

Every claim on slides 1 to 6, and where the evidence for it lives

Page numbers refer to *The Mumbai Real Estate Master Playbook 2026* (60 pages, A4 landscape). Datasets refer to the CSVs in data/. Both are generated from the same evidence file as the deck, so no figure here can disagree with a figure there.

THE CLAIM ON THE SLIDE	WHERE IT IS PROVED	SOURCE AND DATASET
01 Opening		
80,221 registrations and ₹6,968 cr of stamp duty in H1 2026	p.9 · A2	SRC-005 · data/monthly_registrations_2026.csv
1,57,410 unsold units, 6.5 quarters to clear	p.10 · A3	SRC-004 · data/public_market_snapshot.csv
42,865 registered agents in Maharashtra	p.8 · A1	SRC-025 · data/source_registry.csv
Registrations are public, dated and addressable back to 1985	p.41 · E3	IGR e-Search · SRC-001
02 The customer's problem		
The six questions that decide the deal	p.47 · F2	first-conversation protocol
Area-basis error of 20–30% between carpet, built-up and saleable	p.44 · E6	provenance rule 3 · data/data_dictionary.csv
Developer delivery record is public but unread	p.41 · E3	MahaRERA QPR filings · SRC-002
Commute, society rules and maintenance are field observations	p.46 · F1	field research protocol
03 What Brickrock is		
1.32% blended commission is the only revenue line	p.33 · D2	data/ticket_mix_model.csv
Verdict: what this business is, and is not	p.4 · front matter	written before the analysis, not after
The evidence layer is an operating tool, not a product	p.17 · B1	six-layer operating stack
Every closure re-enters the loop as evidence	p.50 · F5	post-close and referral flywheel

THE CLAIM ON THE SLIDE	WHERE IT IS PROVED	SOURCE AND DATASET
04 How it works		
The seven-step transaction engine	p.24 · C1	operating flow
What each data domain holds and how fast it goes stale	p.40 · E2	data/data_domains.csv
Which source answers which question	p.41 · E3	data/source_registry.csv
The eight provenance rules the record is kept under	p.44 · E6	confidence grading and SRC tagging
05 Where we start		
Seven weighted criteria and one weight vector	p.18 · B2	data/market_priority_weights.csv
Eastern & Central 8.00; Navi Mumbai and Western tie at 7.48	p.20 · B4	data/market_priority_model.csv
First across 99% of 5,000 randomised weight vectors	p.19 · B3	tornado and Monte Carlo sensitivity
Locality asking bands, rents and yields	p.11 · A4	data/micro_markets.csv · medium confidence
Infrastructure scored by status, not by announcement	p.13 · A6	data/infrastructure_register.csv
06 Customer–market fit		
Segment mix, ticket sizes and commission rates	p.33 · D2	data/ticket_mix_model.csv
81% of registrations are 1,000 sq ft or less	p.10 · A3	SRC-033 · medium confidence
Homes above ₹1 crore: 49% → 54% of sales in a year	p.8 · A1	SRC-032
Rental as a lead nursery rather than a revenue line	p.37 · D6	lead channels

Every claim on slides 7 to 12, and where the evidence for it lives

Page numbers refer to *The Mumbai Real Estate Master Playbook 2026* (60 pages, A4 landscape). Datasets refer to the CSVs in data/. Both are generated from the same evidence file as the deck, so no figure here can disagree with a figure there.

THE CLAIM ON THE SLIDE	WHERE IT IS PROVED	SOURCE AND DATASET
07 Competitive positioning		
Where portals, national brokerages and independents stop	p.22 · B6	competitive positioning
The competitor set is the 42,865 registered agents	p.18 · B2	whitespace criterion, re-based
Disclosure of who pays us, in writing	p.42 · E4	MahaRERA advertising-disclosure order
08 The moat		
What accumulates and why it cannot be bought	p.17 · B1	layer 6 of the operating stack
Capture discipline on every deal, won or lost	p.49 · F4	documentation and closure
Referral coefficient and how it is measured	p.50 · F5	post-close flywheel
Geographic hierarchy L0–L6, pocket as the research unit	p.39 · E1	data/geo_hierarchy.csv
09 Business model and economics		
Funnel: 900 → 240 → 110 → 45 → 15 in the base case	p.32 · D1	data/funnel_scenarios.csv
Blended 1.32% on ₹2.30 cr average consideration	p.33 · D2	data/ticket_mix_model.csv
Cost base: ₹0.49 L one-off, ₹95k per month	p.33 · D2	data/cost_base.csv
GST heading 9972 and TDS under 194-IA / 194H	p.52 · G1	SRC-027 to SRC-031 · glossary p.59
KPI tree — which number moves which outcome	p.35 · D4	

THE CLAIM ON THE SLIDE	WHERE IT IS PROVED	SOURCE AND DATASET
10 Go to market		
Channel costs, latency and defensibility	p.37 · D6	analyst estimates, labelled as such
Qualified-lead and site-visit conversion as the two live unknowns	p.32 · D1	the pilot's first two measurements
The client-fit engine behind qualification	p.43 · E5	budget, timeline, authority, area fit
Referral coefficient > 0.5 as the expansion gate	p.30 · C7	decision gates
11 Capital and the proof		
₹11.3 L = the conservative trough plus 40% headroom	p.34 · D3	cash curve, both cases
The 90-day pilot, week by week	p.27 · C4	data/roadmap_90_day.csv
The 90-day checklist, item by item	p.56 · G3	pages 56–58
Certificate of Competency mandatory from January 2026	p.42 · E4	compliance path · data/compliance_obligations.csv
Risk register with severity, owner and mitigation	p.36 · D5	data/risk_register.csv
12 Founder and the long arc		
Sheesham.in revenue, PAT, invoices — Lakshay's own business	Sheesham.in incubation deck, July 2026	deck/build/founder.py
@brickrockrealty audience and content mix — his own presence	Instagram profile, August 2026	deck/build/founder.py
~310 acres family inheritance; 124 acres his father's scheme	Family context, explicitly not his assets	deck/build/founder.py
What each stage of the arc has to prove before the next	p.30 · C7	decision gates · p.60 · G5

The methodology the deck deliberately does not carry

A pitch deck that shows its working stops being a pitch deck. Everything below is deliberately absent from the twelve slides and deliberately present in the playbook, one click away. Ask for any of it and it is already written.

The entry model

- p.18 Seven weighted criteria and the weight vector
- p.19 Does the recommendation survive being wrong — tornado and 5,000-run Monte Carlo
- p.20 Corridor scorecard, all six corridors on all seven axes
- p.21 Corridor profiles for the three in contention

The work

- p.25 Work breakdown structure — 24 work packages
- p.26 Year-1 hour budget
- p.29 The operating week
- p.28 Twelve-month schedule
- p.30 Decision gates

Assumptions are labelled as assumptions. Segment mix, conversion rates, commission rates, channel costs and the accumulation curve on slide 8 are planning estimates. Each one is marked on the slide it appears on, and the 90-day pilot exists to replace them with measurements.

The economics

- p.32 Deal funnel, three scenarios
- p.33 Unit economics and the Year-1 P&L
- p.34 Cash curve, trough and capital requirement
- p.35 KPI tree
- p.36 Risk register
- p.37 Lead channels

The system

- p.39 Geographic hierarchy, L0 to L6
- p.40 Data domains, fields, refresh cadence and staleness limits
- p.41 The source stack
- p.42 Compliance path and calendar
- p.43 The client-fit engine
- p.44 The eight provenance rules

Every market figure carries a confidence grade. High, medium, low or model, with an SRC tag resolving to the source registry on pages 52–54. Fourteen substantive corrections to the original research are set out on pages 5–6.

The playbooks

- p.46 Field research protocol
- p.47 The first client conversation
- p.48 Negotiation playbook
- p.49 Documentation and closure
- p.50 Post-close and the referral flywheel

The appendices

- p.52 Source registry — 33 registered sources with confidence grades
- p.55 Data dictionary
- p.56 The 90-day checklist
- p.59 Glossary, including GST and TDS mechanics
- p.60 What to do on Monday morning

Founder claims are separated by attribution. Sheesham.in and @brickrockrealty are Lakshay's own. The ~310-acre inheritance is a family asset and the 124-acre scheme is his father's. That separation is enforced in deck/build/founder.py and is never blurred on a slide.
