3,000 sq m of built-up area.

Under DCPR 2034, permissible FSI is linked to road width — taller buildings only where the road can carry the traffic. The regulations sort residential and commercial plots into **five road-width bands**, each carrying a fixed quantum of **premium FSI** and **TDR** on top of the basic zonal FSI. Indicatively, permissible FSI runs from about **1.00** (a suburban plot on a road under 9 m) to **3.00** (an Island City plot on a road of 27 m or more) — **before** any 33-series incentive is added.

🕒 **Verify current bands and quanta in DCPR 2034 itself** — they are amended periodically.

3.2 TDR (Transferable Development Rights)

When a landowner's plot is acquired for a public purpose — a road, a school, a garden — they may be compensated not in cash but in **development rights usable elsewhere**. TDR is bought, sold and "loaded" onto a receiving plot within the rules.

Why you care: TDR is a **traded commodity with a price**. Its cost is a real input into a developer's feasibility, and when TDR prices move, project economics move with them.

3.3 The 33-series — Mumbai's redevelopment engine

Mumbai builds mostly by **rebuilding**. The 33-series of DCPR 2034 grants incentive FSI to make that viable.

REGULATION	APPLIES TO	KEY FEATURES
33(7), 33(7)(A), 33(7)(B)	Cessed buildings in the Island City existing prior to 30 September 1969	Total FSI of 3.00 of gross plot area, or rehab + incentive, whichever is more. Every residential occupier guaranteed a minimum of 27.88 sq m (300 sq ft) carpet , up to a ceiling of 120 sq m
33(9)	Cluster redevelopment — Urban Renewal Cluster Development Scheme	Minimum 4,000 sq m in the Island City, 6,000 sq m in the suburbs. Incentive FSI of 55% of the rehabilitation area
33(10)	Slum redevelopment (SRA)	Free rehabilitation tenements for eligible slum dwellers, funded by sale-component FSI. Buildings eligible under other 33-series provisions receive the higher of their own benefit or the 33(10) benefit
33(5), 33(20), 33(24)	Other categories — MHADA layouts, IT, commercial	Category-specific incentives

🕒 These regulations are amended regularly, including via a revamped cluster policy for Mumbai. **Always check the current DCPR text and the latest UDD notifications before relying on a number.**

3.4 The economics of a redevelopment

A society redevelopment has a simple logic:

$$\begin{aligned} \text{Total buildable area} &= \text{REHAB component (free, to existing members)} \\ &\quad + \text{SALE component (the developer's revenue)} \\ \\ \text{Developer's economics:} &\text{SALE revenue} - (\text{rehab construction} + \text{sale construction} \\ &\quad + \text{rent/corpus to members} + \text{premiums} + \text{TDR} + \text{finance}) = \text{margin} \end{aligned}$$

What this means for you as an agent:

- The **sale component** is the inventory you'll be selling.
- The project is only viable if incentive FSI is enough. ****When a developer says "the numbers don't**

work", they mean the sale component is too small relative to the rehab obligation.**

- Members receiving a **corpus and rent** during construction is normal.

- 🚩 The chronic risk: societies signing with a developer who cannot fund the rehab, leaving members

out of their homes and out of rent. Mumbai has many of these. **When you sell in a redevelopment, check who the society is and whether the members are being paid on time** — that is a live indicator of the developer's cash position.

4. The market, in numbers 📊

Snapshot at the time of writing. **These change every quarter — always cite the latest report.**

METRIC	LATEST READING	SOURCE
Mumbai housing sales, H1 2026	47,355 units — ~28% of all homes sold across India's top 8 cities	Knight Frank
India new launches, H1 2026	187,350 units , +4% YoY	Knight Frank
India unsold inventory, H1 2026	525,695 units , +4% YoY	Knight Frank
Quarters-to-sell	6 — described as a healthy level	Knight Frank
Mumbai new launches, Q1 2026	15,823 units ; Navi Mumbai 30.3% , Thane 16.7% , South Central 12.9%	JLL
MMR new launches, Q2 2026	34,550 units — roughly one-third of all new supply across the top 7 cities	ANAROCK
All-India House Price Index, Q2 2025-26	+2.2% YoY (moderating from ~7%), new base 2022-23	RBI

How to read those together: Mumbai is India's largest residential market by sales, but **inventory is accumulating nationally** and increasingly concentrated in the **premium and luxury** segments while lower-priced housing keeps absorbing. Growth within MMR has shifted decisively **away from the traditional corridors** towards Navi Mumbai and Thane, driven by the airport, Atal Setu, metro and coastal road. Meanwhile the RBI's house price index shows price growth **moderating sharply** — volume is holding up better than price.

That paragraph, updated each quarter, is a genuinely useful thing to be able to say out loud.

5. 📖 Read first 🏢

PRIORITY	RESOURCE	READ	WHY
🔴	Knight Frank — India Real Estate: Office & Residential, H1 2026 (PDF)	India summary + Mumbai city section	The most complete single half-yearly read on the market

🟢	India's Real Estate Outlook 2026 — JM Financial	Institutional/analyst framing of the sector

7. 📖 Deep dive 🟢

IIM Bangalore Working Paper No. 477 — Housing Price Indices in India [🔗 https://www.iimb.ac.in/sites/default/files/2018-08/WP%20No.%20477.pdf](https://www.iimb.ac.in/sites/default/files/2018-08/WP%20No.%20477.pdf) **Read:** methodology sections. **Why:** teaches you why two reports can give different "price growth" numbers for the same city — different samples, different methods, different definitions of price.

RBI — House Price Index and Residential Asset Price Monitoring Survey [🔗 https://www.rbi.org.in/](https://www.rbi.org.in/) **Read:** the latest HPI release for Mumbai. **Why:** the HPI is built from **actual registration data** across ten cities. It is the most neutral price series available and a good sanity check against consultancy reports.

8. Practical exercise 🛠️

The micro-market brief (3 hours).

Pick **one** micro-market — Kharghar, Mulund, Ghodbunder Road, Chembur, Borivali East. Produce a two-page brief:

1. Which planning authority governs it, and under which regulations?
2. Current price band per **carpet** sq ft (from live listings — sample at least 10)
3. New launches in the last year (JLL/ANAROCK/Knight Frank)
4. Infrastructure under construction and its expected completion
5. Three active developers and their MahaRERA track records
6. Typical rental for a 2BHK → compute **gross yield**
7. Your view: end-user market, investor market, or both? Why?

This brief is a sales asset. Send it to prospects in that micro-market.

9. Case study 📋 — the Navi Mumbai question

A client has ₹1.6 crore. They can buy a **compact 2BHK in Chembur** (established, ready, immediate rental) or a **larger 3BHK in Ulwe** (under construction, near the airport and Atal Setu). They ask: *"Which will appreciate more?"*

A professional answer is not a prediction. It's a structure:

Ulwe — the case for. The infrastructure thesis is real and unusually concrete: an operating airport, Atal Setu, metro. Navi Mumbai leads MMR new-supply share. Lower entry price means a given absolute price rise is a larger percentage return.

Ulwe — the case against. *Supply is the risk.* Growth corridors attract developers, and MMR is producing tens of thousands of new units a quarter with **national unsold inventory rising**. In a corridor with abundant developable land, new supply can absorb demand growth and cap price growth for years. **Rental demand also lags physical infrastructure**, often by several years — so the early years may deliver poor yield and no appreciation simultaneously. Plus: completion risk.

Chembur — the case for. Established micro-market, constrained supply, existing rental demand from day one, no construction risk, immediately mortgageable and immediately sellable. **Liquidity is a return.** The eastern suburbs have benefited from the Eastern Freeway and SCLR.

Chembur — the case against. Lower percentage upside; already priced for its advantages.

What you actually tell them — three questions, not an answer:

1. **What's the holding period?** Under 5 years → established market. 10+ years → the growth corridor thesis has time to work.
2. **Do they need income now?** Chembur rents from month one. Ulwe rents in ~3 years, at a lower yield.
3. **Can they carry both EMI and rent through an 18-month delay, plus a possible further delay?** If not, under-construction is not suitable regardless of the thesis.

And be honest about the limit of your knowledge: you can describe supply, infrastructure and absorption. You cannot forecast prices, and any agent who says they can is selling, not advising. Saying so out loud is what makes the rest of your advice credible.

10. Quiz — 10 questions

1. Which authority governs building approvals in Greater Mumbai? Navi Mumbai? Slum redevelopment?
2. Define FSI. What is permissible FSI linked to under DCPR 2034?
3. What is TDR, and why does its price matter to a developer?
4. Which regulation covers cessed buildings, and what's the cut-off date?
5. Minimum carpet area guaranteed to a residential occupier under 33(7)?
6. Minimum plot area for a cluster scheme in the Island City vs the suburbs?
7. Incentive FSI under 33(9) as a percentage of the rehabilitation area?
8. What are "rehab component" and "sale component"?
9. Which MMR sub-market led new launches in Q1 2026, and with what share?
10. What does "quarters-to-sell" measure?

Answers

1. **MCGM/BMC** (Greater Mumbai, under DCPR 2034) · **CIDCO** (Navi Mumbai) · **SRA** (slum redevelopment). **MMRDA** plans at the regional level.
2. FSI = total permissible built-up area ÷ plot area. Under DCPR 2034 it is linked to **road width**, via five road-width bands.
3. Development rights granted as compensation where land is taken for a public purpose, usable/loadable elsewhere. It is **traded at a price**, so it is a direct input cost in a developer's feasibility.
4. **33(7)** (with 33(7)(A) and (B)) — cessed buildings in the Island City existing prior to **30 September 1969**.
5. **27.88 sq m (300 sq ft) carpet**, up to a ceiling of 120 sq m.
6. **4,000 sq m** Island City; **6,000 sq m** suburbs and extended suburbs.
7. **55%** of the rehabilitation area.
8. **Rehab** = area given free to existing occupants/members. **Sale** = the area the developer sells, which funds the whole scheme.
9. **Navi Mumbai**, with **30.3%** of Mumbai's Q1 2026 new launches (JLL).
10. How many quarters it would take to sell existing unsold inventory at the current sales pace — an inventory-overhang measure.

11. Interview questions

- "Why is Mumbai supply mostly redevelopment?"
 - "Explain FSI and TDR to me."
 - "What's the difference between 33(7), 33(9) and 33(10)?"
 - "Where is MMR growth coming from right now, and why?"
 - "How does the Atal Setu change Navi Mumbai's economics?"
 - "What's happening to unsold inventory nationally, and what does it mean for pricing?"
-

12. Key terms

MMR · MMRDA / MCGM / CIDCO / SRA / MHADA · DCPR 2034 · FSI · Premium FSI · TDR · 33(7) / 33(9) / 33(10) · Cessed building · Cluster Development Scheme · Rehab vs sale component · Corpus & rent · Quarters-to-sell · Absorption · Unsold inventory · Atal Setu / MTHL · NMIA

13. One-page revision sheet

Authorities: MCGM (Greater Mumbai/DCPR 2034) · CIDCO (Navi Mumbai) · SRA (slums) · MHADA · MMRDA (regional). **Know which rulebook applies before you say anything.**

FSI = built-up ÷ plot; under DCPR 2034 tied to **road width**, five bands, indicatively **1.00** → **3.00** before 33-series incentives. **TDR** = development rights traded and loaded elsewhere.

33(7) cessed, Island City, pre-**30 Sep 1969**, FSI **3.00**, min **300 sq ft (27.88 sq m)** carpet, ceiling 120 sq m. **33(9)** cluster, min **4,000 sq m** Island City / **6,000 sq m** suburbs, incentive FSI 55% of rehab. **33(10)** SRA. Higher-of rule applies across the series.

Redevelopment = **rehab (free)** + **sale (revenue)**. "Numbers don't work" = sale component too small.

🕒 **Market:** Mumbai **47,355** units sold H1 2026 (~28% of top-8) · India unsold **525,695** (+4%) · QTS **6** · MMR ~ $\frac{1}{3}$ of top-7 new supply · Navi Mumbai **30.3%** of Mumbai Q1 2026 launches · RBI HPI +2.2% YoY. **Re-check every quarter.**

Value moves on announcement → **construction** → **commissioning**. By commissioning it's mostly priced in.

Real Estate Finance

🔴 **Beyond the MATP syllabus.** Not examinable. This is the module that lets you understand what the person across the table is actually optimising for. **Time:** 5–6 hours. Build the model — don't just read it.

1. What I need to learn

How a developer makes money, where the risk sits, and why they behave the way they do — why they launch before they're ready, why they discount at quarter-end, why they resist changing a payment plan, why "the numbers don't work."

Once you understand a developer's cash flow, their negotiating behaviour stops being mysterious.

2. Developer economics — the basic equation

GDV (Gross Development Value)	=	Saleable area × Average realisation
Total Project Cost	=	Land + Construction + Approvals/Premiums + Marketing/Brokerage + Finance + Overheads
Development Profit	=	GDV – Total Project Cost
Development Margin	=	Profit ÷ GDV
Return on Cost	=	Profit ÷ Total Project Cost

The residual land value method — how a developer decides what land is worth:

$$\text{Residual Land Value} = \text{GDV} - (\text{all costs except land}) - \text{required developer profit}$$

This is why land prices in a micro-market track achievable sale prices with a lag. **Land is the residual, not the driver.**

2.1 The cost stack in Mumbai 🏠

COMPONENT	TYPICAL SHARE	NOTES
Land / rehab obligation	30–50%	In redevelopment, "land cost" is the rehab component + corpus + rent
Construction	25–40%	Mumbai high-rise construction commonly ₹3,000–5,000/sq ft ☹️
Approvals & premiums	8–15%	Premium FSI, TDR, development charges, fungible FSI premiums
Marketing & brokerage	3–6%	Your commission lives here
Finance	6–12%	Construction finance; NBFC rates run well above bank rates
Overheads & contingency	2–5%	

🔴 **The insight that changes how you negotiate:** land and approvals are **sunk and fixed**. They are spent before a single flat is sold. Everything after launch is a race to convert inventory into cash fast enough to service finance. **That is why developers would rather give you a bigger brokerage than cut the headline price** — the headline price sets the benchmark for every remaining unit and for the lender's valuation; your commission is a one-off.

3. Capital structure

SOURCE	COST	SECURITY	CHARACTER
Equity	Highest (target 18–25%+ IRR)	Residual	Patient, takes first loss

SOURCE	COST	SECURITY	CHARACTER
Structured / mezzanine	15–20%	Subordinated charge	Fills the gap between equity and senior debt
Construction finance (senior debt)	Bank or NBFC ☹	Mortgage on land + receivables	Drawn against milestones
Customer advances	"Free", but constrained	—	70% ring-fenced by RERA

Why RERA changed developer finance fundamentally: before 2016, customer advances were the cheapest capital in Indian real estate and could be moved between projects. The **s.4(2)(1)(D) 70% rule** ended that. Developers now need **real project finance**, which is why the sector consolidated after RERA — smaller developers who relied on cross-funding could not raise it.

The three-account structure (Module 6) is the operational expression of this: collections in, 70% ring-fenced, up to 30% released.

4. The metrics

4.1 NPV

$$NPV = \sum [\text{Cash flow}_t \div (1 + r)^t]$$

Positive NPV at your required return = the project creates value. **r** is the discount rate — for Indian residential development, equity discount rates of **15–20%** are common. ☹

4.2 IRR

The discount rate at which NPV = 0. **IRR is time-sensitive** — the same profit earned two years later is a much lower IRR. This is why **delay destroys developer returns faster than cost overruns**.

4.3 Break-even

$$\text{Break-even sales (sq ft)} = \text{Total Project Cost} \div \text{Average realisation per sq ft}$$

4.4 Sales velocity and absorption

$$\begin{aligned} \text{Sales velocity} &= \text{Units sold} \div \text{Month} \\ \text{Absorption rate} &= \text{Units sold} \div \text{Total units available} \\ \text{Quarters-to-sell} &= \text{Unsold inventory} \div \text{Average quarterly sales} \end{aligned}$$

Sales velocity is the number a developer watches daily. It determines whether collections outpace construction spend — and whether they can service debt.

5. 🏢 Case study: a ₹500 crore Mumbai project

"Meridian Heights" — Goregaon East. Greenfield, 2 towers, 5-year cycle. **Saleable area 3,50,000 sq ft · ~350 units · average realisation ₹20,000/sq ft** *(Constructed example, built to realistic Mumbai parameters, for teaching the structure.)*

5.1 The deal at a glance

	₹ CRORE
Gross Development Value (3,50,000 sq ft × ₹20,000)	700.0
Land	200.0
Approvals, premiums, TDR	60.0
Construction (3,50,000 sq ft × ₹4,500)	157.5
Marketing & brokerage (4% of GDV)	28.0

	₹ CRORE
Finance cost	40.0
Overheads & contingency	14.5
Total Project Cost	500.0
Development Profit	200.0

Development margin = $200 \div 700 = 28.6\%$ **Return on cost** = $200 \div 500 = 40.0\%$

5.2 The cash flow — where the story actually is

YEAR	LAND & APPROVALS	CONSTRUCTION	MARKETING	FINANCE	OVERHEADS	OUTFLOW	COLLECTIONS	NET	CUMULATIVE
Y1	260.0	—	5.0	8.0	3.0	276.0	—	(276.0)	(276.0)
Y2	—	35.0	9.0	12.0	3.0	59.0	105.0	+46.0	(230.0)
Y3	—	50.0	8.0	11.0	3.0	72.0	180.0	+108.0	(122.0)
Y4	—	45.0	4.0	6.0	3.0	58.0	215.0	+157.0	+35.0
Y5	—	27.5	2.0	3.0	2.5	35.0	200.0	+165.0	+200.0
Total	260.0	157.5	28.0	40.0	14.5	500.0	700.0	+200.0	

Read the cumulative column. The project is **cash-negative until sometime in Year 4**. Peak funding requirement is **₹276 crore in Year 1**, before a single rupee of revenue.

5.3 The returns

METRIC	VALUE
Project IRR (on net cash flows)	≈ 21.3%
NPV @ 15% discount rate	≈ +₹43 crore
Profit ÷ GDV (margin)	28.6%
Profit ÷ cost	40.0%

(IRR is the rate where NPV = 0. At 21% NPV is +₹1.4 cr; at 22% it is -₹4.8 cr — so IRR sits just above 21%.)

5.4 Funding and break-even

Funding: equity ~₹120 crore + construction finance ~₹160 crore covers the ₹276 crore Year-1 peak; debt is repaid from Year 3–4 collections.

Break-even:

$$500 \text{ crore} \div ₹20,000 \text{ per sq ft} = 2,50,000 \text{ sq ft}$$

The developer must sell 2,50,000 of 3,50,000 sq ft — 71.4% of the project — simply to break even. All the profit lives in the **last 29%**.

Required sales velocity: 3,50,000 sq ft over 4 selling years ≈ **7.3 units per month**, every month, for 48 months.

● **This single fact explains most developer behaviour you will ever encounter.** The last 29% of inventory carries 100% of the profit. That is why developers protect headline pricing on the final phase, why they'd rather pay you 3% than cut 5%, and why a stalled sales month is a genuine emergency rather than a slow patch.

5.5 Sensitivity — why this business is fragile

SCENARIO	PROFIT	PROJECT IRR	COMMENT
Base case	₹200 cr	≈21.3%	
Price -10% (₹18,000/sq ft)	₹130 cr	≈14.3%	A 10% price cut removes 7 points of IRR

SCENARIO	PROFIT	PROJECT IRR	COMMENT
Construction cost +15%	₹176 cr	≈19.9%	Painful but survivable
12-month delay	~₹185 cr	≈17.5%	Extra finance + overheads, <i>and</i> profit arrives a year later
Sales velocity halves	—	Falls sharply	Collections stop funding construction; debt service becomes the binding constraint

Operating leverage is brutal. A 10% fall in price cuts profit by 35% and IRR by a third, because costs are almost entirely fixed once land is bought. **This is why developers discount through freebies, furniture, stamp-duty offers and higher brokerage rather than headline price** — those don't reset the benchmark for the remaining 71% of inventory.

5.6 What this means for you as an agent

DEVELOPER'S POSITION	YOUR OPPORTUNITY
Cash-negative until Y4	Early-phase buyers have the most negotiating leverage
Break-even at 71%	Late-phase inventory is where they're least flexible on price
Fixed cost, variable revenue	Ask for non-price concessions — parking, floor rise waiver, payment plan, stamp duty
Velocity is the metric	A broker who delivers consistent monthly volume is worth more than one who brings occasional big deals — price your services accordingly
Quarter/year-end	Recognition and collection targets create real windows. This is practice, not law — don't promise a client a discount that may not come

6. Read first

PRIORITY	RESOURCE	READ	WHY
	Knight Frank — India Real Estate H1 2026 (PDF)	Sales, launches, unsold inventory, QTS	The demand side of every developer model
	RBI Master Circular — Housing Finance	LTV, risk weights	The rules that govern the buyer's leverage
	MahaRERA — Bank Account Order	Whole order	How the 70% rule constrains developer cash
	Real Estate Project Development Life Cycle — R.Estate Fin	Whole page	Cost and cash-flow stages laid out
	Colliers — 2026 India Office Outlook	Demand/supply	Commercial development economics differ — worth contrasting

7. Watch

ORDER	VIDEO	COVERS
1 	Investment Analysis for Commercial Real Estate — an Introduction to NPV & IRR	The cleanest introduction to NPV and IRR for property
2 	Residual Land Value	How land is valued backwards from GDV
3 	Residual Land Value module — All-in-One Model walkthrough	The same, inside a real feasibility model
4 	Calculating NPV and IRR in Excel — step by step	The spreadsheet mechanics you need for the exercise

These are US/UK-oriented. The **mechanics are universal**; the Indian specifics — premiums, TDR, the 70% rule, rehab components — are in this module and Module 11.

8. Deep dive

IIM Bangalore Working Paper No. 477 — Housing Price Indices in India  <https://www.iimb.ac.in/sites/default/files/2018-08/WP%20No.%20477.pdf> **Read:** methodology. **Why:** every revenue line in a feasibility model rests on an assumed price path. This shows how fragile price measurement itself is.

Impact of RERA Act 2016 — ResearchGate 

https://www.researchgate.net/publication/369038845_Impact_of_Real_Estate_Regulatory_Authority_RERA_Act_2016 **Read:** the sections on developer consolidation and funding. **Why:** documents the financing shift this module describes.

9. Practical exercise

Build the feasibility model (3 hours).

Recreate the Meridian Heights model in a spreadsheet with these inputs: saleable area, realisation per sq ft, land cost, construction cost per sq ft, approvals %, marketing %, finance %, and a 5-year phasing of construction spend and collections.

Outputs: GDV, total cost, profit, margin, return on cost, annual net cash flow, cumulative cash flow, **NPV at 15%, IRR, break-even sq ft and break-even %**.

Then run the four sensitivities in §5.5 and add one of your own: **what happens if collections slip by six months but construction spend doesn't?**

That last one is the scenario that actually kills projects — and now you'll be able to see it coming in a QPR.

10. Quiz — 10 questions

1. Write the residual land value formula.
2. Why does RERA's 70% rule change developer financing?
3. In Meridian Heights, what is peak funding requirement and in which year?
4. In which year does the project turn cash-positive cumulatively?
5. Break-even sales area and percentage?
6. Development margin vs return on cost — which is higher and why?
7. A 10% price fall does what to profit and IRR?
8. Why do developers prefer freebies and higher brokerage to a headline price cut?
9. Why does delay hurt IRR more than a comparable cost overrun?
10. What is quarters-to-sell, and where would you find it?

Answers

1. **RLV = GDV – (all costs except land) – required developer profit.**
2. Customer advances were previously the cheapest, most flexible capital and could be moved between projects. Ring-fencing 70% in a project-specific account forces developers to raise genuine project finance — a major driver of post-RERA consolidation.
3. **₹276 crore, in Year 1** — before any revenue.
4. Cumulative cash flow turns positive during **Year 4** (+₹35 crore at year-end).
5. **2,50,000 sq ft**, which is **71.4%** of the 3,50,000 sq ft saleable area.
6. **Return on cost (40%)** is higher than **margin (28.6%)** — margin divides by revenue, return on cost divides by the smaller cost base.
7. Profit falls from **₹200 cr to ₹130 cr** (–35%); IRR falls from **~21.3% to ~14.3%**. Operating leverage: costs are fixed once land is committed.
8. A headline price cut resets the benchmark for **all remaining inventory** (71% of the project, where all the profit sits) and affects lender valuations. Freebies and brokerage are one-off costs that don't reset the price benchmark.
9. IRR is time-weighted — the same profit received later is a lower IRR — and a delay adds finance and overhead cost **on top**. A cost overrun only reduces the numerator.
10. Unsold inventory ÷ average quarterly sales — an inventory overhang measure. Published in **Knight Frank**, ANAROCK and JLL market reports.

11. Interview questions

- "How does a developer decide what to pay for land?"
 - "Where does a residential project's profit actually sit?"
 - "Why won't a developer just cut price when sales are slow?"
 - "What does the 70% rule do to a developer's balance sheet?"
 - "You see a project with flat QPR progress for three quarters. What's the financial diagnosis?"
 - "Walk me through the difference between margin, return on cost and IRR."
-

12. Key terms

GDV · Residual land value · Development margin · Return on cost · NPV · IRR · Hurdle rate · Break-even · Sales velocity · Absorption · Quarters-to-sell · Construction finance · Mezzanine · Operating leverage · Rehab component · Peak funding requirement

13. One-page revision sheet

GDV = saleable × realisation. **Profit** = GDV – total cost. **Margin** = profit ÷ GDV. **Return on cost** = profit ÷ cost. **RLV** = GDV – costs – required profit.

Meridian Heights (₹500 cr cost / ₹700 cr GDV): profit ₹200 cr · margin 28.6% · return on cost 40% · IRR ≈ 21.3% · NPV@15% ≈ + ₹43 cr peak funding ₹276 cr in Y1 · cash-positive in Y4 · break-even 2,50,000 sq ft = 71.4% required velocity ~7.3 units/month for 48 months

Sensitivity: price –10% → profit –35%, IRR 21.3% → 14.3%. Costs are fixed; revenue isn't.

Therefore: all the profit is in the last ~29% of inventory · developers protect headline price and pay in freebies/brokerage · **velocity is the metric** · delay hurts IRR more than overruns · the 70% rule is why real project finance exists.

Your leverage: early phase, non-price concessions, consistent monthly volume.

Market Research

✚ **Beyond the MATP syllabus.** Not examinable. This is the module that turns you from someone with opinions into someone with evidence. **Time:** 4–5 hours + one real assignment.

1. What I need to learn

How a real estate professional builds a view of a market from public data — and how to say what you know, what you infer and what you're guessing, without blurring the three.

2. The twelve variables

#	VARIABLE	WHAT IT TELLS YOU	WHERE TO GET IT
1	Supply — new launches	How much is coming	Knight Frank, ANAROCK, JLL quarterly
2	Demand — sales/absorption	Whether it's being taken up	Same reports
3	Inventory — unsold stock	The overhang	Same reports
4	Absorption rate	Sold ÷ available	Derived
5	Quarters-to-sell	Inventory ÷ quarterly sales	Reports, or derived
6	Price	Capital values, ₹/sq ft	RBI HPI, IGR ASR, live listings
7	Rental yield	Income return	Live rental listings ÷ capital values
8	Registrations	Actual transactions, not listings	IGR Maharashtra / state registration data
9	Infrastructure	Future accessibility	MMRDA, MCGM, MSRDC, metro authorities
10	Employment	Who will live/work here	Office absorption (JLL/Colliers/CBRE), industry news
11	Population / households	Structural demand	Census, municipal data
12	Interest rates	Affordability and sentiment	RBI policy statements

2.1 The four that matter most

If you only track four numbers for a micro-market:

LAUNCHES · SALES · UNSOLD INVENTORY · QUARTERS-TO-SELL

Together they answer the only question that matters: **is supply running ahead of demand here, or behind it?**

PATTERN	READING
Sales > launches, QTS falling	Tightening. Prices have room
Launches > sales, QTS rising	Loosening. Buyers have leverage
Both high, QTS stable	Healthy churn
Both low	Illiquid — hard to exit

⌚ At the time of writing: India's unsold inventory was **525,695 units**, up **4% YoY**, with a quarters-to-sell ratio of **6** — and inventory increasingly **concentrated in premium and luxury** while lower-priced housing kept absorbing. That is a segment-specific loosening, not a uniform one. **Segment matters as much as geography.**

3. Reading a market report properly

Five questions, every time:

1. **What is the geography?** "Mumbai" in one report means MMR; in another it means Greater Mumbai only. Navi Mumbai and Thane may or may not be included. **Check the definition before comparing.**
2. **What is the segment?** Weighted averages across a market with luxury and affordable in it are nearly meaningless. Look for the segment split.
3. **Is "price" a listing price, a transaction price, or an index?** Listing prices overstate. RBI's HPI is built from **registration data** and is the most neutral.
4. **What's the base period?** Year-on-year against a weak base flatters everything. RBI rebased its HPI to **2022-23** — comparisons across the rebasing need care.
5. **Who paid for it?** Consultancy research is high quality and also marketing. It is rarely wrong, but it is rarely bearish either. **Triangulate.**

 **The professional habit:** never quote a single source. Take Knight Frank *and* ANAROCK *and* JLL on the same quarter. Where they agree, you can speak confidently. Where they diverge, that divergence is itself the interesting fact — and saying so is far more impressive than a confident wrong number.

4. Sources — the definitive list

Tier 1 — official

SOURCE	USE FOR	LINK
RBI — House Price Index	Neutral price series, 10 cities, from registration data	https://www.rbi.org.in/
RBI — policy statements	Interest rate direction	https://www.rbi.org.in/
IGR Maharashtra — e-ASR	Official ready reckoner values by locality	https://igrmaharashtra.gov.in/Home/asr_about
IGR Maharashtra	Registration data, registered documents	https://igrmaharashtra.gov.in/
MahaRERA	Project counts, registrations, promoter track records, stalled projects	https://maharera.maharashtra.gov.in/
MCGM / AutoDCR	Building approvals pipeline	https://autodcr.mcgm.gov.in/bpamsclient2/Login.aspx
MoHUA	Policy and housing programmes	https://www.mohua.gov.in/

 **MahaRERA is an under-used research source.** Registered projects in a taluka, their declared completion dates and their QPR compliance give you a **forward supply pipeline** that no consultancy report offers at that granularity. Very few agents think to use it this way.

Tier 2 — industry

5. 🎯 Practical assignment: analyse one Mumbai micro-market

This is the capstone of the whole course. Budget 4–6 hours.

Pick one: Kharghar · Ulwe · Panvel · Ghodbunder Road (Thane) · Mulund · Chembur · Borivali East · Goregaon East · Wadala.

Step 1 — define the boundary (15 min)

Write down exactly what you're including. Pin nodes: which stations, which roads. **Every number you produce afterwards must refer to this boundary.**

Step 2 — the supply pipeline (60 min) 🏠

On **MahaRERA**, search registered projects in that taluka/village. Record: number of registered projects, their declared completion dates, total registered units where visible, and how many are **lapsed or de-registered**. This is your **forward supply pipeline**.

Step 3 — demand and absorption (45 min) 🏠

From the latest **JLL** / **ANAROCK** / **Knight Frank** quarter, extract launches, sales, unsold inventory and QTS at the closest available geography. Note where their boundary differs from yours.

Step 4 — prices (60 min)

- **Official floor:** ready reckoner values from **e-ASR**
- **Asking prices:** sample **at least 10** live listings. Convert **every one to ₹ per carpet sq ft** (Module 10)
- **Neutral series:** the latest RBI HPI reading for Mumbai

Report a **range**, not a point. A single "average price" for a micro-market is almost always misleading.

Step 5 — rental market (30 min)

Sample 10 rental listings for a comparable 2BHK. Compute **gross yield** against your median capital value. Compare with the ~2.5–3.5% Mumbai residential norm.

Step 6 — infrastructure (45 min) 🏠

List every infrastructure project affecting the boundary, with **status and expected completion**, from MMRDA / MCGM / metro authority sources. **Distinguish announced from under construction from commissioned** — they price completely differently.

Step 7 — developers (30 min) 🏠

Identify the three most active promoters. For each, pull their MahaRERA track record: completed projects, delays, extensions, complaints.

Step 8 — write it (60 min)

Two pages maximum:

1. What this micro-market is, and who buys here
2. Supply pipeline
3. Demand and absorption

4. Price range on carpet, and rental yield
5. Infrastructure, with timing
6. The three main developers
7. **Your view** — and separately, **what would change your mind**
8. **Sources, with dates**

The discipline that makes it professional

Mark every statement:

- **[F]** Fact — sourced, with a link and a date
- **[I]** Inference — reasoning from facts
- **[O]** Opinion — your judgement

Most agents produce pure **[O]** and present it as **[F]**. Doing this properly, once, will make you noticeably better than the market.

6. Case study — two reports, one market, different answers

Report A says a micro-market's prices rose **9% YoY**. Report B says **3%**. Both are reputable and cover the same quarter. Your client asks which is right.

The answer is almost always: both, and the difference is definitional. Work through it:

1. **Geography.** Does A cover a wider area including a premium pocket that pulled the average up?
2. **Segment.** Is A a weighted average across all launches while B tracks a fixed basket? If luxury launches dominated the quarter, a weighted average rises without any individual flat getting more expensive. **This is the single most common cause.**
3. **Price definition.** Listing/asking prices (A) vs registered transaction values (B)? Asking prices run ahead in a rising market and lag in a falling one.
4. **Base period.** Is one comparing against a COVID-depressed base?
5. **Method.** Simple average vs median vs hedonic index. Averages are dragged by outliers.

What you say to the client:

"They're measuring different things. A is a weighted average of new launches across a wider area, which rises when the mix shifts to premium product. B tracks registered transactions in a narrower basket. For your decision — you're buying a specific 2BHK in a specific building — the number that matters is neither: it's the registered transaction values for comparable units in that building over the last six months, which we can pull from IGR. Let me do that."

That answer is worth more than either report. It shows you understand what the numbers are, you're not selling a narrative, and you know where the *decision-relevant* data actually lives.

7. Read first

PRIORITY	RESOURCE	READ	WHY
	Knight Frank — India Real Estate H1 2026 (PDF)	Methodology notes and Mumbai section	Read the methodology first — it teaches you how the numbers are built
	ANAROCK — Residential Market Viewpoints (PDF)	MMR pages	A second, independent read on the same market
	JLL — Mumbai Residential Market Dynamics	Latest quarter	The most granular free micro-market splits
	RBI	Latest House Price Index release	The neutral, registration-based price series
	IGR Maharashtra — About the ASR	e-ASR usage	The official value floor, locality by locality

8. Watch

PRIORITY	VIDEO	COVERS
	Mumbai Real Estate Reality Check — IBP	Structural market analysis
	India's Real Estate Outlook 2026 — JM Financial	How an analyst frames sector demand
	Calculating NPV and IRR in Excel	Spreadsheet technique for your own analysis

9. Deep dive

IIM Bangalore WP 477 — Housing Price Indices in India  <https://www.iimb.ac.in/sites/default/files/2018-08/WP%20No.%20477.pdf> **Read:** construction methodology and limitations. **Why:** the single best antidote to naive use of price statistics. Read it before you ever quote a "prices rose X%" figure again.

10. Quiz — 10 questions

1. Name the four core metrics for a micro-market.
2. Launches exceed sales and QTS is rising. What's happening?
3. Why is the RBI HPI more neutral than a consultancy price series?
4. Where would you find a forward supply pipeline that market reports don't give you?
5. Two reports disagree on price growth. Name three possible definitional causes.
6. What's the difference between listing prices and registered transaction values?
7. Why does segment mix distort a weighted average price?
8. Distinguish "announced", "under construction" and "commissioned" infrastructure for pricing.
9. What is the ready reckoner, and what is it useful for in research?
10. What do [F], [I] and [O] stand for, and why does the distinction matter?

Answers

1. **Launches, sales, unsold inventory, quarters-to-sell.**
2. Supply is running ahead of demand — the market is **loosening** and buyers have leverage.
3. It is built from **actual transaction/registration data** across ten cities, by a party with no commercial interest in the outcome.
4. **MahaRERA** — registered projects by taluka/village with declared completion dates and unit counts.
5. Geography definition; segment/mix; price definition (listing vs registered vs index); base period; averaging method (any three).
6. Listing prices are asks — they run ahead in rising markets and lag in falling ones. Registered values are what was actually paid and stamped (though they have their own floor effects from the ASR).
7. A weighted average rises when the mix shifts towards expensive product, even if no individual unit's price changed.
8. Value typically moves on **announcement**, again during **visible construction**, and least on **commissioning** — by which point it is largely priced in.
9. The **Annual Statement of Rates (ASR)** — the government's official minimum value per locality. In research it gives you an official price floor and a locality-level series independent of listings.
10. **Fact / Inference / Opinion.** Separating them is what makes a brief trustworthy — and stops you presenting a guess as data.

11. Interview questions

- "How would you research a micro-market you've never worked in?"
- "Two reports disagree. How do you handle it?"
- "Where does supply data come from?"
- "What's the difference between listing price and transaction price?"
- "How do you know whether prices in an area will hold?"

- "Show me a market brief you've written." ← **Have one ready. Most candidates don't.**

12. Key terms

Launches · Sales · Absorption · Unsold inventory · Quarters-to-sell · HPI · ASR · Hedonic index · Weighted average vs median · Base effect · Micro-market · Forward supply pipeline · Listing vs registered price · Triangulation

13. One-page revision sheet

Four metrics: launches · sales · unsold inventory · **quarters-to-sell**. Sales > launches + QTS falling = tightening. Launches > sales + QTS rising = loosening.

Five questions of any report: geography? segment? price definition? base period? who paid? **Never quote one source.** Triangulate Knight Frank + ANAROCK + JLL, and sanity-check on RBI HPI.

Sources: RBI HPI (neutral, registration-based) · IGR e-ASR (official floor) · **MahaRERA (forward supply pipeline — under-used)** · Knight Frank / ANAROCK / JLL / Colliers / CBRE.

Convert every price to ₹ per CARPET sq ft before comparing anything. Report ranges, not points. Mark every claim [F]act / [I]nference / [O]pinion.

🕒 Latest: unsold **525,695** (+4% YoY) · QTS **6** · inventory concentrating in **premium/luxury** while affordable absorbs · RBI HPI **+2.2%** YoY. Re-check quarterly.

14-Day Fast Track

Assumes 2–3 hours a day. Optimised for **passing the exam**, with just enough practical work to stop it being purely theoretical. If you have a month, use the **30-Day Professional Track** instead.

Exam reminder: 50 MCQs × 2 marks = 100; pass mark **40**; Marathi or English. 🌐 Verify at **MahaRERA**.

Week 1 — The law

DAY 1 · Real Estate Ecosystem

Topic: Module 1 — orientation, players, lifecycle 📖 **Read:** Module 1 · then s.2 definitions in the **RERA Act PDF** — 2(d), 2(k), 2(zk), 2(zm), 2(zn) 🎧 **Watch:** **RERA Act 2016 Explained — for Beginners** 📄 **Report:** **Knight Frank H1 2026** — skim the Mumbai section only 📌 **Task:** Map the Mumbai ecosystem for one project you can see (Module 1 §7) 🧠 **Revise:** 20 key terms · the 10-stage lifecycle

DAY 2 · Why RERA Exists + Structure

Topic: Module 2 §§2.1–2.3 — pre-RERA abuses, preamble, chapter structure 📖 **Read:** Module 2 to §2.3 · **MoHUA RERA page** 🎧 **Watch:** **Section 3 — When is RERA Registration Compulsory?** 📌 **Task:** Write down 5 pre-RERA abuses and the section that kills each 🧠 **Revise:** Chapter structure I–X · the four jobs of the Act

DAY 3 · 📌 The Sections Table

Topic: Module 2 §3 — the agent's section table. **The highest-value day in the course.** 📖 **Read:** Module 2 §3 · then ss.3–10 in the bare Act 🎧 **Watch:** **RERA Episode 3 — Registration of Real Estate Project** 📌 **Task:** Module 2 §7 — write the one-line "Section __ says __ / if broken __" for 10 sections 🧠 **Revise:** 500 sq m / 8 apartments · 70% · 10% · 5 years/30 days · 2 months · 2/3rds · 60 days/30% · ₹10,000 per day

DAY 4 · Promoter Duties & Allottee Rights

Topic: ss.11–19 📖 **Read:** ss.11–19 in the bare Act · **Module 2 quiz** 🎧 **Watch:** **Webinar — Registration of Project and Agent** 📌 **Task:** Do the Module 2 quiz cold. Score it. Re-read anything you missed 🧠 **Revise:** s.12 false advert · s.13 10% · s.14 defects · s.18 refund/interest · s.19 obligations

DAY 5 · MahaRERA

Topic: Module 3 — RERA vs MahaRERA, pillars, powers, documents 📖 **Read:** Module 3 · **Maharashtra Rules 2017** — agent fees + interest rate 🎧 **Watch:** **MahaRERA official channel** — any current agent content 📄 **Read:** **Order 46C/2025 — QR code in advertisements** 📌 **Task:** Module 3 §7 — audit the last 12 months of **orders** and **circulars** 🧠 **Revise:** **RERA = the Act. MahaRERA = the regulator.** Five pillars · ss.34–40

DAY 6 · 📌 Agent Registration & Duties

Topic: Module 5 — the heaviest exam module 📖 **Read:** Module 5 in full · **Guidance for Agents** · **Training Guidelines 120.pdf** 🎧 **Watch:** **Agent Registration + Mandatory Training Explained** 📌 **Task:** Module 5 §7A — self-audit against the Compliance Checklist 🧠 **Revise:** s.2(zm) · s.9 · s.10 · s.62 · ₹10,000/₹1,00,000 · 5 years · exam pattern

DAY 7 · Review + Test

Topic: Consolidate Week 1 📖 **Read:** Revision sheets of Modules 1, 2, 3, 5 📌 **Task:** Do **all four quizzes** (Modules 1, 2, 3, 5) in one sitting, timed, no notes 🧠 **Revise:** Every number you got wrong. Write them on a single card

Checkpoint: if you scored under 70% across the four, repeat Days 3 and 6 before continuing.

Week 2 — Practice, money and the portal

DAY 8 · The MahaRERA Portal

Topic: Module 4 — hands-on 📖 **Read:** [Module 4 · Guide for Promoters — documents list](#) 🧑 **Watch:** [MahaRERA Tutorials playlist](#) · [Search registered projects](#) 🗑️ **Task:** 🔴 **Run the full 15-step investigation on a real project.** Write the five-line note 🧠 **Revise:** The 15 steps, in order · the five deal-breakers

DAY 9 · Project Registration & Promoter Duties

Topic: Module 6 📖 **Read:** [Module 6 · Bank Account Order](#) 🧑 **Watch:** [MahaRERA step-by-step project registration](#) 🗑️ **Task:** Score two projects on the Developer Project Analysis Framework 🧠 **Revise:** ss.3–8 · three bank accounts · Forms 1–5 · QPR dates (20 Jul/Oct/Jan/Apr)

DAY 10 · 🔴 Allottees & Penal Provisions

Topic: Module 7 — heavily examined 📖 **Read:** [Module 7](#) in full · ss.59–72 in the bare Act 🧑 **Watch:** Re-watch the rights/remedies portion of [RERA for Beginners](#) 🗑️ **Task:** 🔴 **Read 3 real s.18 delay orders** at [Orders & Judgments](#). Summarise what MahaRERA actually does 🧠 **Revise:** The **penalty grid** — promoter/agent/allottee × Authority/Tribunal. Learn it as a shape

DAY 11 · Due Diligence

Topic: Module 8 📖 **Read:** [Module 8](#) · s.4(2) clause by clause 🧑 **Watch:** [Due Diligence for Immovable Property — EBC](#) · [LawRato document check](#) 🗑️ **Task:** Build your one-page due-diligence pack and fill it for one live project 🧠 **Revise:** Five heads · three cross-checks · five stops

DAY 12 · Sales, Forms & Agreements

Topic: Module 9 📖 **Read:** [Module 9](#) · 🔴 **Rule 10 + Annexure A** of the [Maharashtra Rules](#) 🧑 **Watch:** [Carpet Area, Loading & RERA explained](#) 🗑️ **Task:** Download a real proforma agreement and mark it up against Annexure A (Module 9 §9) 🧠 **Revise:** 10% cap · 2% **cancellation cap** · 194-IA (1%, ₹50L, whole amount) · 194H (2%) · LTV bands

DAY 13 · Calculations

Topic: Module 10 — the easiest marks on the paper 📖 **Read:** [Module 10](#) — **work every example by hand** 🧑 **Watch:** [Carpet Area — Calculation & Formula \(Hindi\)](#) 🗑️ **Task:** Build the cost-sheet calculator. Run 3 real listings through it 🧠 **Revise:** Loading · stamp duty on the **higher value** · GST 1%/5%/0% · TDS · EMI formula · yield · CAGR

DAY 14 · Final Review + Mock

Topic: Everything 📖 **Read:** **All 13 revision sheets**, back to back — about 45 minutes 🗑️ **Task:** Do **every quiz** in the course in one sitting (130 questions). Target: **85%+** 🧠 **Revise:** Your wrong-answer card. Then the [master resource library](#)

Night before the exam: revision sheets for Modules 2, 5, 7 and 10 only. Nothing new.

What you will and won't have after 14 days

You will have: the exam covered, one real project investigated end to end, a cost-sheet calculator, and a marked-up agreement.

You won't have: Mumbai market depth (Module 11), developer finance (Module 12) or research skill (Module 13). Those are the modules that make you *good*, as opposed to *certified*. **Come back for them after the exam** — the 30-day track sequences them properly.

30-Day Professional Track

Assumes 2–3 hours a day. This is the full programme: certification **plus** the practical, market and financial depth that makes you credible with developers, investors and institutional buyers — not just compliant.

Structure: **Week 1** law · **Week 2** application · **Week 3** money and market · **Week 4** synthesis and mastery.

WEEK 1 — The legal foundation

Day 1 · Real estate ecosystem

📖 **Module 1** · s.2 definitions in the Act 🧩 **RERA for Beginners** 📝 Map the ecosystem for one visible project 🧠 20 terms · the 10-stage lifecycle

Day 2 · The development lifecycle in depth

📖 **Real Estate Development Guide — Mastt · Sila — Concept to Creation** 🧩 **Carpet vs built-up vs super built-up** 📝 Write the approval sequence for a Mumbai high-rise, authority by authority 🧠 IOD · CC · OC

Day 3 · Why RERA exists

📖 **Module 2** §§2.1–2.4 · MoHUA 🧩 **Section 3 explained** 📝 Five pre-RERA abuses → the section that killed each 🧠 Chapters I–X · the four jobs

Day 4 · 🟡 The sections table

📖 **Module 2** §3 · ss.3–10 bare Act 🧩 **Episode 3 — Project Registration** 📝 **Module 2** §7 section-map exercise 🧠 All the core numbers

Day 5 · Promoter duties, allottee rights

📖 ss.11–19 bare Act 🧩 **Project & Agent Registration webinar** 📝 **Module 2** quiz, cold 🧠 s.12 · s.13 · s.14 · s.18 · s.19

Day 6 · Offences and penalties

📖 ss.59–72 bare Act · **Module 7** §2.4 🧩 **Understanding RERA playlist — penalties portion** 📝 Draw the penalty grid from memory 🧠 Promoter 3 yrs / agent & allottee 1 yr · 5% vs 10%

Day 7 · Week 1 consolidation

📝 Quizzes for Modules 1, 2 and 7. Target 80% 🧠 Wrong-answer card

WEEK 2 — Maharashtra, the portal, and you

Day 8 · MahaRERA institution

📖 **Module 3** · **Maharashtra Rules 2017** 🧩 **MahaRERA official channel** 📝 12-month order/circular audit 🧠 RERA vs MahaRERA · five pillars · ss.34–40

Day 9 · The current regulatory layer

📖 **Order 46C/2025** · **Bank Account Order** · **Trilegal note** · **Desai & Diwanji on advertising** 📝 Design a fully compliant advertisement 🧠 QR · top-right · font rule · ₹10k–₹50k

Day 10 · 🟡 The portal, hands-on

📖 **Module 4** 🧩 **MahaRERA Tutorials** · **Project search** 📝 **15-step investigation, project #1** 🧠 15 steps · five deal-breakers

Day 11 · Portal, second pass

📖 Guide for Promoters · Resources for Homebuyers 🧑‍🔧 De-registered / stalled projects 📁 Investigation #2 — same promoter, different project. Compare portfolio behaviour 🧠 QPR dates · Forms 1–5

Day 12 · 🚫 Agent registration and duties

📖 Module 5 · Guidance for Agents · 120.pdf 🧑‍🔧 Registration + Training Explained · Understanding the process 📁 Compliance Checklist self-audit 🧠 s.2(zm) · s.9 · s.10 · s.62 · fees · validity

Day 13 · Project registration & promoter analysis

📖 Module 6 🧑‍🔧 Project registration walkthrough 📁 Developer Project Analysis Framework on two projects 🧠 ss.3–8 · three accounts

Day 14 · Allottees and dispute resolution

📖 Module 7 · Guidance for Complainants · Conciliation 📁 🚫 Read 3 real s.18 orders 🧠 The ladder · 60 days / 30% · Authority vs Adjudicating Officer

WEEK 3 — Documents, money and the Mumbai market

Day 15 · Due diligence

📖 Module 8 · s.4(2) clause by clause 🧑‍🔧 EBC — Due Diligence for Immovable Property 📁 Build the due-diligence pack 🧠 Five heads · three cross-checks · five stops

Day 16 · Due diligence, live

📖 LegiScore land acquisition checklist 🧑‍🔧 LawRato document check · Verify property documents 📁 Full due diligence on a real project, incl. IGR and AutoDCR cross-checks 🧠 Title · encumbrance · CC/OC

Day 17 · Documents and the sales chain

📖 Module 9 · 🚫 Rule 10 + Annexure A in full 🧑‍🔧 Carpet area & loading 📁 Mark up a real proforma agreement against Annexure A 🧠 10% cap · 2% cancellation cap

Day 18 · Documents, deeper

📖 Taxmann — allotment letter / AFS / sale deed · AZB — Model Allotment Letter · Lexology — AFS mandatory clauses 📁 List the 3 clauses you'd negotiate for a buyer, with reasons 🧠 The clause checklist

Day 19 · Taxes and charges

📖 Module 10 §§1–7 · IGR e-ASR 🧑‍🔧 Carpet area calculation (Hindi) 📁 Build the cost-sheet calculator 🧠 Stamp duty on the **higher** value · GST · TDS

Day 20 · Loans and investment maths

📖 Module 10 §§8–9 · RBI Housing Finance Master Circular 🧑‍🔧 NPV & IRR for real estate 📁 Run 3 real listings: all-in cost, cash needed, EMI, yield 🧠 LTV bands · EMI formula · yields 2.5–3.5%

Day 21 · Mumbai geography and planning

📖 Module 11 §§2–3 · Knight Frank DCPR 2034 report 🧑‍🔧 Mumbai Real Estate Reality Check 📁 Map the micro-markets and their governing authorities 🧠 FSI · TDR · 33(7)/33(9)/33(10)

WEEK 4 — Market, finance, synthesis

Day 22 · Redevelopment

📖 Module 11 §3.4 · MCHI 33(7) & 33(9) deck · Desai & Diwanji — cluster scheme 📁 Model a society redevelopment: rehab vs sale component 🧠 300 sq ft min · 4,000/6,000 sq m · 55%

Day 23 · The market today

📖 Knight Frank H1 2026 · ANAROCK · JLL Mumbai 📌 Extract launches/sales/inventory/QTS from all three. Note where they disagree 🧠
The four metrics

Day 24 · Developer economics

📖 Module 12 §§2–4 🧑 Residual Land Value 📌 Compute RLV for a hypothetical Mumbai plot 🧠 GDV · margin · return on cost · RLV

Day 25 · The ₹500 crore model

📖 Module 12 §5 🧑 NPV & IRR in Excel 📌 🚫 Build the Meridian Heights model. Run all five sensitivities 🧠 Break-even 71.4% · IRR 21.3% · peak funding Y1

Day 26 · Market research method

📖 Module 13 §§2–4 · IIM-B WP 477 📌 Steps 1–3 of the micro-market assignment 🧠 Five questions of any report · [F]/[I]/[O]

Day 27 · Micro-market analysis

📌 🚫 Steps 4–7: prices on carpet, rental yield, infrastructure, developer track records 🧠 Triangulation · ranges not points

Day 28 · Write the brief

📌 🚫 Write the two-page micro-market brief. Every claim marked [F]/[I]/[O], every source dated 🧠 Read it aloud. Anything you can't defend, cut

Day 29 · Full revision

📖 All 13 revision sheets 📌 Every quiz in the course — 130 questions, one sitting. Target 85%+ 🧠 Wrong-answer card

Day 30 · Mock exam + integration

📌 Re-do the questions you got wrong. Then answer these five out loud, as if to a developer:

1. "What's the difference between RERA and MahaRERA?"
2. "Take me through how you'd check my project before recommending it."
3. "What's the all-in cost of a ₹2 crore flat in Goregaon?"
4. "Where's MMR growth coming from and why?"
5. "Why won't you sell my pre-launch?"

🧠 If you can answer all five fluently, you're ready — for the exam **and** the room.

After Day 30 — the maintenance routine

FREQUENCY	DO THIS
Weekly	Scan new MahaRERA orders and circulars
Monthly	Read one MahaRERA order/judgment in full
Quarterly	Update your micro-market brief with the new JLL/ANAROCK/Knight Frank numbers
Half-yearly	Read the Knight Frank India report cover to cover
Annually	Re-verify every 🕒 rate in Module 10 — stamp duty, GST, TDS, LTV, ready reckoner
At 4 yrs 9 mths	Start your registration renewal

What Should I Study Today?

Open this when you have time but no plan. Find your slot, do exactly what it says, close the file.

No decisions required. Deciding what to study is the tax that stops people studying.

🕒 30 MINUTES

Do exactly one of these. Rotate through them in order — day 1 is A, day 2 is B, and so on.

	TASK
A	Read the Module 2 revision sheet + the sections table . Cover the "Simple meaning" column and recite it.
B	Read the Module 5 revision sheet . Then write out s.9, s.10 and s.62 from memory. Check.
C	Do one module quiz cold (10 questions). Score it. Re-read only what you got wrong.
D	Run steps 1–5 of the MahaRERA investigation on any project. Just the first five.
E	Read one MahaRERA order from Orders & Judgments . One. In full.
F	Do the Module 10 practice questions . By hand, no calculator where possible.
G	Scan orders and circulars for anything new. Note anything affecting agents.
H	Read the penalty grid in Module 7 §12. Redraw it from memory.

If you only ever have 30 minutes: cycle A → B → C → H forever. That alone will get you through the exam.

🕒 1 HOUR

Pick the pairing that matches where you are.

Still learning the law:

- 30 min — read one module's §2 (the explanation)
- 20 min — watch that module's #1 video
- 10 min — do the quiz

Consolidating:

- 20 min — two revision sheets
- 25 min — both those modules' quizzes, cold
- 15 min — re-read only your wrong answers

Building skill:

- 45 min — full **15-step investigation** on one project
- 15 min — write the five-line note

Staying current:

- 20 min — scan new orders and circulars
- 25 min — read one MahaRERA judgment in full
- 15 min — update your wrong-answer card and your micro-market notes

2 HOURS

The standard study block. One module, properly.

0:00–0:45 Read the module's explanation (§2) and its main table
0:45–1:15 Read the linked OFFICIAL source – the Act section, the rule, the order
1:15–1:40 Watch the module's top-priority video
1:40–1:55 Do the quiz, cold
1:55–2:00 Read the one-page revision sheet

Module order if you're starting fresh: 2 → 5 → 3 → 7 → 4 → 6 → 8 → 9 → 10 → 1 → 11 → 12 → 13

(Yes, Module 1 comes late in this sequence. If you already work in real estate, its content is mostly vocabulary you have. If you're new, do it first.)

3 HOURS

A module plus real practice. This is the block that actually builds competence.

0:00–1:15 Module: read §2, the main table, and the official source
1:15–1:45 Watch the two top videos
1:45–2:45 📁 THE MODULE'S PRACTICAL EXERCISE – the whole thing, properly
2:45–3:00 Quiz + revision sheet

Never skip the 1:45–2:45 block. It is the only part that transfers to real work. Reading Module 8 makes you informed; doing the due-diligence pack makes you useful.

FULL DAY (6–8 hours)

Use a full day for one of these four. Don't try to cover several modules — go deep on one thing.

Option 1 — The Law Day (*best pre-exam use of a full day*)

09:00–10:30 Module 2 in full + s.2, s.3–10 of the Act
10:30–10:45 Break
10:45–12:15 Module 5 in full + Guidance for Agents + 120.pdf
12:15–13:00 Lunch
13:00–14:30 Module 7 + ss.59–72 of the Act
14:30–15:30 Module 3 + the last 12 months of orders and circulars
15:30–16:30 Quizzes for Modules 2, 3, 5, 7 – timed, no notes
16:30–17:00 Wrong-answer card + all four revision sheets

Option 2 — The Practitioner Day

09:00–10:00 Module 4 – the 15 steps
10:00–11:30 📁 Full investigation, project #1
11:30–13:00 📁 Full investigation, project #2 – same promoter
13:00–13:45 Lunch
13:45–15:00 Module 8 + build the due-diligence pack
15:00–16:30 📁 Full due diligence incl. IGR and AutoDCR cross-checks
16:30–17:00 Write both five-line notes. Compare the promoter's two projects

Option 3 — The Numbers Day

09:00–10:30	Module 10 – work EVERY example by hand
10:30–12:00	👉 Build the cost-sheet calculator
12:00–13:00	👉 Run three real listings through it
13:00–13:45	Lunch
13:45–15:00	Module 12 §§2–4 + the NPV/IRR and Residual Land Value videos
15:00–16:45	👉 Build the Meridian Heights model. Run all five sensitivities
16:45–17:00	Both revision sheets

Option 4 — The Market Day

09:00–10:30	Module 11 + Knight Frank DCPR 2034 report
10:30–12:00	Knight Frank H1 2026 + ANAROCK + JLL – extract the four metrics from each
12:00–13:00	Module 13 §§2–4
13:00–13:45	Lunch
13:45–16:30	👉 THE MICRO-MARKET ASSIGNMENT – steps 1 through 7
16:30–17:30	👉 Write the two-page brief. Mark every claim [F]/[I]/[O]

 EMERGENCY MODE

Exam is tomorrow

2 h	All 13 revision sheets, back to back
1 h	Modules 2, 5, 7, 10 revision sheets AGAIN
1 h	Every quiz in the course
30 m	Wrong answers only
	STOP. Learn nothing new. Sleep.

Exam is in an hour

Read only these, in this order:

- 1. **Module 2 revision sheet** — the numbers block
- 2. **Module 5 revision sheet** — s.9, s.10, s.62
- 3. **Module 7 revision sheet** — the penalty grid
- 4. **Module 10 revision sheet** — the rate list

Meeting a developer in an hour

- 1. **Module 12 revision sheet** — so you know what they're optimising for
- 2. **Module 11 revision sheet** — FSI, TDR, 33-series, current market numbers
- 3. Their **MahaRERA track record** — 10 minutes on the portal. Do this. Always.

Meeting a serious buyer in an hour

- 1. **Module 4** — the 15 steps
- 2. **Module 10 revision sheet** — so you can do the all-in cost on the spot
- 3. The **project's portal record** — pull it up on your phone before you walk in

The five habits that matter more than any schedule

FREQUENCY	HABIT
Daily	Convert one quoted price to ₹ per carpet sq ft. Until it's automatic.

FREQUENCY	HABIT
Weekly	Scan MahaRERA orders and circulars . Five minutes.
Monthly	Read one MahaRERA order in full.
Quarterly	Refresh your micro-market numbers from the latest Knight Frank / ANAROCK / JLL.
Annually	Re-verify every 🕒 rate in the time-sensitive register .

The one-question self-test

Before you close the course each day, answer this out loud:

"What did I learn today that would change what I'd say to a client tomorrow?"

If the answer is nothing, you read but didn't study. Pick a 30-minute task from the list above and do it properly.

Master Resource Library

Every external resource in the course, in one table.

Priority: ● Essential · ● Important · ● Optional / deep dive **Time:** estimated reading time for documents. **Video run-times are shown as n/a** — they could not be verified when this course was built, and inventing them would be worse than omitting them. (See the honesty note in the [README](#).)

D. Research papers and academic 🎓

#	MODULE	TITLE	AUTHOR / ORG	YEAR	DIRECT LINK	READ	WHY IT MATTERS
82	1,11,12,13	Housing Price Indices in India — Working Paper No. 477	IIM Bangalore	2015	PDF	Introduction + methodology sections	Teaches how Indian house-price indices are constructed — and why two reports can disagree about the same market. Older, but the methodology discussion is the point
83	2,12	Impact of Real Estate Regulatory Authority (RERA) Act 2016	ResearchGate (peer-reviewed journal article)	2023	Link	Findings and discussion	Documents post-RERA developer consolidation, launch slowdown, compliance cost — the evidence behind Module 12's financing argument
84	2	A Critical Study on the Effects of RERA Regulations on India's Real Estate Industry	ResearchGate	2024	Link	Limitations / criticism section	Lets you name what RERA <i>doesn't</i> fix — inconsistent state implementation, pre-Act projects, enforcement lag. Balance reads as expertise
85	11,13	House Price Index / Residential Asset Price Monitoring Survey	RBI	Quarterly	Link	Latest release, Mumbai rows	The only major Indian price series built from registration data by a party with no commercial interest — your neutral benchmark

⚠ Items 83 and 84 are academic articles of varying rigour hosted on ResearchGate. Read them for **perspective**, never as authority on what the law says. For that, always the bare Act (#1).
